STEP 02

## Chlorine Head Filter

Filters out residual chlorine and heavy metals in tap water
You can use cleaner water.

please! please verify

## Acquired US NSF certification

We use domestically produced chlorine balls that have obtained NSF certification. Residual chlorine mitigation ability is maintained for a long time compared to Chinese chlorine balls.

Aquaduo shower filter
**Actual video of the purification process**

allow water that has reacted with the reagent while passing through the chlorine head filter. It is a valve that produces cleanliness, and is included in tap water in each household. Because the amount of chlorine and the environment vary from place to place, it is necessary to actual use. 100% chlorine may not be removed.

STEP 03

## Interior Effect

Give a point to the bathroom with pretty colors
You can feel the interior effect.

STEP 04

## Water pressure increase effect

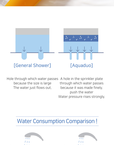
Precisely machined stainless steel
spray plate penetrates through the holes.
Produces a powerful, rich and gentle stream.

STEP 05

30~40% Water Saving Effect

## Fine hole powerful spray plate

Strong water pressure is created by spraying through holes.
It is a product with **30~40% water saving effect** compared to general shower.



Water Consumption Comparison !

STEP 06

Make your skin healthier!

## Anions Emission

The SF-580 shower is Korean domestic water filter from a waterfall and breaks With the principle that the water droplets generate anion oxygen molecules, it releases natural negative ions to help skin health and health care.

AQUADUO

## Safely and Strictly

User safety is our top priority.
Our technology has been verified through various certificates.

AFFILIATED COMPANY.

Actively working with companies with international technology.
We are maximizing technical cooperation through Open Innovation.
