Imaging Hardware

A complete range of book, document, microfilm and large format scanning equipment.

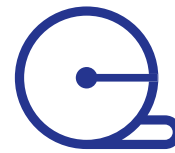

Digitisation Solutions

Bespoke on-site and outsourced imaging. Digitisation, conversion and reformatting services offering an end to end solution.

Content Management

Document and Asset Management solutions providing both internal server and hosted Cloud (SaaS) solutions.

Microfilm

Dedicated micrographic solution specialists and exclusive FUJIFILM distributor for EMEA. Worldwide distributor of a complete range of consumable and scanning technology.

Technical Support

A complete range of support services for on and off-site, contract and ad-hoc coverage of digital and micrographic equipment and solutions.

Print

End to end provision of print, graphic and web design requirements.

Imaging Hardware

We provide a complete range of best of breed scanners and capture devices for all types of documents, books, large format material and microfilm.

Book Scanners

Genus provides a wide range of book, manuscript and bound volume scanners from A5 to A0 in size, covering all requirements for colour, black and white and greyscale digitisation. Conservation and preservation demands are met by specialist cradles, whilst public or walk-up scanners offer solutions to a variety of reading room and self-use requirements.

The equipment embraces both traditional linear array scanners for high optical resolution requirements and the latest one-shot sensor based technology for speed and flexibility of capture.

Microfilm Scanners

From on-demand through to full automated production scanners, Genus has a complete range of microfilm scanners for every application.

Document Scanners

Genus distributes a complete range of document scanners for every requirement, from portable Wi-Fi scanners through to heavy duty production scanners. Specialist hardware such as slide and X-Ray scanners are also covered by our programme.

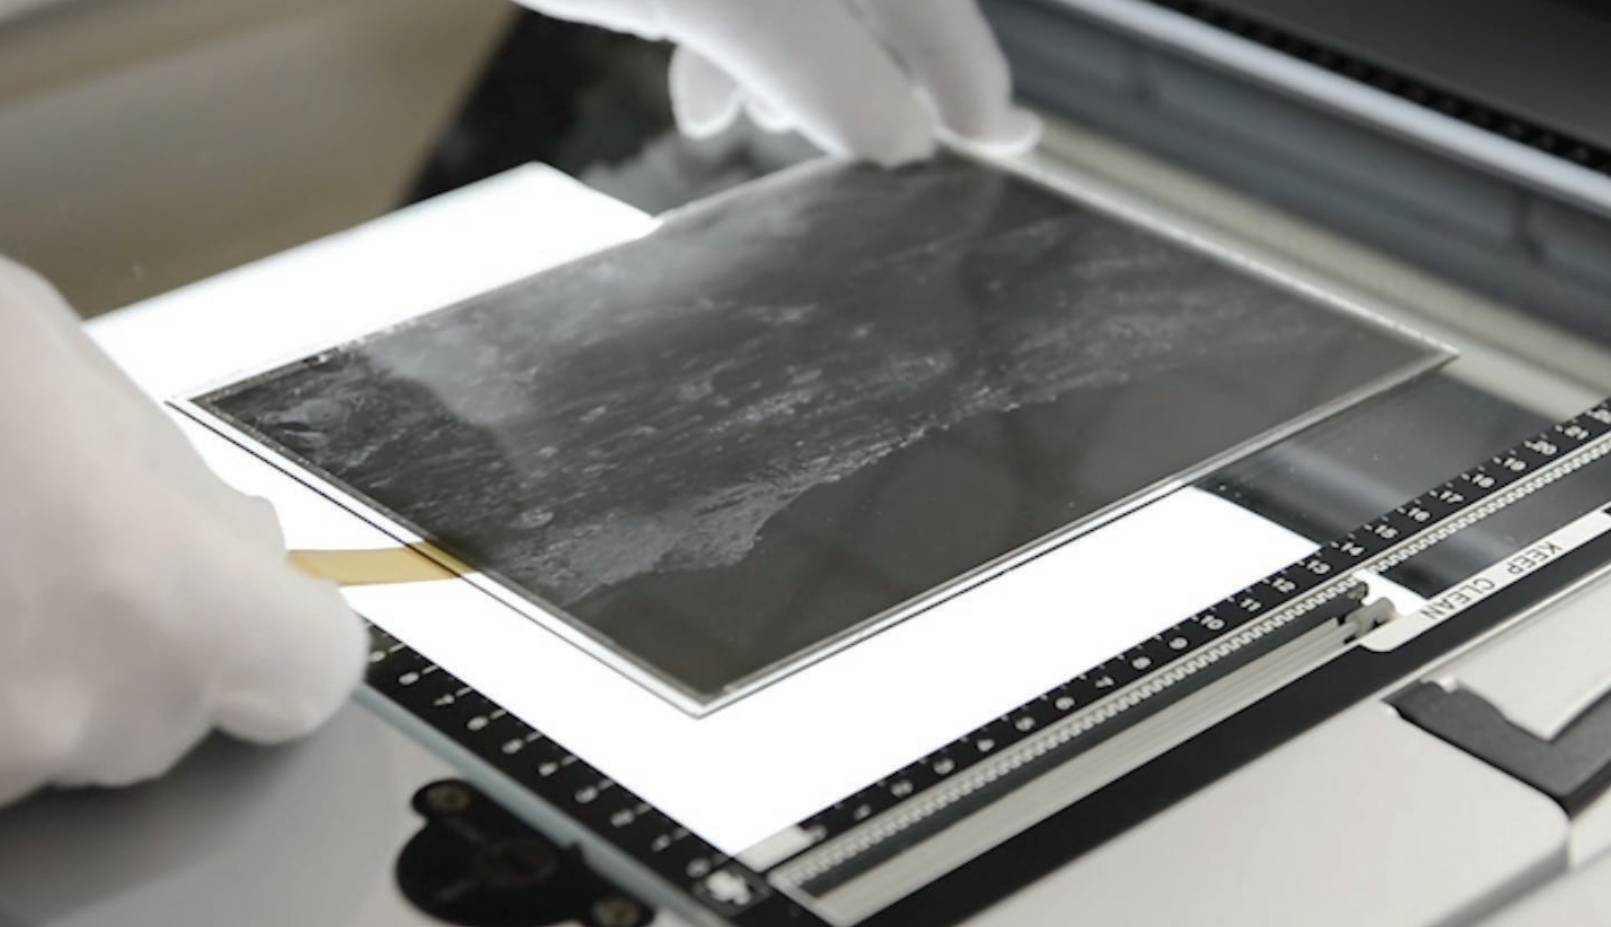

Digital to Microfilm Writers

As Fujifilm distributor for EMEA, Genus is committed to supporting the medium of microfilm for long term preservation of images. All standard formats are catered for with conversion equipment available to write to 16mm, 35mm, 105mm and Aperture Card.

Technical Support

All our equipment is supported by our own technical support team with field engineers across the country and a head office repair centre.

Genus Digitisation Solutions

Our Digitisation Solutions division utilises a number of specific capture and handling techniques resulting in a truly bespoke digitisation service for both heritage and commercial requirements.

Heritage and Bespoke Digitisation

Working with a number of independent consultants and major libraries across the UK and Ireland has helped us to devise a robust methodology which focuses on the conservation of material all the way through to the final digital output. Our methods of capture have been approved by our clients, who include the British Library, The Wellcome Trust, Getty Images and Rolls Royce. Our staff are fully trained and accredited in the handling of delicate and valuable items. A 'white glove' approach and the use of specialist lighting, cradles and supports, limits the risk of any damage to the original items.

Genus Scanning Services

We provide a comprehensive range of document management services. We provide a one-stop solution from collection, scanning and OCR processing to secure storage and shredding. We are dedicated to understanding your digitisation requirements, identifying and implementing ways to support you with your document scanning, electronic archiving and document management requirements.

Microfilm

Consumables:

Distributed by The Microfilm Shop, our dedicated and longstanding micrographic division, Genus is the exclusive Fujifilm partner and master distributor for the EMEA region.

Fujifilm have a world renowned range of silver original microfilms, direct duplicate microfilms, positive print microfilms and their own range of microfilm writer films. The Microfilm Shop provides a complete range of microfilm consumables under its Ozaphan brand, including processing chemistry, diazo films, jackets and aperture cards as well as spools, boxes and cartridges. Combined with a full range of microfilm scanning and production equipment Genus, The Microfilm Shop has the widest range of microfilm products in the world.

Hardware:

As distributor for Wicks & Wilson scanning equipment, Genus provides a complete range of on demand and production microfilm, microfiche and aperture card scanning hardware

Services:

Genus recognises that investment in scanning hardware is not always the appropriate solution and provides a range of options for on-site and outsourced microfilm conversion and digitisation through our specialist staff with expert knowledge.

We also have a dedicated in-house processing and duplicating laboratory for conversion, film reformatting and the only diazo cutting and striping facility in the UK, incorporating the Ozaphan™ range of microfilm diazo and chemical products.

Content Management Solutions

Genus provides a suite of powerful content management tools, including solutions for document management and software that is geared to empower asset management.

Document Management

LiveDocs

Live Docs is an innovative and flexible tool that supports an organisation's digital archiving and management of documents, regardless of its business profile. The main goal of the system is to store business documents digitally in a safe, easily accessible place and organise them in such a way that access and retrieval to them is as easy as possible - all this within a standard web browser window.

Digital Asset Management

capture™

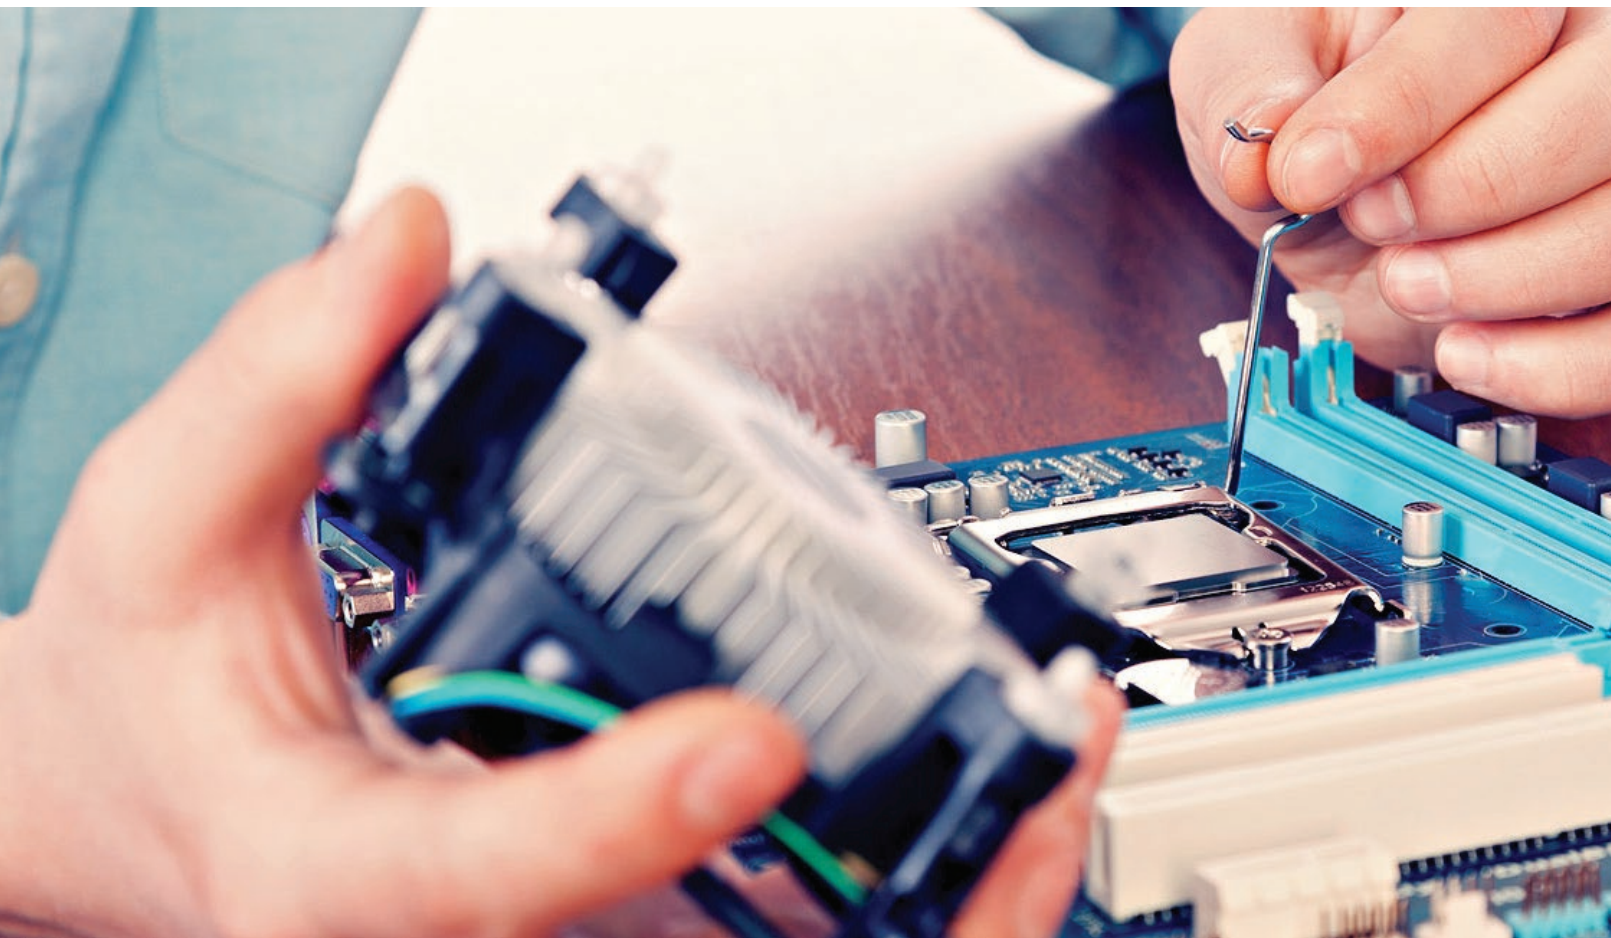

Capture provides a centrally served web based system for all your digital assets whether they are photos, documents, video, audio, design, logos or presentations through robust, secure and future-proof technology.

Technical Support

Genus has professionally trained and experienced equipment engineers based throughout the UK. From our advanced workshop facilities at our headquarters in Warwickshire we can offer coverage throughout England, Scotland, Wales, Northern Ireland and the Republic of Ireland.

We offer service contracts, ad hoc call outs and warranty coverage on a large range of micrographic and scanner equipment. Flexibility and responsiveness are the keys to successful service. Our contracts can be tailored to suit individual needs and business objectives.

- Tailored or Standard Maintenance Contracts
- Time and material calls on an Ad Hoc basis
- Swap out and return to workshop
- Loan or rental equipment
- On site based service-engineer
- Repair of older or little used equipment
- Per click service contracts

Graphic Press

Genus deals with all aspects of the document life cycle and one of the fundamental steps is the design and creation of documents. We provide this through our Graphic Press division.

Graphic Press continues to evolve by implementing the latest design software and equipment.

Design

Our in-house graphic designers are experienced in dealing with small to large clients across a broad range of industries offering new and exciting designs.

Print

We offer any kind of paper or card printing from single colour business cards to large quantity runs of full colour professional brochures.

Web

With an understanding of web technology and a keen eye for design, we ensure your business is showcased professionally and affordably.
