ABOUT US

Ramson Packaging is a familyrun Packaging distributor and producer with more than 25 years' experience in the packaging industry.

We work with some of the best packaging manufacturers throughout the world, where we produce the finest packaging solutions for our customers.

Our production of bottles and jars is based in Slovenia and Poland, where we also provide a local service of mould making and decoration on our bottles.

We also have exclusive distributorship with some of the industriesleading manufacturers of Airless dispensers, pumps, sprayers, bottles and jars.

The products in this catalogue are carefully selected to meet the high standards of our customers, and are all produced according to ISO9001 quality management system.

Ramson's goal is to give our customers high quality, unique and flexible packaging solutions, with the best service and support on the market.

OUR SERVICES:

Design – Mould making – Production – Decoration – Support

AIRLESS INFORMATION

QUALITY

- All our airless dispensers and jars are produced according to ISO9001 quality system.

AIRLESS FEATURES

- An airless package is a non-pressurized system, combining a mechanical pump with a filled and sealed container - completely free of air - that allows a consistent dosage of a product to be dispensed air-tightly and without any air return.
- With an airless system, the pressure that forces the product out is created mechanically, and no air is allowed into the product container. This protects the product from contamination and lengthens the overall product life, particularly for natural/organic and or highly sophisticated formulations. Airless packages are suitable for all kinds of textures, such as fluids, liquids, creams, gels and pastes and offer several advantages over other types of packaging including a stellar evacuation rate of more than 95%. fewer pumps to prime, precise, metered dose dispensing and superior product preservation.

* Evacuation rates vary depending on product viscosity

- No evaporation
- No oxidation
- No desiccation
- No UV degradation
- No material interaction
- 360 degree actuation
- More than 95% evacuation

PLASTIC MATERIAL

PMMA : High transparency, can not be used in direct contact with liquids. Used for airless and jars with inner bottles/jars.

AS : High Transparency, can be used in direct contact with liquids. Often used as single walled airless and jars.

PP : Semi transparency, can be used in direct contact with liquids. Used as single walled airless and jars, but also as inner bottles/jars in double walled airless/jars.

DECORATION

- Silk Screen Printing
- Hot Stamping
- UV Metallization
- UV Spraying
- Soft Touch (Rubber Finish)
- Frosting
- Aluminum Anodizing
- Injected Colour
- Gradient colour

DECORATION POSSIBILITIES

All parts of the airless dispenser can be decorated as per your preference.
