

**Perfect combustion!
Easy to clean!
Strong firepower!
Less clogged!**

[Dream of complete combustion]

Eco-friendly Burners

1. Product introduction : Burner

<p>Product Image</p>		
<p>Product Name</p>	<p>Single Fire Burner</p>	<p>Double Fire Burner</p>
<p>Efficiency</p>	<p>30% of gas charge decreased 70% of carbon monoxide generation decreased 10% of cooking time reduction Ceramic speciality coating for rust prevention Prevention of turn off the gas by overflowing</p>	
<p>Patent</p>	<p>Registration of a patent / Design patent application / Acquire A of patent grade report</p>	
<p>Consumer Satisfaction</p>	<p>Very satisfied</p>	<p>Very satisfied</p>
<p>Durability/Lifespan</p>	<p>Very satisfied / Semi-permanent</p>	<p>Very satisfied / Semi-permanent</p>

2. Feature : Detached the burner's cover and body

Easy to detached the burner's cover and body

2. Feature : Prevention of turn off the gas by overflowing

Overflowing doesn't affect firepower!

2. Feature : Decreasing carbon monoxide

Perfect combustion decreases carbon monoxide!

2. Feature : Easy to clean

**To wash a detached cover
would be done for cleaning!**

3. Various Patents

5. Advantages and Technologies

1. Ceramic coating for rust prevention

- Other burners can use less than 6 months : Our product can use more than three years by our technical know-how

2. Prefect combustion : maintain blue flame

- Imperfect combustion occurs by rust and overflowing water : Maintain red flame
- 70% of reduction to occur imperfect combustion CO (Carbon monoxide, a reason of lung cancer)

3. Strong firepower

- Resolve a gas reduction type burner makes weak firepower

4. Detached burner's cover

- Burner's cover and body are detached so that they users can clean easily

5. Control flame height

- Flame height can be changed by cooking utensils' heights

- **To energy conservation decreases not only the gas charges, but also prevention of your health.**

Thank You!
