# Mangra

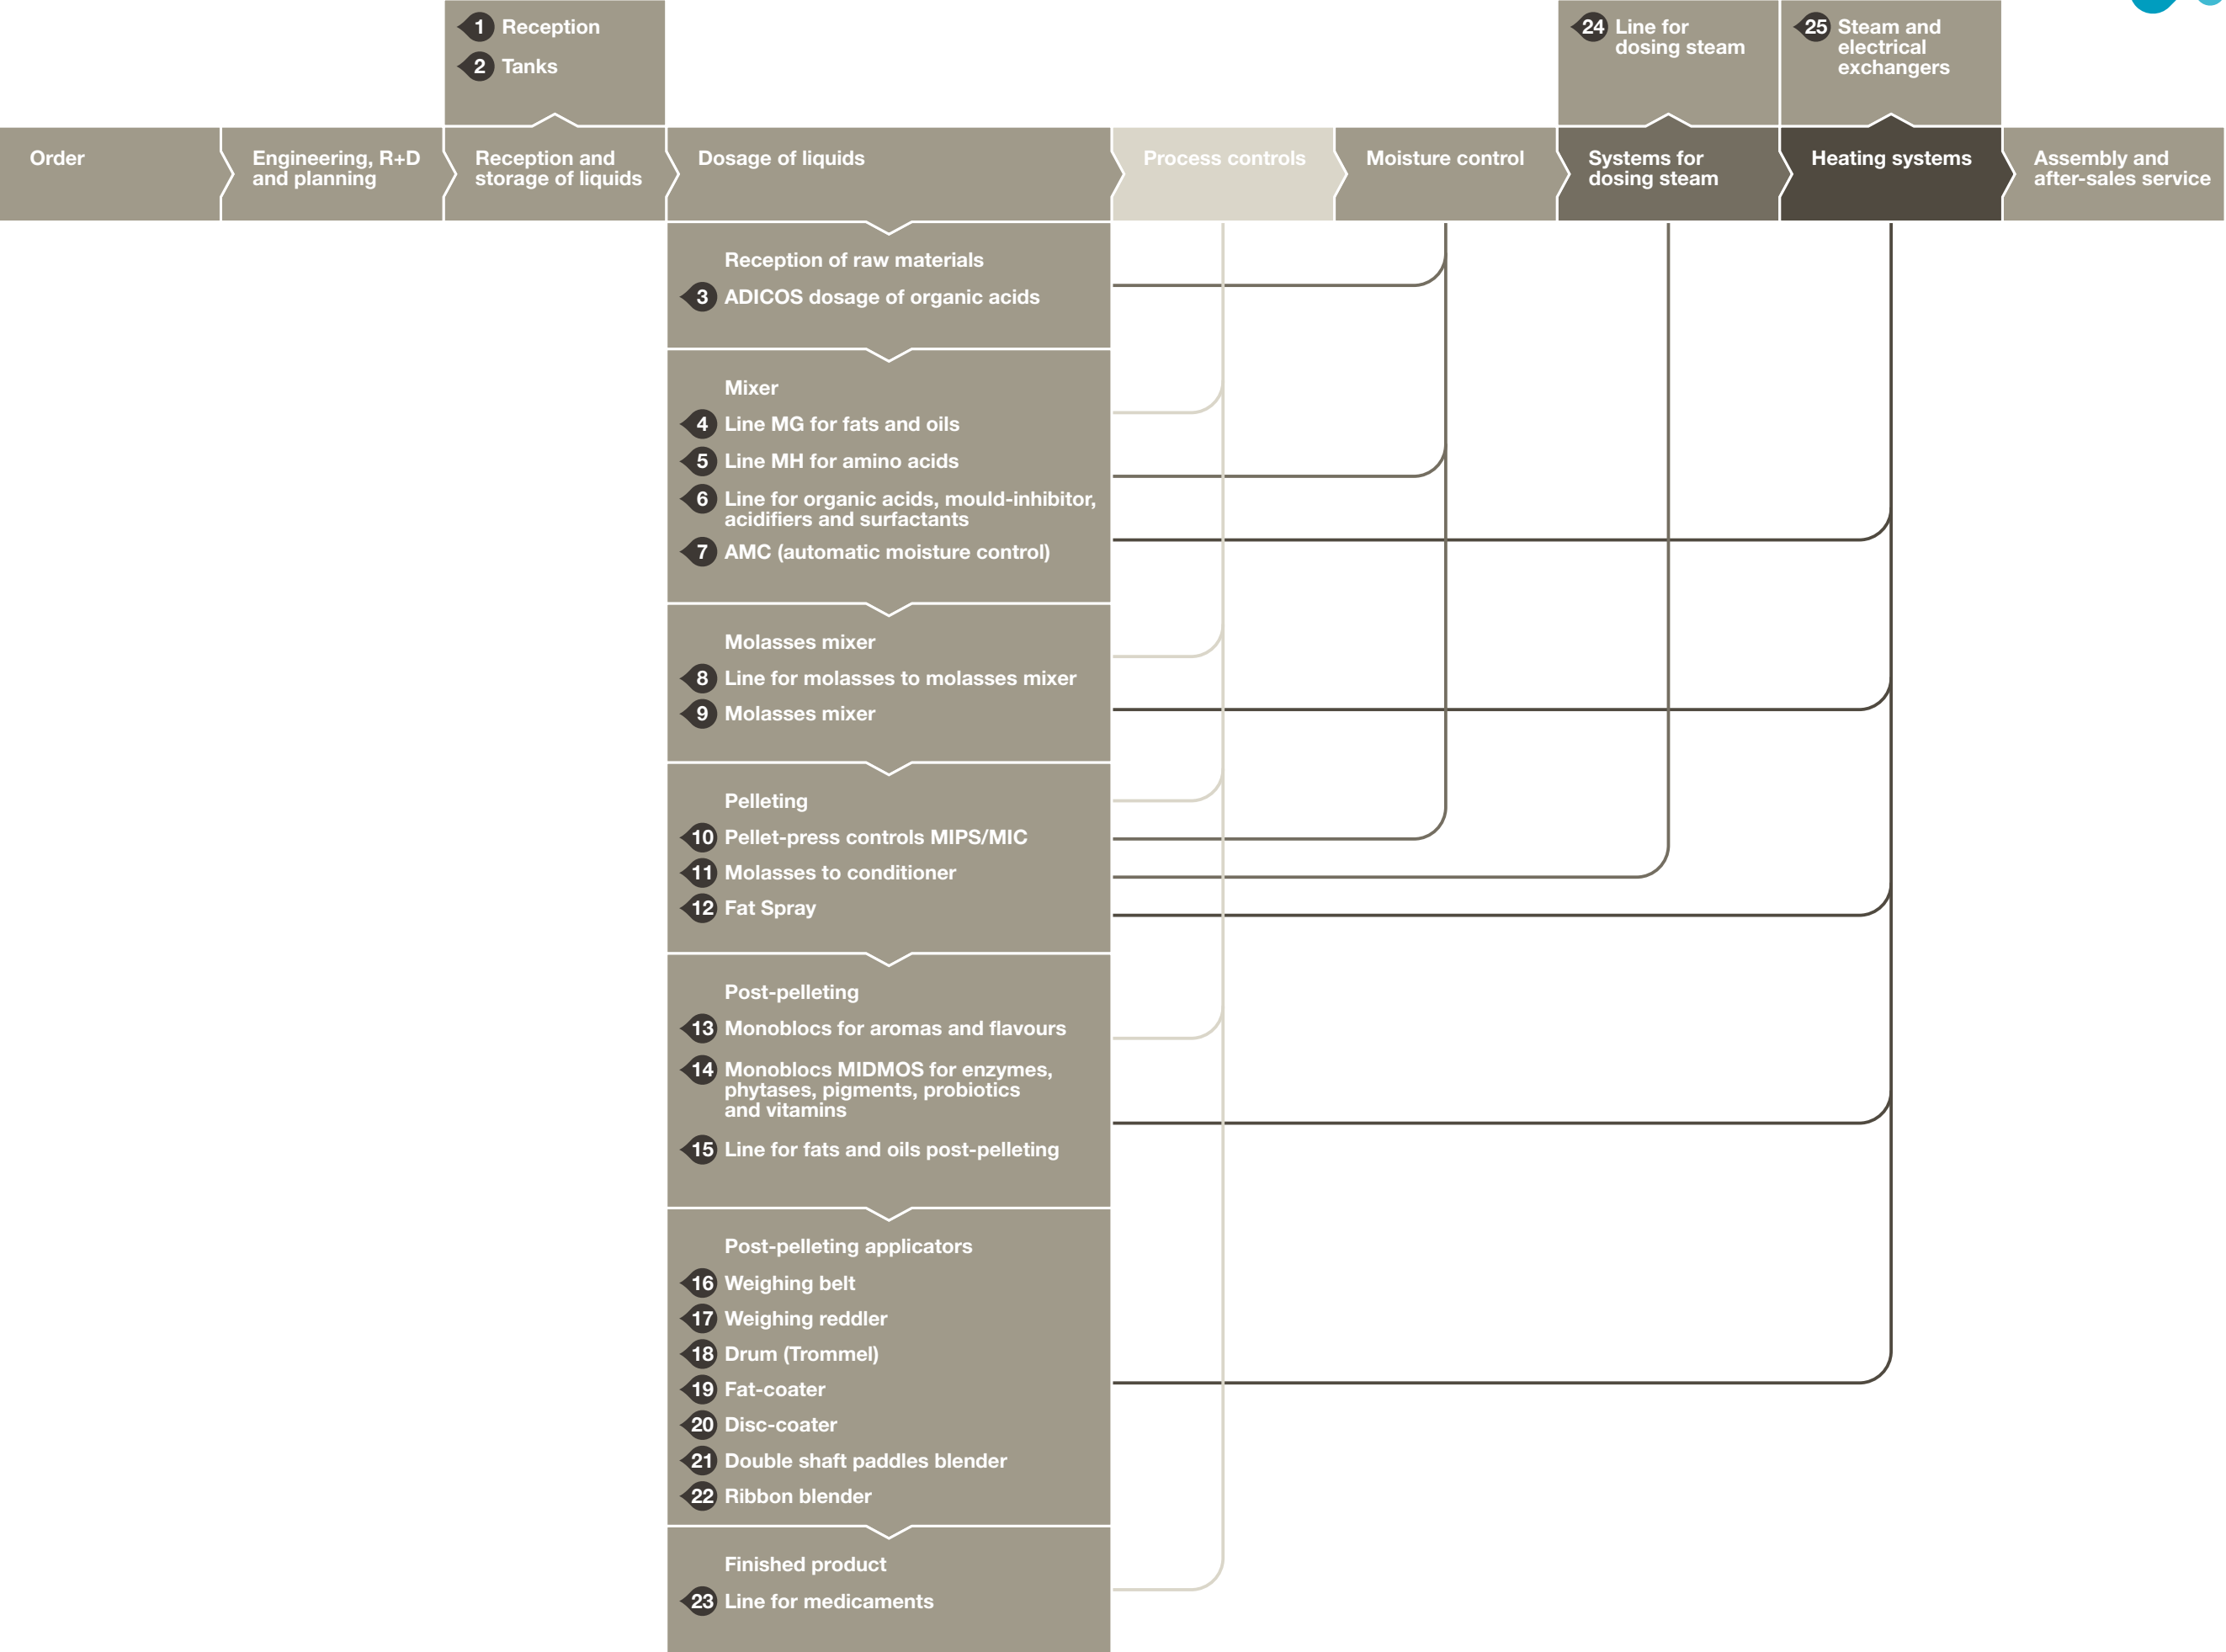

## Mangra, an engineering brand

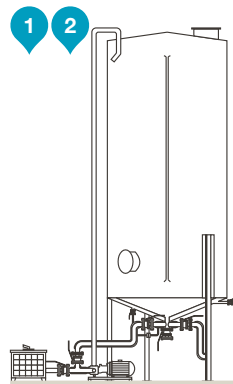

**We are an engineering company with a wide experience in agribusiness (feed-mills) and agrifood installations. We are specialists in technology, machinery and installations for the animal feeding industry.**

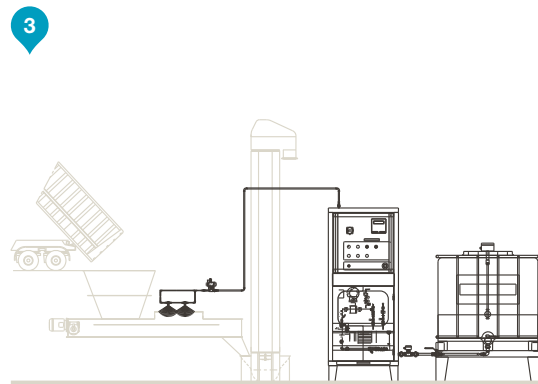

For the last 25 years we have been creating a group of installations and automatic controls in order to facilitate the usage of the wide range of essential liquids used in all formulations or recipes for the production of compound feed.

At **Mangra**, we maintain leadership positions through research and innovation, for that reason we are pioneers and leaders in the area of liquid dosage and process controls for feed-mills.

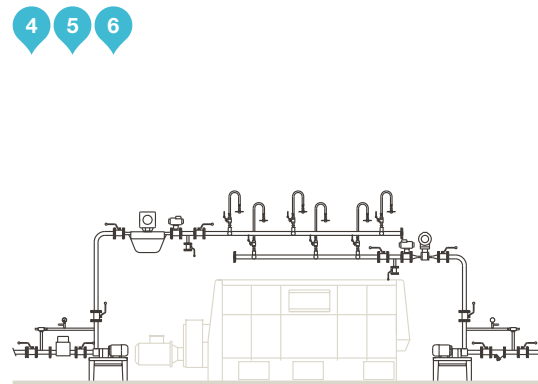

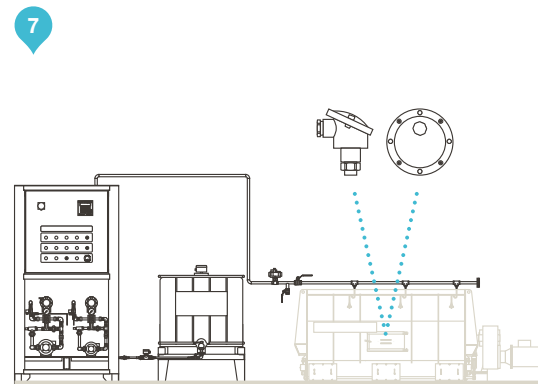

Reception.  
Tanks.

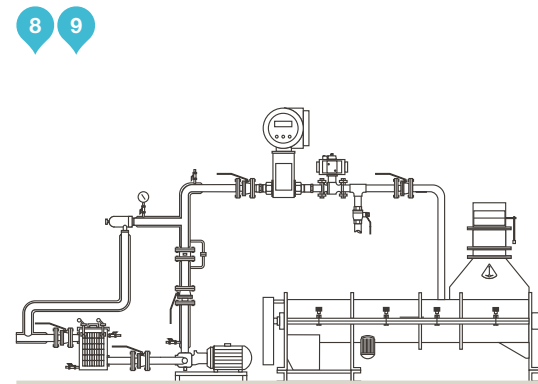

ADICOS dosage of organic acids.

Line MG for fats and oils.  
Line MH for amino acids,  
acidifiers and surfactants.

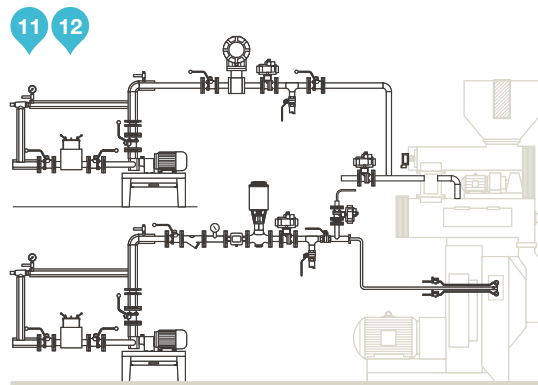

AMC (automatic moisture control).

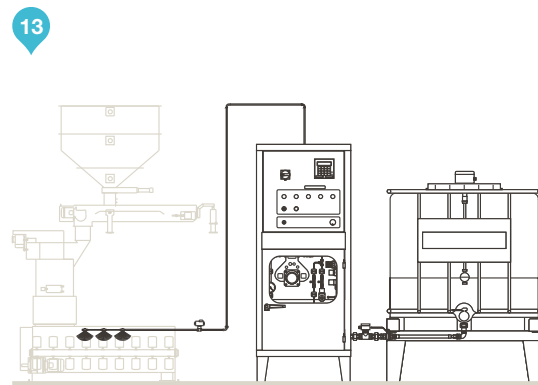

Line for molasses to molasses mixer.  
Molasses mixer.

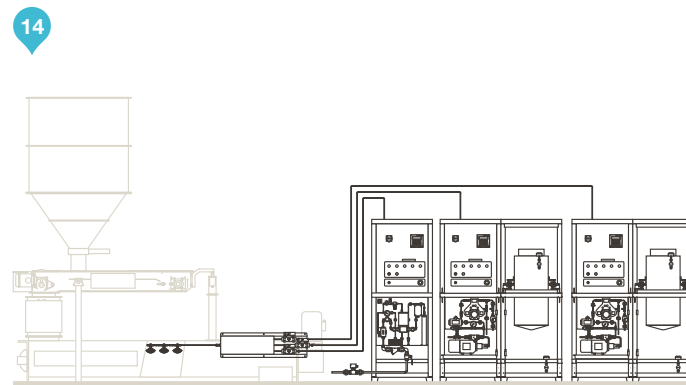

Pellet-press controls  
MIPS/MIC.

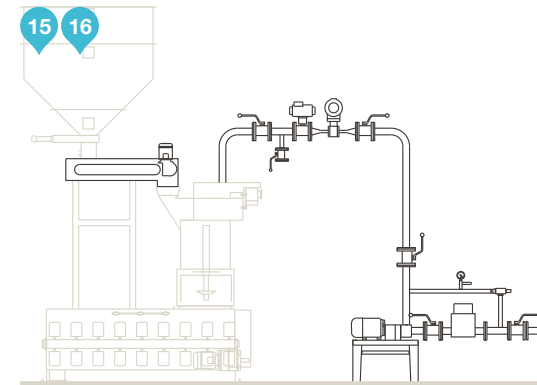

Molasses to conditioner.  
Fat Spray.

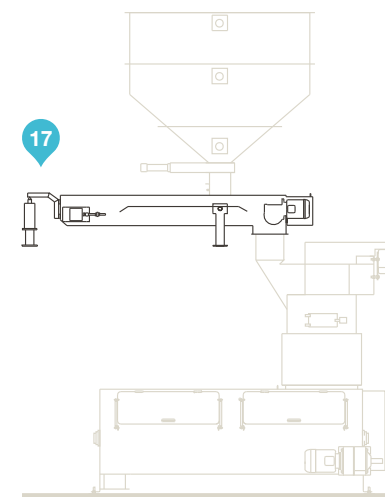

Monoblocs for aromas and flavours.

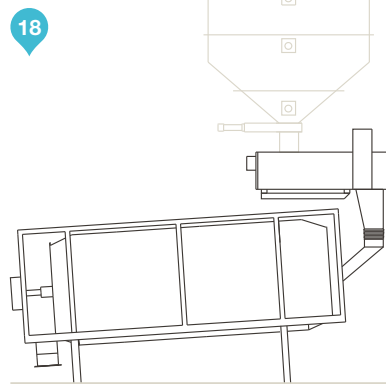

Monoblocs MIDMOS for enzymes, phytases, pigments,  
probiotics and vitamins.

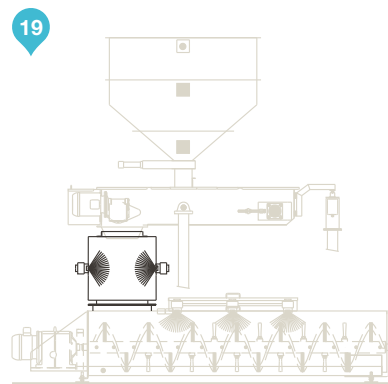

Line for fats and oils post-pelleting.  
Weighing belt.

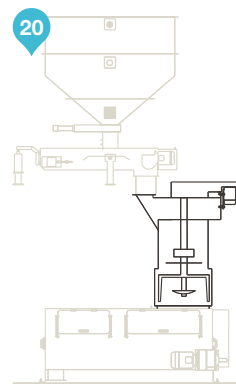

Weighing reddler.

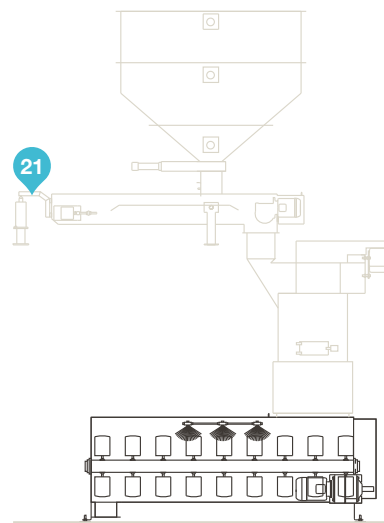

Drum (Trommel).

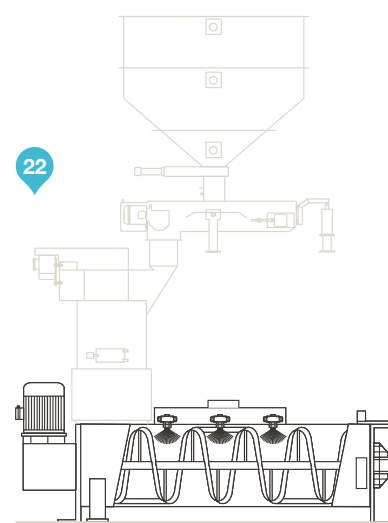

Fat-coater.

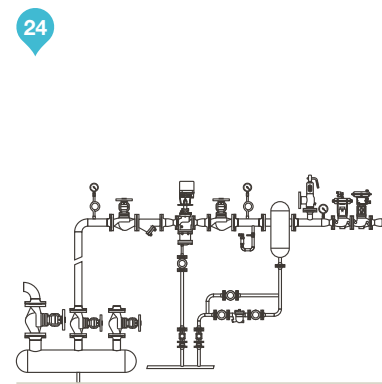

Disc-coater.

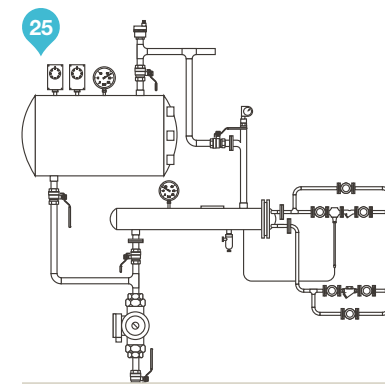

Double shaft paddles blender.

Ribbon blender.

Line for dosing steam.

Steam and electrical exchangers.
