CREATIVE CHILDREN CAN CREATE A HAPPY WORLD

The creative learning program SIMPLOCK for our child

We are living in a world where humans, plants and animals coexist, but it is obvious that many changes have been made by humans. That is why humans are important, especially children who are the protagonist of the future. We invest in children's education to make the world better. This world is going to be a much better place if children grow righteous, wise and creative.

ISPACE, a corporation established in 2015, is engaged in business related to children's education and industrial specialty paper. Since education field is our core business, we are constantly striving for intelligence development of all children around the world.
Features of Simplock

Safe to use
- Simplock is KC certified to be harmless to human body and suitable for child use. Simplock also received the CE certification, a more stringent European safety certification.
- Both development and manufacturing are done 100% in Korea. You don’t have to worry about product safety as Simplock is insured for product liability.

Original design
- It is an original design unique in the world. The form of the individual parts, the connecting method, and the relationship between the parts are all original and a number of patents and designs are registered as well as PCT application and US and Chinese patent applications.

Easy to use
- It is easy to use for all ages with a simple assembly method of insertion to connect and snapping to detach.

Mathematical structure
- Parts can be stacking, connected side-way and diagonally. You can create mathematical models such as fractal shapes and Fibonacci sequences with these basic structural characteristics and mathematically precisely calculated sizes.
