LANDSAVER

LANDSAVER 18EC

ORGANIC AGRICULTURE

NATURAL ORIGINS

LANDSAVER 18EC IS MADE FROM THE SPECIAL ACTIVE INGREDIENT EXTRACTED FROM THE NATURAL CINNAMON ESSENTIAL OIL AND OTHER NATURAL INGREDIENTS.

Cinnamon Essential Oil:

Cinnamaldehyde, the main ingredient of natural cinnamon essential oil has good effects on treating nematodes, fungus and control insects which are able to transmit diseases over crops.

NATURAL ORIGINS

Paraffin Oil:

Prevent respiratory circulatory of the population of harmful microorganisms, kill insect eggs; prolongs the use time and increases the effect of the drug.

Castor Oil:

Extracted naturally, causing surface diffusion, helping to penetrate deeper and wider, enhance the effect of killing bacteria, fungus harmful.

**LAND
SAVER**

FUNCTION

The active ingredient in LANDSAVER 18EC will be osmotic through the nematode's skin, isolate and decay nest nematodes. Prevent the movement of nematodes, depress and paralyze the nerve system.

At the same time, it can destroy the harmful fungus and bacteria. And helping the beneficial microorganisms thrive. In addition, LANDSAVER 18EC has effect to control other insects which are able to transmit a diseases over crops. At this time, the root system will be recovered and thrived grown.

Applied to Organic Agriculture
according these standards:

BENEFITS

- Increase productivity and quality of crops.
- Save on investment costs, fertilizer, pesticides.
- Help to produce high quality agricultural products that meets the standards.

LANDSAVER 18EC - Bio pesticide:

- Meet and satisfy high demands of farmers in modern agricultural production.
- Do not make the land degraded, hardened, help to improve soil.
- Used for treating seedlings, treating soil to prevent diseases.
- Prevention of quick wilt and slow wilt in crops (black pepper, etc.).

HOW TO USE

LANDSAVER 18EC is easy to use: watering, direct spray, direct irrigation, sprinkler irrigation, drip irrigation, sprinkler irrigation. Can be used in conjunction with other fertilizers and pesticides, **except for products containing: Strong acids, strong alkalis, copper, lime, sulfur.**

DOSAGE

OBJECTS	DOSAGE (Little / hectare)
Coffee Tree (1 - 3 years)	Use 15 liters of LANDSAVER 18EC mixed with 4,000 - 6,000 liters of water, irrigated for 1 hectare, irrigated around the root.
Coffee Tree (above 4 year)	Use 25 liters of LANDSAVER 18EC mixed with 4,000 - 6,000 liters of water, irrigated for 1 hectare, irrigated around the root.
Black Pepper (1 - 3 years)	Use 10 liters of LANDSAVER 18EC mixed with 4,000 - 6,000 liters of water, irrigated for 1 hectare, irrigated around the root.
Black Pepper (above 4 year)	Use 20 liters of LANDSAVER 18EC mixed with 4,000 - 6,000 liters of water, irrigated for 1 hectare, irrigated around the root.

OBJECTS	DOSAGE (Little / hectare)
Carrot (Vegetable & Flower)	Use 2 liters of LANDSAVER 18EC mixed with 500 liters of water, irrigated for 1.000 m ² , irrigated around the root.
Soil Treatment	Use 2 liters of LANDSAVER 18EC mixed with 500 liters of water, irrigated for 1.000 m ² .

- Do not spray directly on leaf of flower, it is recommended to irrigate water after.
- Shake the bottle well before using.

“... our coffee farm has nematodes on many years, the crops have yellow leaves disease and the productivity of them are so low. I already used many kinds of pesticide, but we can't still see the affection of them. However, we started to use LANDSAVER 18EC two years ago. It help reduce the nematodes infection. Our crops have thrived grown and productivity becomes higher. Thank you for bringing us a good product...”

Mr. Tien, Duc Trong District, Lam Dong Province, Vietnam

“... my friend introduce to me about LANDSAVER 18EC. I used to treat the soil before planting in small area. Then I compare to the old way, I found this way is more effective.

LANDSAVER 18EC is bio-pesticide, so using it in greenhouse will be better for our health. Moreover, the cost for using LANDSAVER 18EC is cheaper than disinfecting soil by chemicals.

I will apply LANDSAVER 18EC for whole farm...”

Mrs. Phuong, Van Thanh Village, Dalat, Vietnam

“... before I used many kinds of pesticide to handle the nematodes disease, but it can't still have the result as I expected. Carrots are always deformed by nematodes. After using LANDSAVER 18EC, I was very surprised because the nematode diseases were controlled. And the number of deformed carrots greatly reduce than the previous crops...”

Mr. Hai, Duc Trong District, Lam Dong Province, Vietnam
