Soft and mild hair dye **CANDYSPEED**

“Hair cosmetics company with the sense of strong responsibility for rich and beautiful hair”

Okay in one minute after applying hair evenly!

CANDY SPEED 1 MINUTE DYE

To whom sparing the dyeing time!

To whom concerning damages of hair!

To whom wanting easy and convenient dyeing!

Candy Speed One Minute Dye made with a concept of soft and mild dye is an ordinary product. However, its quality is extraordinary.

At the moment when dye touches hair, it gives mild and soft feeling, and it is quick to finish dyeing. With natural plant extracts, there is no damages to hair and no stimulus to scalp. There is no smell, and even to users who suffers dandruff, the product does not generate dandruff. The product has a patent right that it makes a dye catalyst absorbed to cortex inner cuticular layer promptly to settle dye down evenly, and it enables to dye natural color with a short time.

Also, without adding Ammonia, as there is no pungent smell and eye-smart, you can enjoy the hair after cleansing soft and glossy : it is just Candy Speed Product.

Introduction of Company

CEO **JEON YEONGCHOON**

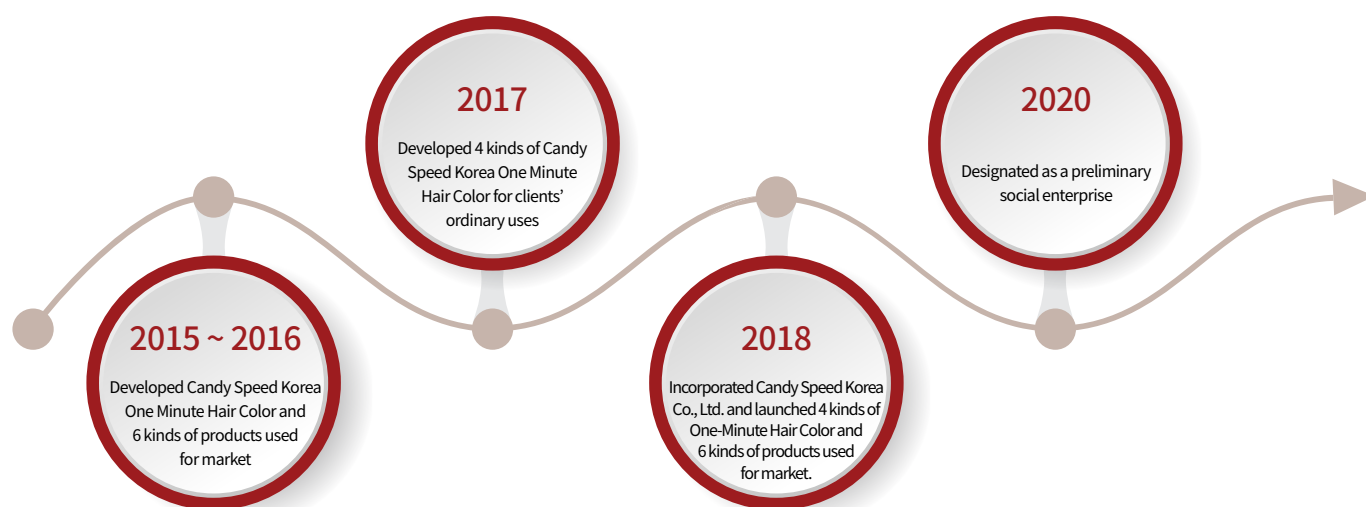

The ideology of Candy Speed is to promise the fact that the company will bear responsibilities for your healthy and beautiful hair.

Candy Speed makes innovative products that it takes only 1-2 minutes to gain wanted color of dyed hair and makes feel soft hair, without smell. We will proceed forward a valuable and beautiful life in the world, if we can do. The company will produce best quality product and create innovative business opportunity in order to realize our aims, and has business plan in detailed for it.

When modest people having great vision in mind endeavors diligently and sincerely, the result of success is more solid and affirmative. Candy Speed promises to assume responsibilities continually for customer's healthy and beautiful hair. Candy Speed, as one of leading cosmetic companies, will exert our efforts to make excellent products and the brand of our company known to customers in domestic and abroad.

We express our thanks to you for your love and encouragement and appreciate your constant interest and guidance. Thank you very much.

History of Company

Competitiveness of Candy Speed Products

Existing Hair Dyes	VS	Candy Speed
It smells, eyes are smarting, and color gets faded sooner.		Eyes are not smarting, as ammonia is not contained and with natural extract, it makes to sustain the color for a long period (2-3 months)
It takes much time to dye hair.		It is enough to dye with only 1-2 minutes, and hair absorbed catalyst being contained, it holds a patent enabling dyeing within short time.
Hair texture is hurt much.		As dyeing is speedy, there is little damages in hair and no irritation to scalp.
With dyeing, hair texture becomes stiff and fragile.		Our professional technology of protecting scalp and hair makes feel soft as velvet when washing dyed hair.

Strong Points

Stability

- Making the time of contacting dyeing agent and hair minimized, it decreases damages of hair.
- Not using ammonia, there is no smell of ammonia, and with natural extract such as Aloe Barabardensis Leaf Juice, it makes to experience a mild and soft feeling.

Rapid action

- Basing on a patent technology (compositions of hair dyeing agent), it makes dyeing agent absorbed to cortex inner cuticular layer promptly to settle dye down evenly, and only 1-2 minutes makes to dye with a wanted color naturally.

Durability

- Since dyeing, it maintains shiny hair without demineralization.

Convenience

- Mixes agent 1 and agent 2 in a one to one ratio and it is convenient to use as combing hair.

One of distinctions of Candy Speed Korea products is a rapid action. Existing products on the market takes approximately 20-30 minutes for dyeing, and hair exposed to harmful component for a long time is easily damaged. Basing on a patent technology (compositions of hair dyeing agent No 10-0633439), Candy Speed One Minute Hair Color makes dyeing agent absorbed to cortex quickly, and decreases the time of contacting dyeing agent and hair. Also, it is one of features shortening dyeing times to minimize damage of hair. In short, it may be said that most distinction is to minimize the time of exposing hair to dyeing agent.

Extracts from natural plants

With extracts from natural plants including Aloe Vera Gel and with nothing of ammonia, it gives mild, soft and composed feeling from the moment touching hair.
It is well-being products which makes consumers get out of recognition that dyeing agent is harmful chemicals.

| Composition of Product | | Kind of hair color |

The product is composed of agent 1 (hair-dyeing agent), agent 2 (oxidant), manual, comb, vinyl cover, vinyl glove, with 4 colors of dark brown, natural brown, light chestnut and wine brown.

| Q&A |

Q. Is it possible to complete hair-dyeing within 1 minute?

A. Only one minute is enough after applying dyeing agent evenly to whole hair. As “hair penetrating catalyst”, a patent technology of Candy Speed, is contained, the dyeing agent is absorbed to hair epidermis quickly, deeply and evenly. So, dyeing is sustained more beautiful and longer time.

Q. Is there not stain or adverse reaction in skin?

A. Even if stain gets in the skin, as it needs to do shampoo sooner, stain is easily wiped out. Also, as special natural materials which prohibits skin damages is contained, it shows excellent effect of protecting skin in comparison to other dyeing agent.

Q. Is there other particular method of using dyeing agent?

A. It is possible to do hair dyeing likely doing the way of having shampoo. If there is plenty of gray hair, it recommends to apply dyeing agent from the part of hair braided behind the ears.

Q. Does it affect damages to hair more?

A. As damages of hair lies mainly to chemical action due to leaving dyed hairs alone for a long time, the shorter dying time is, the less hair damages is. Also, as the products contain hair-protection materials which prohibit skin damages (particular stuff such as Aloe Vera Gel, Ceramide, Human hair Keratin), hair damages is gotten minimized.

Q. If the time of leaving dyed hair alone exceeds or less than one minute?

A. The case is same as ordinary dyeing agent. When the time of leaving dyed hair alone for less than one minute, the hair color gets thin and the period of maintaining dyeing state gets shorten. On the contrary, when the time of leaving dyed hair for more than one minute, hair color gets thick but, after 3-4 minutes elapsed, it sustains same color.

Test of Skin Stimulus and Examination of Harmful Materials

Testing of skin stimulus targeting 30 persons by Cosmetics Clinical Research Support Center of Semyung University attained the result that the product does not give stimulus to skin.

Test name	Test of safety without stimulus when Candy Speed One Minute Hair Color Dyeing Agent I applied to skin
