CHEMICAL PRODUCTS FOR WATER AND WASTEWATER TREATMENT

For the perpetual cycle of water

www.feri-tri.gr

Plants & soil

Chlorosis prevention
Iron substitution
Plant nutrition with nitrogen
Land remediation

Industry

Additives and intermediates
Raw materials for lead acid batteries
Picking and collection
Gas absorption and desorption
NOx treatment
Heavy metals removal
Disinfection
Chromium reduction
Process foam prevention
Contamination prevention
Discoloration
PH regulation agents
Preservatives
Antioxidants
Slimes dewatering

WE | provide experience
support the environment

Water & wastewater

Municipal waste water treatment
Industrial sewage treatment
Drinking water treatment
Process water treatment
Swimming pool water treatment
Boiler and cooling water treatment
Desalination and water reuse
Disinfection
BOD and COD removal
Color removal
Phosphorous removal
Sulphide and sulphate removal
Heavy metals removal
Foam control
Odor control
Solids removal
Emulsion breaking
Sludge treatment

WE | know how
offer quality

Animals

Odor control
Feed additives
Anemia prevention
Disinfection

Hotels

Swimming pool water treatment
Maintenance of restaurant pipe system
Maintenance of hotel pipe system

For more than 30 years FERI-TRI SA produces, markets and distributes chemicals for water and wastewater treatment and other applications.

Our main activity is the production of iron and aluminum flocculants and the trade of other specialized solutions and products.

All our products comply with European regulations and are registered with the European Chemicals Agency and the National Register of Chemicals while our activities are organized in accordance with international standards.

We also offer the following chemical related services

- Consultation and advising
- Transport by ADR
- Laboratory tests of chemicals
- Removal and recovery of wastewater

ADR

ECHA
EUROPEAN CHEMICALS AGENCY
