EXVIEW BLIND SPOT CAMERAS

EXVIEW blind spot cameras give you an extra eye for improved visibility and vehicle efficiency.

EXVIEW blind spot cameras eliminate your car's dreaded blind spot while driving.

A quick and simple installation

Connect the monitor cable to your vehicle's USB port and then attach the camera wherever you need, such as the bottom portion of side view mirror.

Hi-definition color view

The driver's monitor view is never obscured by rain, snow, fogged, or tinted windows.

Wide viewing angle

EXVIEW blind spot cameras' extra-wide viewing angle of 100° to 120° helps avoid car accidents

Fully waterproof camera

EXVIEW blind spot cameras have an extra-wide viewing angle of 100° to 120° that helps better see the side and rear view, thereby reducing fatalities when changing lanes, moving backwards, and involving in a collision.

Easy installation method

1. Place the monitor on the right and/or left side of your vehicle's dashboard.
2. Connect the monitor cable to your vehicle's USB port.
3. Attach the camera to the bottom portion of side view mirror (the camera view should be the same as the side view mirror).
4. Note that the camera can be installed at other places such as the front and/or back of your vehicle.
