Brand Story

Decojin is an ASA resin-based deco Sheet brand developed by Jinyoung LDM. It is a Global brand praised both at home and abroad.

Decojin

Decojin is an ASA resin-based brand developed by Jinyoung LDM. Jinyoung LDM guarantees its quality and performance.

The brand has quality eco-friendly products developed by Jinyoung LDM, provided to furniture and construction companies at home and abroad.

It can be applied to highly functional products like cars and home appliances. It can be used for a variety of purposes.

ASA Material

ASA resin is highly weather-proof and its mechanical properties and exterior rarely warp. It has acquired eco-friendly labels and certifications and passed large chamber tests. It is an officially certified product.

Acrylate Styrene Acrylonitrille

ASA (Acrylate-Styrene-Acrylonitrile) resin is a copolymer of acrylic rubber and SAN. It can withstand extreme conditions. It is used for finishing products. The ASA Deco Sheet is produced with ASA resin co-developed with LG Chem. It is supplied to kitchen furniture and construction companies in Korea. It is used for highly functional products like cars. It is weather-proof and has mechanical properties and an exterior that rarely warps.

Special Feature

UV safety / weather-proof

Usage minimum UV stabilizer and safe from environmental issues. Its property and exterior rarely warp even with exposure to the outdoors.

Highly rigid

Its mechanical properties such as its rigidity is superior and it can withstand shock.

Chemically-protective

It is highly solvent-resistant. It can be applied to a variety of purposes.

Processing

It can be used in various parts of processes, like pressing, injections, and calendaring.

ASA Material

ASA resin is highly weather-proof and its mechanical properties and exterior rarely warp. It has acquired eco-friendly labels and certifications and passed large chamber tests. It is an officially certified product.

Eco-friendliness

It does not generate formaldehyde (HCHO), plasticizer, heavy metal, or volatile organic compound. It has acquired an eco-friendly label and environment mark. It has passed large chamber tests. Based on large chamber tests TVOC (0.25 mg / m³) : ASA application test result : 0.049 mg / m³

Based on large chamber tests TVOC

0.25 mg/m³

Self Test

0.049 mg/m³

Applicable Products

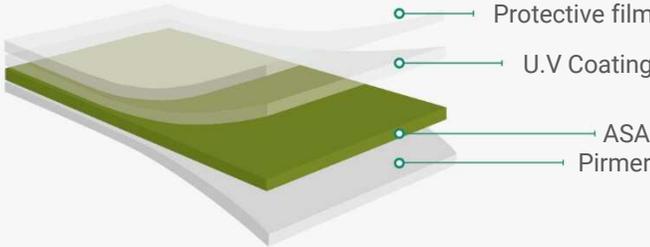

ASA Sheet can be applied to furniture surface material for lamination and edge finishing material with a variety of designs.

ASA Material

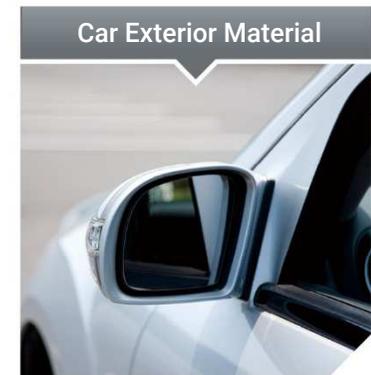

ASA resin is highly weather-proof and its mechanical properties and exterior rarely warp. It has acquired eco-friendly labels and certifications and passed large chamber tests. It is an officially certified product.

Structure

Thickness	Width	Purpose
0.50 mm	1,340	Membrane
0.40 mm	1,260	Overlay
0.25 mm	1,260	Wrapping

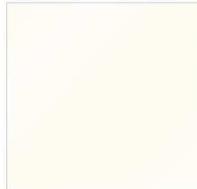

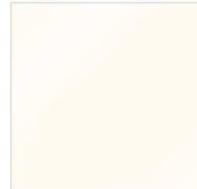

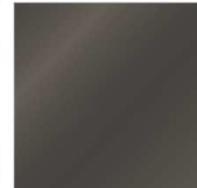

Application Example

High-glossy

It is a glossy product thanks to the ASA surface which is highly glossed. By combing various designs and colors, it can be used to create an elegant interior. It is commonly used for doors.
