Moisturizing & regenerating skin base

Efficacy of human adipocyte culture fluid extract

Efficacy of human adipocyte culture fluid extract

Various growth factors that are perfect for **your skin newly born through regeneration.**

- Complexation of essential elements for skin regeneration from outer skin to inner skin.
- Outer Skin(EGF,KGF) + Inner Skin(FGF,IGF,VGF)

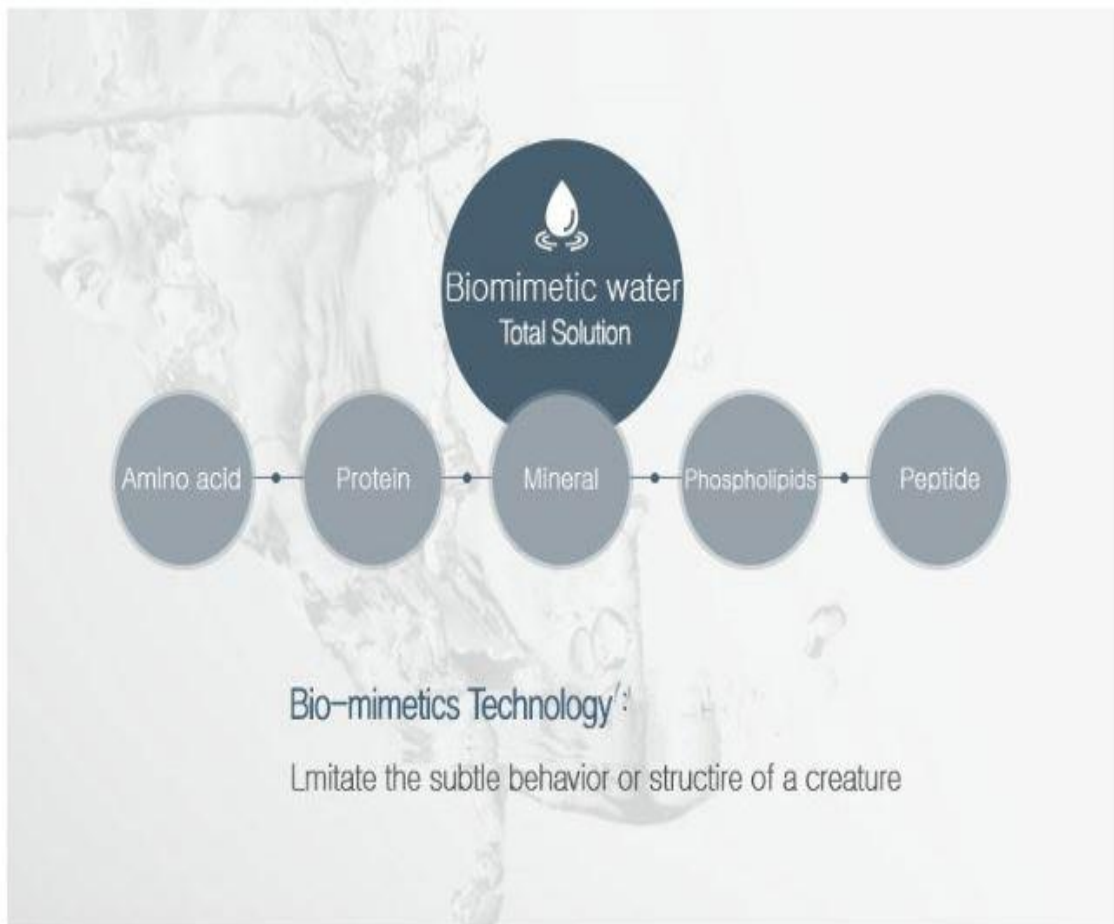

Growth factor = Polypeptide = Polymer

- Issue on stabilization in cosmetics
- Issue on Delivery to skin

Containing 77.97% of biomimetic water

BIOMIMETIC WATER

Increases the skin's moisture density from the inside of the skin through binding with cells, and gives elasticity outside the skin, a firm feeling of volume and moisturizing luster.

At the time of body fluid loss
 - thirst, nausea, headache, sick, etc.

Function of body fluid

- Maintain body structure and shape
- Provide the environment for cell metabolism
- Medium of material transport
- Solvents of intracellular chemical reactions
- Maintain body temperature

Body fluids: 60% of body weight

Extracellular fluid (20%): Body fluid exists in the space between blood and cell

Intracellular fluid (40%): Liquid in cell, mostly the organic matters

Composition	INCI	Features
Mineral Amino acid	Mineral Water	Form Intra/extracellular fluid Natural amino acid derived from green tea provides moisturizing and nutrition.
