GENERAL CATALOGUE

DINOX, S.L., founded in 1981, is a company dedicated to the design, manufacture, commercialisation and maintenance of industrial machinery and units which are leaders in the hygienisation sector (washing and drying) integrated into today's industrial applications.

We also design and manufacture complete lines for different products and processes.

Our human team, applying a policy of continuous improvement, investigates and develops various industrial hygiene units, such as devices and lines for various manufactured products and processes, in order to offer the best custom-made solutions for the requirements that emerge in production, preparation, handling and treatment processes.

We take as our starting point personalised projects and our customers' collaboration in order to meet the needs that arise in the present-day industrial world by means of a wide range of machines adapted to each requirement.

Years of experience in dealing with washing requirements endorse our know-how and enable us to offer an extensive range of highly competitive, safe, ergonomic and cost-effective machines, backed up by our own technical and after-sales service. We also design and manufacture machinery for manufacturing, handling and finishing food products.

We base our operations on the following aspects:

- Functional sustainability of machines ensured from the design stage
- Increased productivity, eliminating downtimes
- Continuous quality improvement
- Minimisation of risks
- Compliance with the currently applicable regulations
- Range with the best quality/price ratio
- Reduction of costs

Washing Tunnels

Complete lines

16

Sectors of application

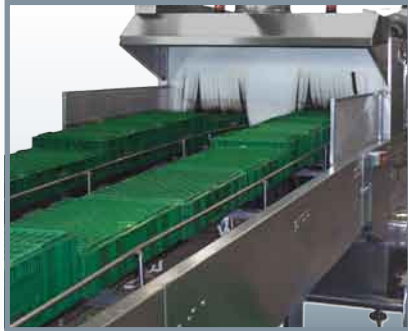

20

Compact tunnels for small and medium washing runs of boxes, trays, moulds and various pieces

Modular tunnels for medium and large washing runs of boxes, trays, pallets, "palot" containers, moulds and various pieces

Compact tunnels for high-power washing of “palot” containers, adaptable for washing boxes

Modular overhead-washing tunnels for large runs of boxes and trays

Compact cabinets for washing cans

Compact cabinets for washing and/or drying feeding bottles, cans and other utensils such as buckets, pans, etc.

High-performance cabinets for washing carts, perches, shelves, hams and sausages

Compact, high-performance cabinet for washing support carts and cage racks

High-performance cabinet for washing meat trolleys

High-performance cabinet for washing trolleys, drums and containers

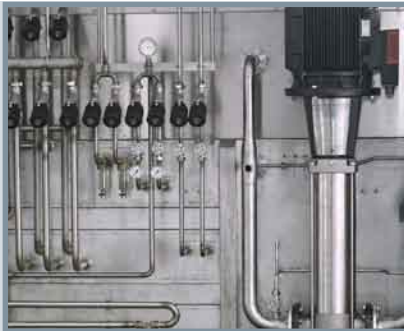

High-performance cabinet for washing tanks

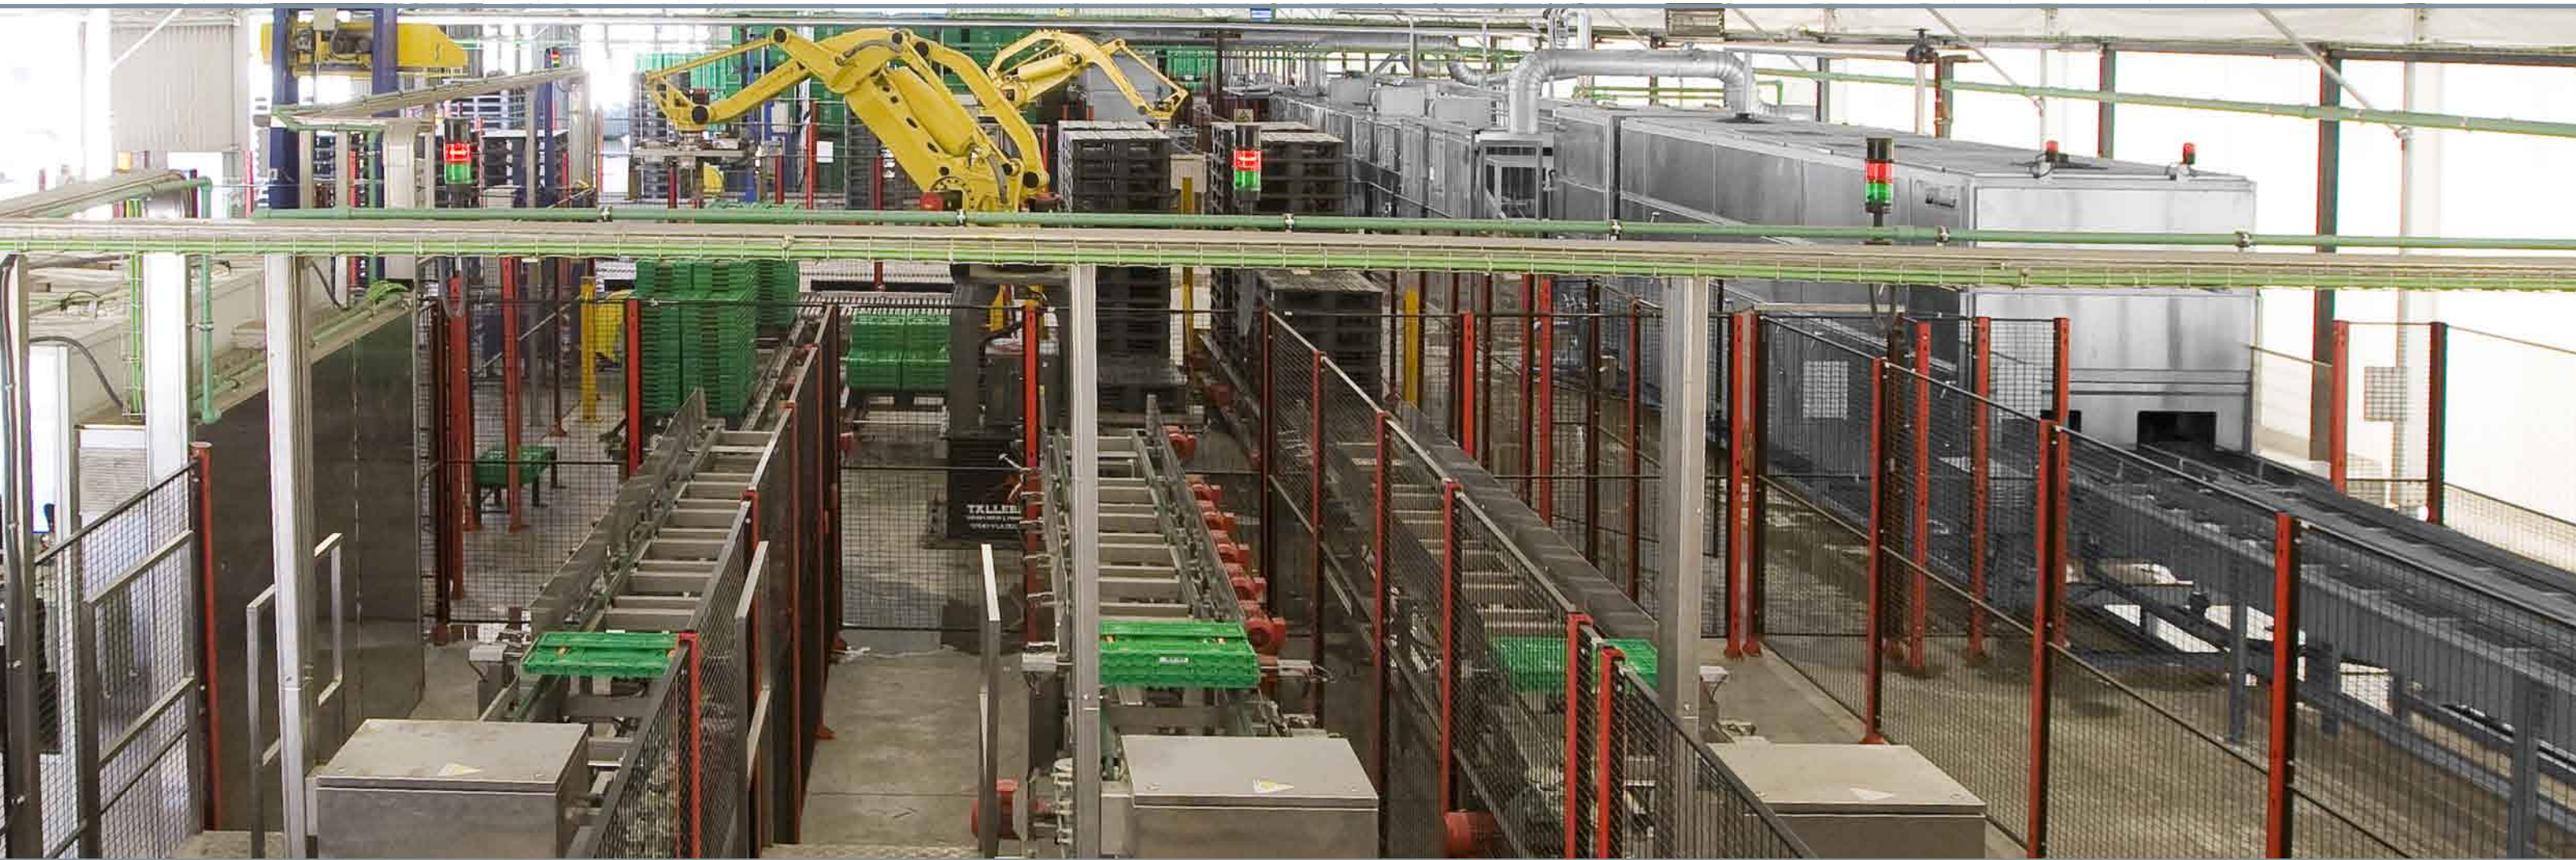

Modular tunnels for blowing and/or drying boxes, trays, pallets, "palot" containers, etc., that can be coupled to the washing tunnels
