Seoul Metropolitan Government has banned all single-use plastic bags in its public oces.

Plastic pollution has become one of the most pressing environmental issues, the conveniences plastics offer, however, led to a throw-away culture that reveals the material's dark side.

Umbrella wrapping machines

The microplastics are spread throughout the water column and have been found in every corner of the globe.

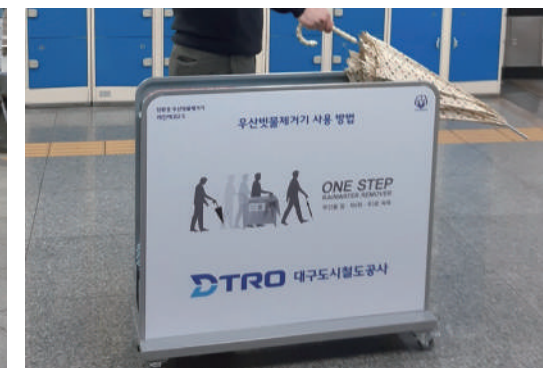

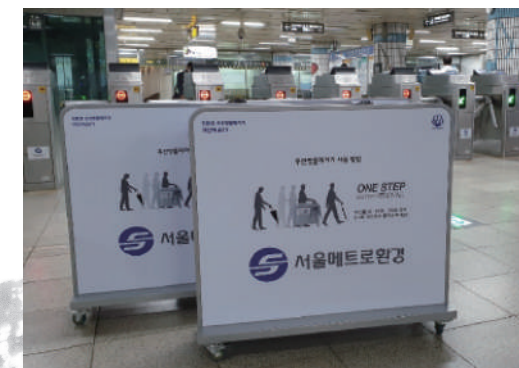

Most of wet umbrella bags are not recyclable as wet or dirty bags are too labor-intensive to dry and clean.

Seoul Metro, where hundreds of people use everyday, also banned the single-use umbrella wrappers and started using Eco Umbrella Dryer **RAINECO II S**. **RAINECO II S** was selected and supplied to Seoul Subway Stations by Public Procurement Service after the strict inspection and examination.

**Performance Verification**

More than 10,000 organizations and facilities in Korea are using **RAINECO II S**

## Key Features of RAINECO II S

- Patented Diagonal Shaped 3D Absorbent Pads
- 100% Polyester Customized Microber for Drying
- 36pcs 2400G Neodymium Magnets in the Pads

Registered a Korea Patent

Patent applied for  
China, Japan, USA, EU,  
India, Vietnam, Brazil

- Dimensions : 94(W) × 30(L) × 80(H) cm
- Weight : 28kg
- Body : Galvanised steel with stainless steel (304 grade) base
- Pads : High quality micro fibre attached by magnets  
(1set = 4pcs)

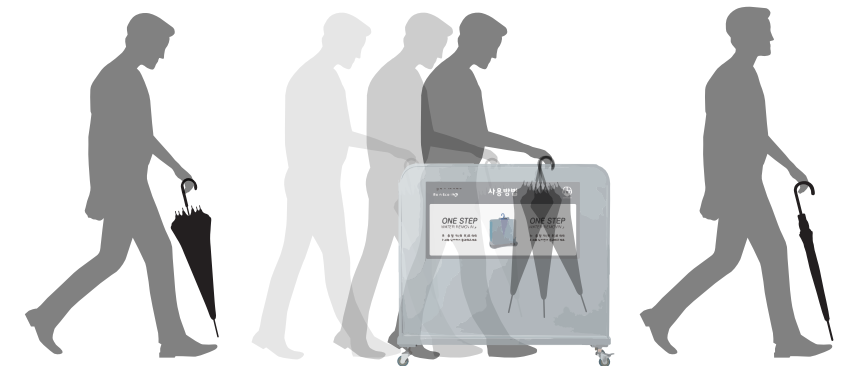

## HOW DOES IT WORK

Simply rub your umbrella several times  
inside the unit back and forth!

### Patent / Certificate / Test report

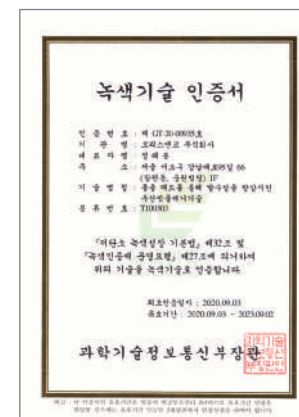

2020 Seoul Award

No. 10-2057182

Registered a Korea patent

Green Certification

ISO 9001 Certified

Anti-Corrosion Test Report  
(International Standard)

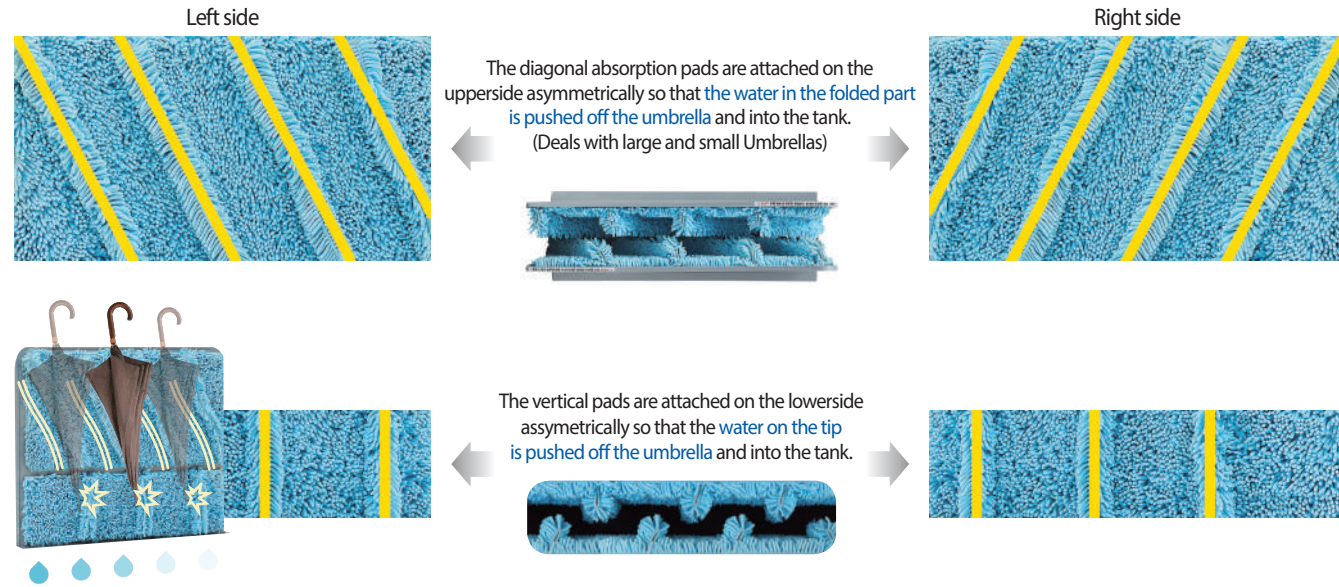

## Patented 3D absorption pad

Registered a  
Korea Patent

Filing a PCT (The International Patent System)  
Patent applied for China, Japan, USA, EU,  
India, Vietnam, Brazil

MORRIS&CO's micro fibre is 100% polyester which is able to absorb and repel water in a balanced way and dries quickly.

Micro bre for mass production  
(cleaning cloth)

Water Repellency 20% Absorption 80%

MORRIS&CO's miro bre  
(customized for umbrella dryer)

Water Repellency 50% Absorption 50%

**BODY COATING** Neutral Salt Spray Test (24h Flaking & Red Rust) **TEST PASSED** Anticorrosion test (International Standard)

Carefully crafted by our team of engineers  
to provide a range of ergonomic solutions for rainy days

- Specialized wheels with **directional brakes**.
- High-quality industrial wheels**  
→ silent and soft movement.

- The water drains into a container at the bottom of the unit (it can hold up to **8.5 litres**) and **no water tray required**.

- The pads are held onto the inside panels with 36pcs Neodymium magnets  
→ **easy and powerful attachment**
- Easy to remove and dry, you place them outside the unit and they **stick on and dry overnight**.

## GLOBAL BUSINESS

Exporting to 11 countries!

### Reviews from UK

The umbrella dryers are well made and solid units, whilst being easily portable. The branding option was excellent and they are a great visual addition to the reception area... These units only require emptying at regular intervals and require very little maintenance which ticks all the boxes for us.  
**Bryan Cave, Leighton Paisner LLP**  
Thank you very much for sending us the Umbrella dryer. As it's raining we are making full use and this way everyone in the building gets to practice how to use it. I will recommend the umbrella to other CBRE buildings as well; our tenants are happy with this innovative eco dryer

## GLOBAL ISSUE

MORRIS&CO's Umbrella Dryer introduced to overseas media!

Brazil

Summary : This invention is perfect for rainy days.

We all know the problem of dripping umbrellas in rainy days. It prevents the floor from getting wet and dirty and keeping people safe from slips on wet floors.

Source: Boamente, Brazil

Summary: Umbrella Dryer reduced the single-use plastics in South Korea.

South Korean government wants to reduce plastic waste. According to The Korea Herald, Seoul Metropolitan government has banned all single-use plastic bags in City Hall and its subway stations. The habits to use plastic umbrella wrappers in South Korea has made tons of plastic waste.
