About Winmate

Founded in 1996, Winmate Inc. is a pioneer in rugged computing technology. Winmate has provided business leaders worldwide with reliable, robust solutions for the most challenging industrial conditions for over two decades. From R&D to manufacturing to in-house testing, Winmate Inc. manages the entire product development process with ready-made products available for quick deployment. Today Winmate's innovative approach has helped countless enterprises at every level with equipment automation and seamless Industrial Internet of Things (IIoT) integration.

From the industrial display, panel PC, HMI, embedded systems to rugged mobile devices, Winmate caters to industries ranging from transportation and logistics to marine and military, railway, oil, and gas, and provides customization services to create a unique solution for specific customer requirements.

The Winmate Difference

Innovation and Ruggedness

With innovation and ruggedness, our products are designed to meet the requirements of vertical markets' environmental standards.

Engineering Intelligence

We are committed to maintaining the highest standards in engineering excellence to ensure our products deliver reliability, durability, and optimized performance.

Quality Commitment

Quality assurance and entire engineering processes are conducted in-house. It is why we invested significantly in our state-of-the-art testing facility with additional global support.

“
**INNOVATIVE
TECHNOLOGY FOR
OPERATIONAL
EXCELLENCE.**
”

Efficiency

Our team is committed to efficiency and maintaining the shortest possible development cycles. The whole development process is conducted in-house to achieve the market advantage in speed and quality from design to testing.

Reliability

Reliability, service, and support are part of our foundation. Every product scrutinizes industrial standards testing to verify electrical, mechanical, thermal, and firmware design performance.

Customized Solutions

Years of experience allow Winmate to offer customized solutions for different applications.

From product design to accessories, our engineering team designs and support the system integration process.

- CUSTOMIZED CONFIGURATION
- CUSTOM OS IMAGE
- CUSTOM BIOS
- ENCLOSURE DESIGN
- PERIPHERALS AND OPTIONS
- CUSTOM-DESIGNED ACCESSORIES

Technical Know-How

We understand that access to cutting-edge solutions purposely built for their applications is imperative for enterprises operating in rugged or potentially hazardous environments. As a result, Winmate locates its resources from project research and design, software development and customization, product verification and validation, and in-house testing to research and implement the latest technologies available.

The latest technologies we deploy for our rugged products:

- Dry and wet optical bonding
- Panel enhancement for sunlight readability
- Anti-reflection (AR) and anti-glare (AG) glass protection coating
- Light sensor
- Hyper dimming
- Electronic potting
- Touch screen integration: projected capacitive, resistive, or SAW touch
- Waterproof enclosure
- Military EMI and mesh coating
- Wireless capabilities
- Data capture devices integration
- Defroster for ultra-low temperature environments
- Stainless steel SUS 316/ AISI 316
- Shock and vibration resistance
- Wide-range operation temperature

Logistics and Transportation

Overview

In the warehouse environment, the ability to mount mobile devices and computers to forklifts, trucks, tuggers, and inventory pickers is essential for maximizing productivity. From inventory management to order fulfillment, asset tracking, shipping, and receiving, the warehouse floor is a complex ecosystem requiring highly efficient technology to keep things running smoothly.

Our vehicle mount computers include:

- The latest Android™ or Windows® operating system
- Robust wireless communications
- Vehicle mounting solutions

Winmate's rugged vehicle-mounted computers and rugged tablets are designed to fit seamlessly into forklifts and other warehouse vehicles, which helps minimize errors, streamline ordering and inventory management, and improve operational efficiencies.

Industrial Challenges

• **In-vehicle installation**

Computer hardware tailored for warehouse and logistics must be compatible with RAM mount or VESA mount in-vehicle installation methods.

• **Unstable power supply from the vehicle**

Instability during start-up and shutdown can cause system crashes and restarting issues. Devices that receive power from the vehicle must have a solution to ensure stable performance in unstable power supply situations.

• **Working in cold storage areas**

In a large warehouse environment, forklifts frequently go back and forth between the cold storage areas and room-temperature environments. The computer devices must show stable performance in low and high temperatures.

• **Driver's safety**

The computer must not distract the driver.

• **Strong vibration**

Devices installed on a forklift must be rugged enough to withstand all-day operations and vibration from the vehicle.

Technology

- RAM mount and VESA mount solutions
- Wide-range power input and ignition control
- Built-in defroster to work in cold storage
- Screen blanking function to automatically control screen behavior
- Waterproof, dust, and drop resistant IP65-rated enclosure
- Accessories tailored for warehouse and logistic applications

**WE DELIVER RUGGED COMPUTING SOLUTIONS
FOR YOUR LOGISTICAL NEEDS.**

RUGGED TABLETS

Portable and wireless rugged tablet computers can survive in any environment and get real work done.

VEHICLE-MOUNTED COMPUTERS

Rugged vehicle-mounted computers are used for data collection in the warehouse and logistic applications, designed to fit seamlessly into forklifts, trucks, and other vehicles.

G-WIN PANEL PC

Rugged Panel PC are used for data collection in the warehouse and logistic applications, designed to fit seamlessly into forklifts, trucks, and other vehicles.

Application Story

Heavy Duty Trucks

Background

Integrating connected vehicle technology into the trucking sector presents enormous potential for creating safer and more efficient roadways. Winmate provides fixed-mounted computers for conventional field service fleet management to perform location tracking and task management.

Core Products

- GS Series Full IP65 Panel PC
- Embedded Box PC F65EAC-1K32

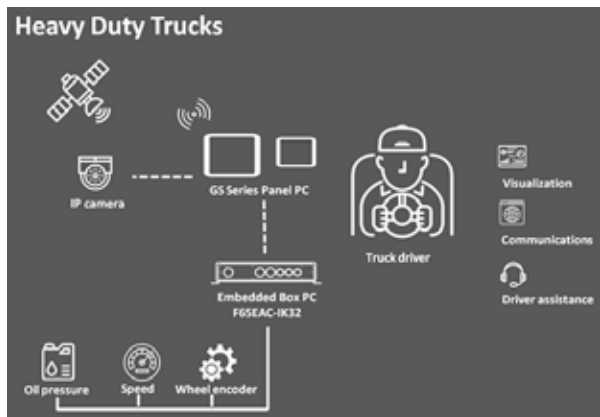

“ PROVIDE CONNECTIVITY FOR VEHICLES ON THE ROAD. ”

Main Challenges

- Connectivity in remote locations

Why Winmate

- Provide solution to enhance signal
- Devices resist strong vibration
- Customized BIOS

Application Diagram: Truck automation

Application Story

Train Cabin Operator Panel

Background

Winmate provides total solution for information display and computing for railway transportation. In the control room, Winmate offers displays of various sizes, and a full array of mounting options for limited installation space in trains. For computing needs, our EAC computer box provides I/O, thermal, and anti-shock requirements in a train. In addition, for passengers on board, we have displays to show timing information, as well as playing back entertainment or advertisement clips.

Core Products

- 10.4" G-WIN Panel PC R10IK3S-VMT2
- EAC Box PC

“

RELIABLE AND DURABLE DISPLAY SOLUTION FOR NAVIGATION AND TASK MANAGEMENT

”

Main Challenges

- Strong vibration
- Operating in cold environments

Why Winmate

- Vibration resistant design
- EN50155 EMC test report
- Offers a solution for operating in extreme temperatures -20°C to 60°C
- Strong hardware design capabilities to accommodate various truck configurations.

Application Diagram: The dashboard cabin

Application Story

Urban Waste Collection

Background

An innovative waste management company catering to millions of residents through municipal services deploys the IoT for intelligent waste collection. Yet, they were looking for a rugged Android-based vehicle-mounted computer to help integrate the data collected through the sensors, and RFID readers, then communicate with the command center to take their truck tracking system to the next level.

Core Products

- 10.4" FM10Q vehicle-mounted computer

“**A SMART IN-VEHICLE COMPUTING SOLUTION FOR SMART CITIES.**”

Main Challenges

- Extreme operating environment
- Multiple I/O ports
- Reliable wireless communication capabilities.

Why Winmate

- We provide IP65 rated and MIL-STD-810G certified rugged computers to survive the dusty waste collection environments.
- We provide a customization service to meet your specific needs.

FM10Q VMC installed firmly on the truck

7" Windows Vehicle Mounted Computer FM07

“ IN-VEHICLE SOLUTION IN A COMPACT FORM FACTOR. ”

- 7", 1024 x 600, PCAP touchscreen
- Intel® Celeron® N3350 (2M Cache, up to 2.4 GHz)
- Windows 10 IoT Enterprise (Optional),
Ubuntu 18.04 (Optional)

4 GB SO-DIMM, DDR3L 1600 MHz, 64 GB M.2 2242 SSD

WLAN, BT, GPS/AGPS

RS232, DIDO, 2xUSB, CANBUS

Gigabit Ethernet LAN 10/100/100 Mbps (M12 type)

RAM mount, support VESA mount

Power input 9~36 V DC with ignition control

IP65 waterproof and dustproof

MIL-STD-810G shock, vibration, and drop resistance

“ ANDROID-BASED VEHICLE MOUNTED COMPUTER. ”

- 10.4" 1024 x 768 Panel with PCAP touchscreen
- Qualcomm® Snapdragon™ 660 octa-core, 2.2 GHz
- Android 9.0

RAM Mount/VESA Mount

Field replaceable front panel to reduce service costs

IP65 waterproof and dustproof vehicle mounted computer

Wide range -30°C to 50°C operating temperature

GPS/GLONASS, G-Sensor, Temp. Sensor

Magnesium alloy back cover with plastic bezel

Fanless design

s1 x USB 3.0 Type C (OTG)(Tablet), 1 x DB9 Connector for 2 x USB 2.0 Port(Docking)

Application

Forklift Automation

“COMPACT AND RUGGED,
IDEAL FOR FORKLIFT”

The 10.4" vehicle mounted computer FM10Q gives forklift operators the ability to monitor pick-up and drop-off locations to optimize in-house routes for faster and more precise delivery.

12" Android Vehicle Mounted PC FM12Q

“ FOR YOUR UNIQUE ANDROID IN-VEHICLE APPLICATION ”

- 12.1" 1024 x 768 Panel with PCAP touchscreen
- Qualcomm® Snapdragon™ 660 octa-core, 2.2 GHz
- Android 9.0

RAM Mount/VESA Mount

Field replaceable front panel to reduce service costs

IP65 waterproof and dustproof vehicle mounted computer

Wide range -30°C to 50°C operating temperature

GPS/GLONASS, G-Sensor, Temp. Sensor

Magnesium alloy back cover with plastic bezel

Fanless design

1 x USB 3.0 Type C (OTG)(Tablet), 1 x DB9 Connector for 2 x USB 2.0 Port(Docking)

Forklift Automation

“ULTRA-RUGGED TOUCH SCREEN FOR THE TOUGHEST ENVIRONMENTS”

You want the same large screen, the latest mobility platform for future-proofing, and features that will make the transition to a completely different OS as painless as possible.

12" Windows Vehicle Mounted PC FM12E

NEW
PRODUCT

“ DATA COLLECTION IN LOGISTICS APPLICATIONS. ”

- 12.1" 1024 x 768 Panel with PCAP Touch
- Intel® Elkhart lake x6425E Processor
- Windows 10 IoT Enterprise

4 GB SODIMM DDR4-3200, 64 GB M.2 MLC SSD

WLAN, BT, GPS/AGPS

G-Sensor, light sensor, temperature sensor

2 MP front Camera

Screen blanking function for driver's safety

RAM mount, support VESA mount

Power input 10-60 V DC with ignition control

IP65 waterproof and dustproof

MIL-STD-810H vibration, shock resistant

8" Windows Vehicle Mounted PC M101BK

**“ QWERTY KEYPAD TO INPUT
DATA IN ANY CONDITIONS. ”**

- Long battery life with Intel® Celeron® N2930 Bay Trail-M Processor
- 8", 1280x800 wide viewing angle with PCAP touch, in vehicle computer mounts
- 5MP Auto-focus camera

IP65 waterproof and dustproof

ISO/IEC 9995-3 QWERTY Keypad

Hot-swappable battery design with optional high capacity battery pack

MIL-STD-810G compliant

Optional extendable UHF RFID reader

Optional built-in 1D/2D barcode, HF RFID reader

4GB SO-DIMM, DDR3L 1600 MHz

“ **PORTABLE AND POWERFUL SOLUTION.** ”

- 8", 1280 x 800, PCAP touchscreen
- Intel® Pentium® N4200 (2M Cache, up to 2.5 GHz)
- Windows 10 IoT Enterprise

4 GB LPDDR4, 64 GB SSD

Light sensor, g-sensor, Gyro

2 MP webcam, 8 MP rear camera with autofocus

WLAN, BT, GPS, GLONASS

USB 3.0 (Type A), USB 3.0 (Type C), docking connector

D-sub for vehicle gateway connection

Built-in smart card reader (Default M900PT)

IP65 waterproof and dustproof

MIL-STD-810G shock, vibration and drop resistance

Connected Truck

“CONNECTIVITY FOR VEHICLES ON THE ROAD”

Winmate developed a smart truck solution for a heavy-duty vehicle. Installed on a dashboard using a vehicle cradle, the 8" rugged tablet M900P and custom-designed vehicle gateway VG-100 now connects in-vehicle systems and allows status monitoring of semi-trucks in Europe.

10.1" Windows Rugged Tablet M101S

“ **ROBUST TABLET TO
WITHSTAND INDUSTRIAL USE.** ”

- 10.1", 1920 x 1200, PCAP touchscreen
- Intel® Core™ i5-7200U Kaby Lake 2.5 GHz, up to 3.1GHz
- Windows 10 IoT Enterprise

4 GB DDR4 SDRAM, 128 GB SSD, micro SDXC card slot

Light sensor, g-sensor, Gyro

2 MP webcam, 8 MP rear camera with autofocus

HF RFID 13.56MHZ (Optional)
