

## Rockwell Automation Training Courses for Companies & Schools:

Industrial Automated Control Systems

Curriculum/Courseware Unlimited User Site Licenses.

### Attn: Tech College Instructors, and Company Training and Development Managers ...

Are you seeking to integrate blended or online instruction into your curriculum, but don't have the time to create your own content modules and courses? See the Rockwell automation courseware resources for educators below...

These **industrial control systems training courses** (Koldwater Rockwell automation training series) for **industrial electrical technicians and maintenance** are available in **Perpetual Site licenses (SL)** and **Perpetual Enterprise licenses (EL)**. A great low-cost way to supplement the Technical University, to the smaller City College and Community College programs. (As well as corporate training and development departments.) These automation control certificate courseware programs are used by corporate training directors, Brotherhood of Electrical Workers Locals, training centers, and technical college instructors around the world to train in industrial automation control and enhance industrial electricians' electrical training.

**SEVEN (7)  
CERTIFICATE  
COURSES  
INCLUDED!**

RSVIEW32 HMI TRAINING SOFTWARE

CONTROLLOGIX - DESIGN & TROUBLESHOOTING TRAINING

ELECTRICAL TROUBLESHOOTING TRAINING

PLC TRAINING & LOGIXPRO PLC SIMULATOR

VFDTRAINER VARIABLE SPEED DRIVES EXPLAINED

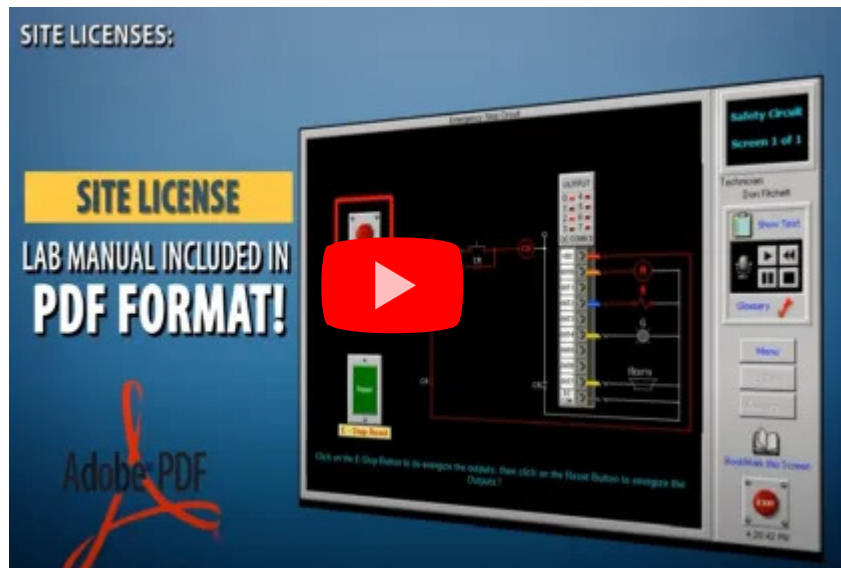

ELECTRIC MOTORS AND CONTROLS TRAINING

DEVICENET SOFTWARE TUTORIAL

## Industrial & Building Automation Systems Courses:

Perpetual **SLs** and **ELs** for these industrial and building automation systems courses can be purchased for each course individually, or bundled for extra savings of up to 36%! Each courseware title includes, for each facility licensed...

- \* No annual fees!
- \* Never expires!
- \* Unlimited users!
- \* Unlimited installations!
- \* No internet required after initial installation.
- \* Lab manual included in PDF format!
- \* Student scores in LMS friendly MS DB
- \* Real-world interactive simulations.
- \* Facility license to repurpose installed assets for LMS customization.

## About The Automation Control Courseware Perpetual SL & EL:

The **SLs** and **ELs** for this Koldwater Series of automation courseware is much less expensive and more interactive than learning institutions are used to being offered. Our 'Best for Less' policy makes these two licensing options perfect for technical schools, community colleges, universities, apprenticeship programs, company training departments, electrical training institutes, and other industrial training institutes. Other providers often do not publicly list their courseware license prices. In contrast, we are transparent, so our prices are listed publicly below or on the [RFQ form](#). Everyone gets the same low price, regardless of the learning institution's size.

The prices listed below are the SL price per facility, on the [RFQ form](#) are EL prices too. The software Never expires, and there are no annual fees. If you have 3 or more campuses or facilities, please consider the EL to save even more.

Each SL is per physical facility, for unlimited users, with unlimited installations. License owners can install on college or company network (LAN), or install stand-alone copies on individual PCs, so you are not limited on how you can distribute the training software to students. Our software also comes with "Individual Assets Custom Coursework", which you can use to develop your own content, which adds even greater flexibility, and value to these pre-packaged courses.

The EL expands the licensing to an unlimited number of SL (facilities). If you have more than 3 facilities, the EL is best suited for you. This license also includes SCORM versions examples for most of the courses. As the EL is for unlimited facilities in the USA or around the world, license owners can also place them on WANs as well as individual LANs.

## About Industrial & Building Automation Control Systems Courses

These courses have much more interactivity than the standard flipping through slides or videos, memorizing data long enough to answer written questions at the end. These courses have all that, but also include real-world simulations, where the user can click on switches and actually see the circuit or simulated software respond! Tests are not only answering questions but the student is also tested on actual troubleshooting of real-world simulated circuits and PLCs in some courses, which helps build a greater understanding of the automation practical knowledge delivered.

Note, these courses use the Rockwell Automation brand to teach automated control systems, but 80% of knowledge can be applied to any brand. We chose that brand because it is the easiest for the beginner to learn. So you can use these courses for Rockwell training, or as an introduction to the subject matter for any brand.

### Each Trade-Tech-college course includes ...

- \* Practical knowledge
- \* Multiple choice questions
- \* Troubleshooting section
- \* Videos, animations, and simulations
- \* Closed captions for hearing impaired
- \* Glossary
- \* Lab Manual in PDF format
- \* Mini LMS
- \* Student can print Certificate of completion
- \* Compatibility with Win 10, 8, 7, and XP

When on our website, tapping the certificate course title below will take you to the single Student license ( Student ) order page with details, screenshots, and often videos of the related course(s). After reviewing course details, please return to the [RFQ Form](#) (BIN95.com/vocational-training/education-corporate-pricing.php) to purchase SL or EL for multiple students/employees to learn from the courses.

**Technician's Dream Bundle**: *Estimated 150 hours of training.*

Includes the following 7 course software titles, plus the Constructor Electrical/PLC simulator and drawing software. Of specific interest to industrial and building automation professionals. This bundle includes PLC training, PAC training, HMI training, VFD, motor and controls training, troubleshooting trainer, DeviceNet training, and the Constructor Software that is great for industrial training institute instructors to use as

teaching tools.

[Educational | Corporate pricing](#): 36% discounted Price of \$9890 for the SL versions.

**Maintenance Technician's Bundle**: *Estimated 175 hours of training.*

Includes the following 8 course software titles. Of specific interest to industrial maintenance technicians and HVAC technicians. This bundle includes PLC training, PAC training, HMI training, VFD, motor and controls training, troubleshooting trainer, DeviceNet training, and the fluid power trainer. You can click on each certificate course software title at the SU version link above to see details, screenshots, and often videos.

[Educational | Corporate pricing](#): 31% discounted Price of \$7890 for the SL versions.

## Automation Training Bundles cont. ...

**Automation Specialist Bundle**

certIFICATE course software title at the SU version link above to see details, screenshots, and often videos.

**Automation Control Specialist's Bundle:** *Estimated 150 hours of training.*

Includes the following 7 course software titles. Of specific interest to Automation technicians, industrial technicians as well as others. This bundle is also popular among electrical training institutes like IBEW locals for taking commercial electricians into the industrial electrical contractor realm. This bundle includes PLC training, PAC training, HMI training, VFD, motor and controls training, troubleshooting trainer, and DeviceNet training. You can click on each

[Educational | Corporate pricing](#): 32% discounted Price of \$6890 for the SL versions.

**PLC Technician Training Bundle:** *Estimated 95 hours of training.*

Includes the following 4 certificate course software titles. Of specific interest to PLC technicians and automation engineering as well as others. This bundle includes PLC training, PAC training, HMI training, and VFD training courses. You can click on each certificate course software title at the SU version link above to see details, screenshots, and often videos.

[Educational | Corporate pricing](#): 25% discounted Price of \$4890 for the SL versions.

If your corporate training department or school budget can not fit one of the bundles currently discounted above, you may consider purchasing a

SL or EL for a single certificate course title below, one at a time over a longer period of time. Even purchasing a SL/EL for just one course (see below), results in greater savings than you will find anywhere else in the courseware marketplace! (*Also note, course hours estimated below are based on the instructor going through lab exercises with the class too.*) Tapping the certificate course title below will take you to the single Student license ( Student ) order page with details, screenshots, and often videos of the related course(s). After reviewing course details, please return to the [RFQ Form](#) to purchase SL or EL for multiple students/employees to learn from the courses.

**RSLogix 5000 PAC Certificate Training Program:** *30 hours of training estimated.*

This certificate course provides a great foundation in using Rockwell's RSLogix 5000 as an introduction to PACs (Process Automation Controllers) and an overview of the Controllogix. Before your students take a PAC course, it is highly recommended they first be fully trained in PLCs. Or at a minimum take the PLC training certificate course below first.

[Educational | Corporate pricing:](#) Price of \$1890 for the SL versions. Request a quote for Site or Enterprise License.

**Fluid Power Certificate Training Program:** *25 hours of training estimated.*

After the hydraulic engineering introduction in the Basic Fluid Power Principles section, you move on to hydraulics and pneumatics practical application, followed by hydraulic pumps and miscellaneous components. Of course, as with all of our Koldwater course series, it wraps the course up with a troubleshooting section. Over a hundred of the most common ISO CETOP hydraulic symbols are covered too.

[Educational | Corporate pricing:](#) Price of \$1190 for the SL versions. Request a quote for Site or Enterprise License.

## Single Automation Training Course Titles cont. ...

**Motors and Controls Certificate Training Program**: 25 hours of training estimated.

This electric motor control circuit training software is quite detailed. Starting off with wiring diagrams vs. ladder diagrams and motor control theory, covering the entire AC motor control system. Solenoids, timers, sensors, relays, troubleshooting, even an introduction to PLCs is included.

Educational | Corporate pricing: Price of \$1190 for the SL versions. Request a quote for Site or Enterprise License.

**PLC Certificate Training Program**: 30 hours of training estimated.

This PLC basics course is based on and simulates Allen Bradley PLC programming software. But 80% of the knowledge can be applied to any brand of PLC. This PLC programming training software includes analog instruction and of course, as with all of our Koldwater course series, it wraps the course up with a troubleshooting section. SL includes a free copy of LogixPro on a mobile CD license that the instructor can use and check out to students.

Educational | Corporate pricing: Price of \$1490 for the SL versions. Request a quote for Site or Enterprise License.

**HMI Training Program**: 20 hours of training estimated.

This HMI training course uses Rockwell's RSView 32 to teach HMI basics, RSLinx communications, DDE-OPC topics and excel, creating a new RSView project, RSView graphics, and more. Data logging is a valuable tool for Predictive Maintenance and activity logs help to prepare for IIoT, Preventive and Predictive Maintenance; this HMI training covers both. Alarming is an extremely important aspect of HMI and SCADA systems, so this course is designed to give the learner a firm understanding of the use and configuration of both digital and analog alarms.

Educational | Corporate pricing: Price of \$1690 for the SL versions. Request a quote for Site or Enterprise License.

## Single Automation Training Course Titles cont. ...

**VFD Training Program**: *15 hours of training estimated.*

This VFD training course is essential to both Industrial & Building Automation technicians, as variable frequency drives are so common in both industries. This certificate course covers AC frequency drive and related motor control troubleshooting. Modules in VFD uses, parts, operation, installation, startup, the VFD controller, and even soft starters are covered. Of course, as with all of our Koldwater course series, it wraps the course up with a troubleshooting section.

Educational | Corporate pricing: Price of \$1290 for the SL versions. Request a quote for Site or Enterprise License.

**Electrical troubleshooting Training Program**: *10 hours of training estimated.*

Basic Electrical and PLC Troubleshooting Training Course using real-world electrical simulations. User first learns proper electrical troubleshooting techniques, practice with virtual volt-ohm meter (VOM), masters electrical and motor control circuits training then moves on to the PLC troubleshooting training.

Educational | Corporate pricing: Price of \$890 for the SL versions. Request a quote for Site or Enterprise License.

**DeviceNet Training Program**: *20 hours of training estimated.*

The DeviceNet training course teaches you What is DeviceNet, Component Identification, Power Supplies, DeviceNet Messaging Tips and Tricks and more. Because this DeviceNet training walks you thru simulated design and maintenance of an efficient DeviceNet, this tutorial can be used as preparation training for the commissioning of the plant. Includes a simulation of Cutler-Hammer Automation's NetView Software, that covers Explicit Messaging. These are things we learned the "hard-way!".

Educational | Corporate pricing: Price of \$1190 for the SL versions. Request a quote for Site or Enterprise License.

## Courseware LMS:

Built into each automation training certificate course SL or EL edition, is a mini LMS that saves student information and score to an MS Access database, for easy export and import to most brands of LMS. If the learners are using courses on a local network, you can access all learners' scores. If you install any copies of the automation training certificate course on a stand-alone PC or workstation, you will have password-protected access to mini LMS via the PC you installed it on. Both network and PC installations have the capability for the student to print a certificate of completion when they score 85% or better.

With the SL/EL editions, you are also authorized to import assets from the courses into your own LMS. As there are literally hundreds of LMS brands being used, we do not support the importing process to a particular brand of LMS SCORM. You may seek support for importing assets, from your LMS provider. It is important while doing so, you adhere to the requirements that assets only be accessible to the physical location(s) the SL or EL was purchased for (LAN ok with SL, WAN ok with EL). With EL license we do provide an example SCORM version when available.

You can not place the courses or assets on the internet or any network that is accessible outside the physical facility (SL) or facilities (EL) they were licensed for.

---

### Try before you buy:

*There are free limited demos on this website's download area, and there are videos of the courses being used on the single-learner ( Student ) license product page, but we recommend you buy a Student version to get the full experience. When you decide to purchase the SL or EL license of our industrial control system courses, we will deduct the cost of the Student version purchased off of your invoice. This way you can choose to try the full version first at no additional cost.*
