The infrastructure of individual/franchise restaurant stores is increasing significantly, but the Ministry of Environment's regulation on plastic use follows. In order to find alternative products, it is necessary to preoccupy the future market through product supply with superior technical advantage over competitors.

* Can Seamer Market Analysis - Problems and complaints in the franchise market using disposable products.

Most store owners say that the pouring and dripping of drinks are the most common customer complaints.

There is no perfect solution to the continuous increase in franchise market size.

A fully packaged can seamer can be an alternative to the needs of the market.

1. Development background:

(1) Food packaging, which is the basis of business. Why is packaging important?

"It's because it's the first impression of food and the first impression of our store."

"Because food can't spill."

As customer satisfaction increases through perfect packaging, store sales also increase.

2. Differentiation from competitors.
