

Two C Ad Creative Color Adhesive

Currently, there are approximately 300 colors available which allows to the immediate production of color adhesive to suit the preference of different architects and designers.

We are continuously developing more color adhesives through research and development.

At present, tube type (75gr) and 3 different cartridge type (50ml, 75ml, 250ml) are available. A larger container packaging for each industry's need is also under production.

- 2c-ad ("Two C Ad") is an acrylic solid surface adhesive produced by CrossChem. Our product is recognized for its adhesive color and convenient applications.
- The main aim of our company is to develop a complete color matching solution for all solid surface products and engineered stones. In addition, we strive to provide consistent quality to our customers by designing creative colors and be the industry leader in this product.
- Our company considers the environment and health implications of our product to the fabricators of surface products and our final customers. We therefore emphasize the environment-friendly nature of all ingredients in our products.
- In order to maintain the high quality of products, the whole process from polymerization to packaging is managed consistently.
