BUBBLEWAVE VITA FILTER MULTI

BUBBLEWAVE VITA FILTER MULTI is special.

Many of the shower filters on the market are made only of sediment filters, whereas VITA FILTER MULTI is an all-round product consisting of a sediment filter and a vitamin gel filter.

Prominently, the sediment filter of VITA FILTER MULTI functions to filter out impurities, foreign matter, and rust in the water that passes through old water pipes. It also can filter fine dust, pollen, and hair.

On the other hand, the water that passes through the vitamin gel filter is slightly acidified and gently delivered to the skin. In addition, you can enjoy a safer and healthier shower as the filter removes residual chlorine in the tap water.

Indispensable ingredients in vitamin gel

Vitamin C
Removal of chlorine

Honey & Propolis
Anti-aging and moisturizing effect

Aroma flavors
Healing shower with aroma

BUBBLEWAVE VITA FILTER MULTI contains 28,000mg of vitamin C to remove residual chlorine. Vitamin C, which has excellent antioxidant effects, searches for the water that the skin likes the most in VITA FILTER MULTI.

BUBBLEWAVE VITA FILTER MULTI has 12 scents: strawberry, peach, lemon, grapefruit, mango, pine needle, lavender, cherry blossom, acacia, rose, baby powder and scentless. You can enjoy the aromatherapy effect with a scent that suits your taste.

The transparent case of VITA FILTER MULTI allows you to check the life of the filter. Usually, vitamin gel can be used for about a month when used by two people. The periodic replacement of the filter in the case is recommended.

BUBBLEWAVE VITA FILTER REFILL

ONLY FOR
VITA FILTER MULTI

How to replace VITA FILTER MULTI REFILL

STEP 01
Take off the cap of the VITA FILTER MULTI product.

STEP 02
Remove the cap from the filter and put the new filter back into the cap

STEP 03
Put the refill in the cap back into VITA FILTER MULTI and close it

BUBBLEWAVE VITA FILTER AROMA

Do you need a fragrant therapy shower every day though you have no bathtub? Or are you worried about your child's sensitive skin? VITA FILTER AROMA brings healing from the shower in your daily life.

A sediment filter is attached to the inlet in contact with the tap water to filter out fine dust, foreign matter, and impurities in the tap water transmitted from the old water pipe. The sediment filter filters out rust and foreign matter over 5µm in tap water.

49,000mg of vitamin C in VITA FILTER AROMA not only removes 99.9% residual chlorine in tap water, but also prevents skin aging and keeps our body healthy from atopy and troubles.

Indispensable ingredients in vitamin gel

Vitamin C

Removal of chlorine, moisturizing and antioxidant effect

Healing shower with aroma

BUBBLEWAVE VITA FILTER AROMA contains 49,000mg of vitamin C to remove residual chlorine. Vitamin C, which has excellent antioxidant effects, searches for the water that the skin likes the most in VITA FILTER MULTI.

BUBBLEWAVE VITA FILTER AROMA has 12 scents: strawberry, peach, lemon, grapefruit, mango, pine needle, lavender, cherry blossom, acacia, rose, baby powder and scentless. You can enjoy the aromatherapy effect with a scent that suits your taste (same as page 3).

The transparent case of VITA FILTER AROMA allows you to check the life of the filter. Usually, vitamin gel can be used for about a month when used by two people. Note that the period of use may depend on the water pressure used at home and the number of users.

* No refill product for VITA FILTER AROMA is available.

How to install

Handheld shower

Disconnect the existing shower from the shower hose. Prepare to insert the BUBBLEWAVE product into the shower hose. Connect the lower part of the BUBBLEWAVE product to the shower hose. Connect a mini shower head to the top of the BUBBLEWAVE product. If you use a regular shower instead of a mini shower head, turn the head of the shower in the same way to insert it.

Fixed shower / faucet shower

As for a wall-mounted shower, loosen the fixed showerhead using a screwdriver or hand. Then, fit the lower part of the BUBBLEWAVE product and turn it and fix it. As for a faucet shower, disassemble the inlet of the shower hose using a screwdriver, and then screw the upper part of the BUBBLEWAVE product into place.

BUBBLEWAVE Product Test Result

Water that passed through vitamin C

Ordinary tap water

1. Test for slightly acid water

This test compares ordinary tap water with water that passes VITA FILTER MULTI and VITA FILTER AROMA.

Our skin is in its healthiest condition when it is slightly acidic. In other words, it is ideal for our body to shower with water that best suits our skin, wash our face, and brush our teeth. Tap water that we commonly use has a pH of about 7.0, which is neutral. However, tap water that passes through BUBBLEWAVE VITA FILTER MULTI and VITA FILTER AROMA becomes slightly acidic with a pH of 5.5 to 6.0 due to the dissolution of vitamins.

This test confirmed that tap water containing vitamin C was much more suitable for our body and that the skin liked the water.

2. Test for residual chlorine

This test proves that residual chlorine in ordinary tap water can be removed with VITA FILTER MULTI and VITA FILTER AROMA.

Some residues not good for our body such as rust, residual chlorine, fine dust, pollen, and hair remain in tap water. We conducted a test to prove to what extent the BUBBLEWAVE products can remove these substances. As for the test procedure, a visible residual chlorine reagent was added to normal tap water to make it yellow. VITA FILTER MULTI and VITA FILTER AROMA were added to this water to remove residual chlorine.

This test confirmed that vitamin C in the BUBBLEWAVE products removed residual chlorine as shown in the figure on the left.

BUBBLEWAVE MINI SHOWER HEAD

BUBBLEWAVE MINI SHOWER HEAD is light and smart.

BUBBLEWAVE MINI SHOWER HEAD can be installed on any shower filter. A shower filter installed on an existing shinghs may cause a bit of annoyance when taking a shower. BUBBLEWAVE MINI SHOWER HEAD can solve this problem by being installed directly on a shower filter to make a shower lighter and fitter in your hand.

The face plate in BUBBLEWAVE MINI SHOWER HEAD contains fine holes. The water that comes out through the fine holes brings about 30% more water saving effect than conventional shower heads. This naturally leads to an increase in water pressure.

Besides, the antibacterial balls in BUBBLEWAVE MINI SHOWER HEAD remove even *Pseudomonas aeruginosa* and *E. coli*. The antibacterial balls can help strengthen immunity while you take a shower. Its effect will be greater when used with the VITA FILTER MULTI products.

Strengths of MINI SHOWER HEAD

Higher water pressure
Water pressure than by the shower plate

30% water saving
Lower water use than the previous one

Degerm with
antibacterial balls
Remove of *E. coli*, *Pseudomonas aeruginosa*

BUBBLEWAVE ANTIBACTERIAL BALLS

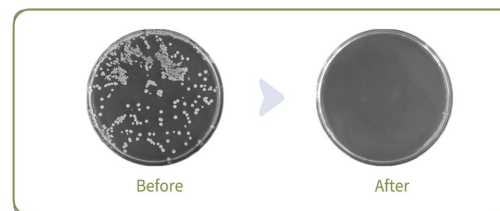

BUBBLEWAVE ANTIBACTERIAL BALLS are the white particles in BUBBLEWAVE MINI SHOWER HEAD. These antibacterial balls are 99.9% effective in removing microscopic bacteria.

Indeed, we can see the following results in the *E. coli* test below. In tap water containing *E. coli*, the bacteria are concentrated as shown in the figure below. However, no *E. coli* was found even after a long time in the water that passed through BUBBLEWAVE ANTIBACTERIAL BALLS.

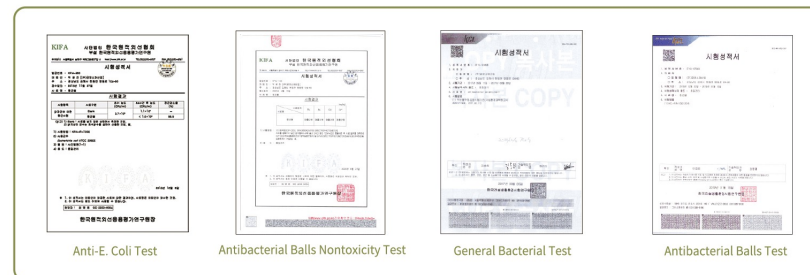

See BUBBLEWAVE ANTIBACTERIAL BALLS removing *E. coli* and *Pseudomonas aeruginosa* in the water we use every day.

TEST AGAINST E. COLI

Certificates for BUBBLEWAVE ANTIBACTERIAL BALLS

BUBBLEWAVE VITA FILTER SHOWER HEAD

BUBBLEWAVE VITA FILTER MULTI SHOWER is a shower product in which BUBBLEWAVE MINI SHOWER HEAD is combined with VITA FILTER MULTI SHOWER FILTER. This product is designed to be purchased at a reasonable price rather than two products purchased separately.

The tap water delivered to our house through old water pipes passes through the sediment filter of VITA FILTER MULTI to primarily filter out fine foreign substances, impurities, and rust. Then, the water passing through vitamin gel removes residual chlorine in the tap water by the effect of vitamin C. After that, the water suitable for the skin is delivered through the shower head. Finally, E. coli and Pseudomonas aeruginosa remaining in the water are cleared while passing through the antibacterial balls in the shower head. This is how we take a shower with clean water.

You can take a healthy and safe shower with the water passed through three times of filtering. Feel it for yourself. You will experience a satisfying shower.

BUBBLEWAVE VITA FILTER SHOWER HEAD GIFT SET

BUBBLEWAVE VITA FILTER MULTI GIFT SET consists of the following

VITA FILTER MULTI (1ea) + MINI SHOWER HEAD (1ea) + VITA FILTER MULTI REFILL (2ea). This gift set is not only suitable as a gift, but also perfect if you wish to purchase a full set.

Experience a healthy shower with chlorine removed and with vitamin C provided from the differentiated BUBBLEWAVE products.
