

Why is antioxidant health important?

- 1 Free radicals in the body, which are increased by drinking, smoking, stress, and the external environment, are the leading causes of human diseases.
- 2 Active oxygen in the body damages cells in the body, and the ability to remove active oxygen decreases with age.
- 3 Pycnogenol, pine needle distillation concentrate, etc. are typical antioxidants that inhibit active oxygen.

Blood circulation improvement effect

PYCNO CHEONG SONG WON

Helps to remove free radicals that are harmful to the human body
Helps inhibit platelet aggregation, which can interfere with blood flow

Pycnogenol +
pine needle distillation
concentrate in one

Native in areas above 1,700 meters above sea level
Pine needles are dried and crushed to produce water vapor.

US Food and Drug
Administration Food Safety Test
(Pine Needle Distilled Concentrate Oil)

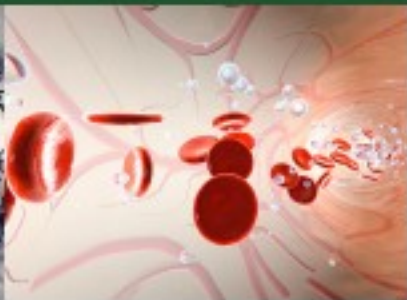

PYCNO CHEONG SONG WON

Helps to remove free radicals that are harmful to the human body

Antioxidative effect

Blood circulation improvement effect

Help with women's menopause

Help with diabetes

Pycnogenol

It is a single-species pine tree that grows only in the forests of Landes in the Gascony region in southwestern France. Pine raw material grown without pesticides or chemicals. Precious Pycnogenol extracted only 1 kg from 1,000 kg of French coastal pine peel. For more than 40 years, focusing on research on human application test of French coastal pine bark extract.

Red Pine Oil

What is pine needle distillation concentrate?

Pine needle distillation concentrate (red pine oil, pine needle oil) is oil extracted using steam by collecting, washing, crushing, and drying the leaves of red pine trees that grow naturally in the clean environment of high mountains. One ton of pine needles produces a third of a liter of this precious health functional food.

What is 'pine needle'?

Pine needles are composed of several ingredients. With antioxidant, antibacterial, anti-inflammatory, and anti-aging effects, it has the effect of discharging toxins and waste products in the body, clearing blood, cleaning blood vessels, improving blood flow, smoothing metabolism, and suppressing the creation of diseases.

Ancient books: 'Bonchogangmok' and 'Chinese Dictionary'

- Pine needles purify blood, improve circulation, have anti-inflammatory and soothing analgesic effect, and prevent colds and bronchial asthma.
- Excellent function to facilitate blood flow by decomposing waste products in blood vessels.
- Red pine oil strongly decomposes heavy metals and environmental hormones, helping to excrete them in urine or sweat.
- Red pine oil decomposes only foreign substances and toxins without harming human cells or organs.
