

The Highest Level of Mask **RUMY MASK**

The goggle mask connected with goggles, with no space between both, able to prevent bugs or small particles from entering.

- **VARIOUS DESIGN** 4 types of goggles & Various designs of masks to match customers preference.

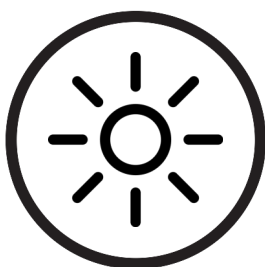

- **ANTI-FOG LENS**

Rumy's Anti-Fog Lens is a product which has been developed for a long time.

Functional lenses provide a perfect solution to the 'Fog phenomenon' in which steam is generated on the surface of the lens due to rapid changes in the surface temperature of the lens in winter. Due to the lack of continuity of the anti-frost function used in general lenses, the surface of the lenses is easily scratched with a coating that is weak in durability. But Rumy Goggle lens solved the problem and there is no need for a cloth and spray to prevent the mist. Lens surface strength is also enhanced by more than 300% compared to basic lenses, and the life span of the anti-frost function is the same as the coating life. It can be easily cleaned by cleansing with water.

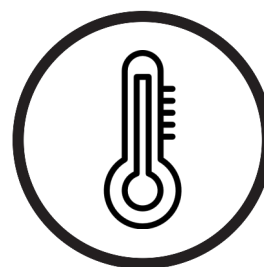

- **MASK**

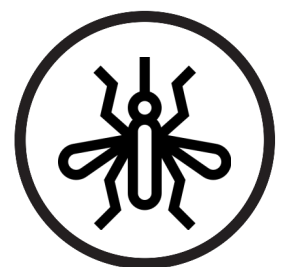

UV Protection

Anti bacterial

Cooling

Prevents Bugs & Substances

When to wear ?

Whenever You Want, Wherever You Want
