

Features & Advantages

Long Durability

The corrugated paper is specially treated with high structural strength, corrosion resistance and long service life.

Uniform permeability

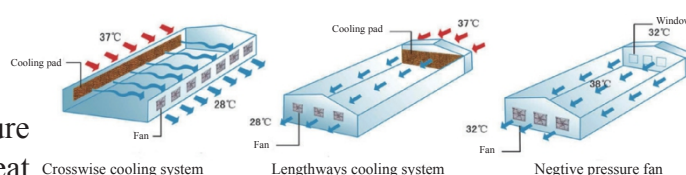

Excellent water permeability and absorption of the corrugated paper ensures the water evenly penetrates the entire cooling pad wall.

Large evaporation area

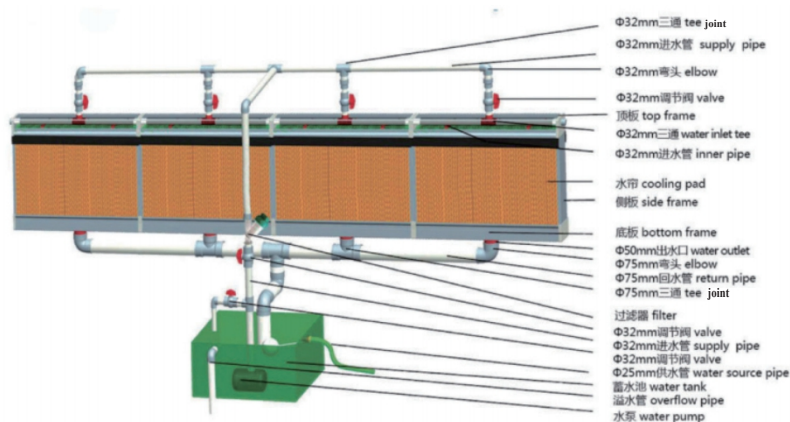

The specific three-dimensional space structure provides the largest evaporation area for the heat exchange between water and air.

Customer-oriented Option

Aluminum alloy and galvanized steel are available for the side frame.

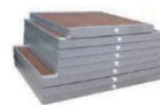

COOLING PAD

Stainless Steel Frame

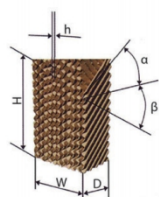

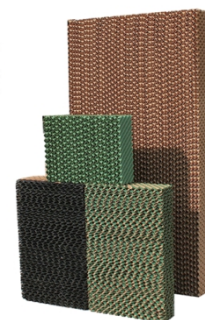

Aluminum Alloy frame

Galvanized Frame
