CEO Introduction

First of all, thank you for your interest in our company.

As CEO of NEXT PUMP company, I majored in chemistry at university.

After graduating, I worked on chemistry analysis at CHONG KUN DANG co., Ltd and KYEONG -IN Synthetic Corporation , Korea environment Water works institute for more than 10 years. I was blinded by an explosion of injustice, but I overcome the pain.

After that, I could no longer work in chemistry. However, based on my knowledge, I have started NEXT PUMP to do a little work. Thank you for your attention and thank you for reading.

🏠 NEXTPUMP Introduction

We would like to thank the customers who use NEXT PUMP first. NEXT PUMP produces our brand. The production items are metering pumps, metering dispensers, two phase dispensers, medicine metering pumps, etc. OEM pumps are also available.

In particular, Medicine metering pumps are produced in only 3 locations worldwide, including the next pump.
The medicine metering pump is also designed to be used with the metering dispenser function.
PLC and RS485 communication is possible and it can be used for all chemicals.

In addition, We deal with magnetic gear pumps, high-pressure metering pumps, piston pumps, and vacuum pumps.
NEXT PUMP also handle OEM pumps according to customer requirements.
Even programs are working to meet consumer needs.

Products

We sell various pumps, such as peristaltic pumps, infusion pumps, and gear pumps.

There are three main types of representative lines.
M series, FJ series, GM series.
Basic peristaltic pump line, M series is our best selling product. Any company can use it if it deals with a liquid.

Products

The PMP series released in July 2020 is a small powder transfer pump (and dispenser). It's our big future asset.

The powder pump can set the speed and time so you can put as much powder as you want in the bottle.
