TECHNICAL DATA

IP PROTECTION RATING

The symbol representing the protection rating against dust and moisture consists of the letters IP, followed by two special digits, whose explanation appears below:

1st special digit:

Protection against incoming solid particles.

- 0** No special protection.
- 1** Protection against incoming foreign solid objects, diameter longer than 50mm (big-sized foreign bodies).
- 2** Protection against incoming foreign solid objects, diameter longer than 12mm (middle-sized foreign bodies).
- 3** Protection against incoming foreign solid objects, diameter longer than 2,5mm (small-sized foreign bodies).
- 4** Protection against incoming foreign objects, diameter longer than 1mm (granule-sized foreign bodies).
- 5** Protection against harmful dust deposit. Incoming dust is not fully forbidden but the incoming amounts should not come into contact with parts under voltage.
- 6** Full protection against foreign bodies. Full protection from contact of any kind. Incoming dust is totally forbidden.

2nd special digit:

Protection against incoming moisture.

- 0** No special protection.
- 1** Protection against water dripping vertically.
- 2** Protection against water dripping at an angle of up to 15° from the perpendicular.
- 3** Protection against water dripping at an angle of up to 60° from the perpendicular.
- 4** Protection against water sprayed from any direction.
- 5** Protection against water jetted from any direction.
- 6** Protection against water jetted under pressure in the apparatus or situation of turbulent sea.
- 7** Protection against water when the apparatus is sunk into water at a specific depth and for a given interval.
- 8** Protection against water when the apparatus is sunk into water at a specific depth and for an infinite interval. The depth is specified by the manufacturer and should be reported together with the protection rating.

INSTRUCTIONS FOR INSTALLATION AND PROPER OPERATION OF LIGHTING FIXTURES

1. The lighting fixtures should only be installed by an authorized and qualified electrician.
2. Use the lamps suggested for the type of fixture you have chosen (as regards power and type).
3. In case of glass breakage, replace immediately.
