about us

3A Makina Ltd, with an expertise exceeding 29 years, manufactures top quality industrial products concerning storage tanks, pressure vessels, mixers & agitators and vibrating systems. Adopting absolute quality and right on time delivery principles has always been a key factor for utmost customer satisfaction and reliable engineering services.

Supplying machines and industrial solutions to many branches worldwide, 3A Makina Ltd provides unique service for its customers with its well-equipped team, engineering know-how, professional experience and flexible production capabilities.

ISO 9001 quality management system has been completely implemented since 2005 which secures customer focused approach and quality-based vision while serving clients from different continents and different countries across the world.

the facility

3A Makina Ltd facility is located in Tuzla Organized Industrial Zone, one of Turkey's largest districts for heavy industry and production. The current plant was opened in 2009. It has an enclosed production hall of 4000 square meters and an additional office area of 500 square meters for administrative and engineering operations which enables us to maintain all business activities under one roof.

As a result of integrated working environment and modern manufacturing infrastructure, we proudly present superior quality products to the market meeting special demands. Besides, wide range of tailor made projects completed so far exhibits our worldwide expertise.

storage tanks

We are providing delivery of quality stainless steel or carbon steel tanks. We strive to offer complete customer satisfaction with our competitive pricing and expert craftsmanship. Each of our tanks is finely crafted and passes through a rigid series of quality control checkpoints before shipment.

Special features of our tanks include dimpled cooling jackets and cost-effective cladding that ensure precise temperature control.

agitators

Our industrial mixers and blenders, so called agitators, are used to mix or blend a wide range of materials used in different industries including the food, chemical, pharmaceutical, plastic and mineral industries.

They are mainly used to mix different materials using different types of blades to make a good quality homogeneous mixture.

clarifiers

Our clarifiers are settling tanks built with mechanical means for continuous removal of solids being deposited by sedimentation.

They are generally used to remove solid particulates or suspended solids from liquid for clarification and thickening.

pressure vessels

Pressure vessels are probably the most widespread “machines” within the different industrial sectors.

In fact, there is no factory without pressure vessels.

More specifically, pressure vessels represent fundamental components in many sectors of enormous industrial importance.

main industries we serve

food industry

storage tanks
vibrating separators
vibrating spiral conveyors

chemical industry

storage tanks
mixers & agitators
reactors
dissolvers

water treatment industry

rapid pressure sand filters
clarifiers
mixers & agitators
grit separators
package type water treatment units
filter presses
surface aerators

construction industry

storage tanks
vibrating separators
vibrating spiral conveyors
special purpose steel productions
