10.1. LiDAR sensor

☐ Localization completion of LiDAR sensor core parts (TRL 7)

Lidar Sensor Core Technology

| 16ch TDC | Object Recognition ASIC | Lidar Chipset | LD Driver | BLDC motor | BPF | Object Recogniton & GUI |
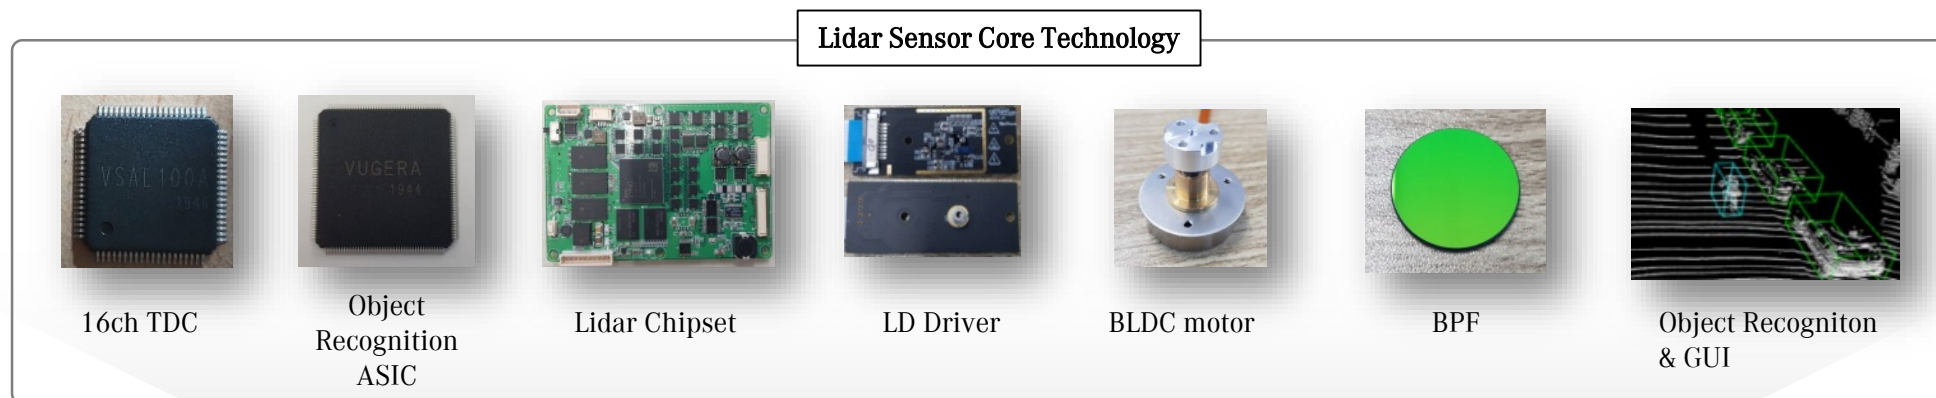

Technology Optimization
of Commercialization

10.1. LiDAR sensor

☐ Line-up

Autonomous Vehicle / ADAS

Model	VL-R16
No. of Channels	16 Channels
Light Source	905nm Eye-Safety Class 1
HFOV & Resolution	145° / 0.125°
VFOV & Resolution	9.6° / 0.6°
Scanning Frequency	30Hz(Max)
Detection Range	Up to 150m (Max)
Operating Temperature	-40℃ ~ 85℃
Input Voltage	10~32V DC
Dimension(mm)	127(W) x 90(D) x 78(H)
Field of Application	ADAS, Autonomous Vehicle(Level 2, Level 3)

ADAS / Industrial (Safety, Security, Robot)

Model	VL-R330
No. of Channels	1 Channel
Light Source	905nm Eye-Safety Class 1
HFOV & Resolution	330° / 0.25°
VFOV & Resolution	-
Scanning Frequency	15Hz(Max)
Detection Range	Up to 100m (Max)
Operating Temperature	-40℃ ~ 85℃
Input Voltage	10~32V DC
Dimension(mm)	66(W) x 78 (H)
Field of Application	Safety, SLAM, Drone, Robot

Model	VL-L1
No. of Channels	1 Channel
Light Source	905nm Eye-Safety Class 1
HFOV & Resolution	-
VFOV & Resolution	-
PRF	40Khz
Detection Range	Up to 200m (Max)
Operating Temperature	-40℃ ~ 85℃
Input Voltage	10~32V DC
Dimension(mm)	54(W) x 54(D) x 38(H)
Field of Application	Safety, SLAM, Drone, Robot

| Model	VL-R2
No. of Channels	2 Channels
Light Source	905nm Eye-Safety Class 1
HFOV & Resolution	120° / 0.25°
VFOV & Resolution	3° / 3°
Scanning Frequency	15Hz(Max)
Detection Range	Up to 100m (Max)
Operating Temperature	-40℃ ~ 85℃
Input Voltage	10~32V DC
Dimension(mm)	102(W) x 65(D) x 57(H)
Field of Application	ADAS, Safety, SLAM, Drone, Robot

10.1. LiDAR sensor

☐ Introduction : 16ch Scanning LiDAR

- Development of LiDAR sensors that provide distance and space information on target objects and structures in front of driving environment
- Development of 3D LiDAR Sensors for Autonomous Vehicles and Industrial Applications
- Low Price Realization through Localization of Core Parts
  - LD / APD / BLDC motor / Signal Processing IC,
    Object Recognition IC

- ▪ Laser source: 905nm PLD
- ▪ Distance Range: to 100m
- ▪ FOV: 145°(H) x 10°(V)
- ▪ Angular resolution: 0.125°(H) x 0.625°(V)
- ▪ Range Precision: < 10cm
- ▪ Frame rate: 30Hz
- ▪ Ingress Protection: IP67
- ▪ Object Recognition
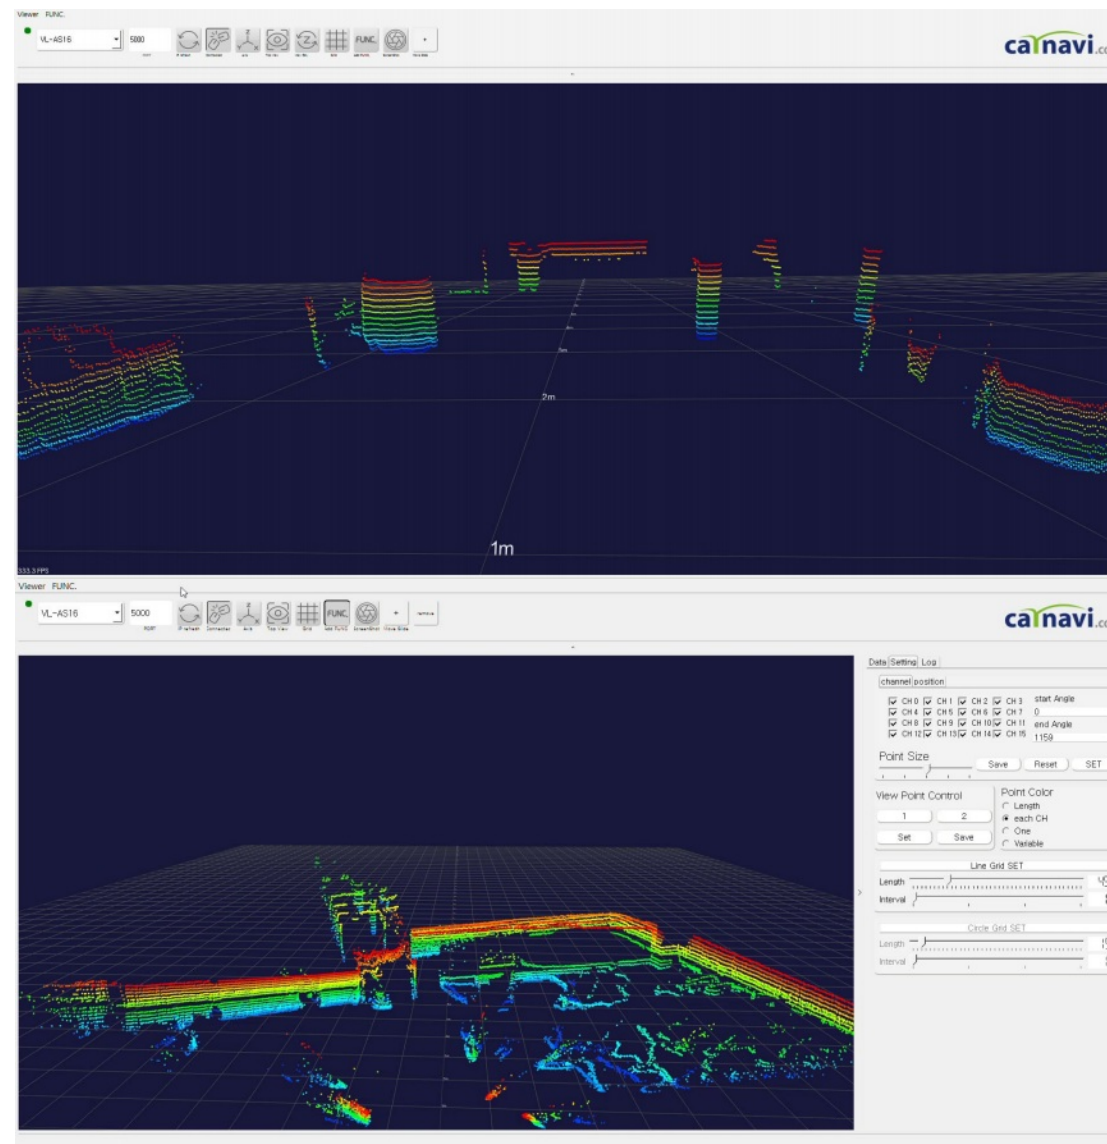

10.1. LiDAR sensor

□ Introduction : 4ch Scanning LiDAR

- Applied to [Platform Screen Door System]

- Applied to [Platform Screen Door System]

10.1. LiDAR sensor

☐ LiDAR sensor Manufacturing facility

- Simplifies and underpriced structures using a single light source

- Application of domestic technology from optical design to signal processing technology (95%)

- Completed production line establishment and secured reliability

● SMT LINE

Logistics route (Raw material & Complete product)
Worker Movement Path

Temperature : 21℃ ± 1℃
Humidity : 50% ± 3%
CLASS 1,000

Capacity

ETCS (226 Point Criterion)
- 1hr : 292Board
- 8hrs : 2,336Board (46,720 board/month)
- 16hrs : 4,672Board (93,440 board/month)
- 24hrs : 7,000Board
  (140,000 board/month, 1,680,000 board/year)

Air Conditioning Room

QM Team
Reliability Laboratory
Raw material storage

H/W 분야

- 다채널 고속 신호처리 (FPGA기반)
- 객체인식 전용 ASIC(FGPA+CORTEX M3)
- Laser diode 구동기술
- Lidar 특화 BLDC 모터
- 905nm BPF

S/W분야

- AI기반 객체인식 알고리즘
  객체인식 ASIC 기반으로 LiDAR Law data이용한 객체인식 알고리즘

- FPGA LOGIC / GUI / FW
  FPGA LOGIC 설계 및 FW설계
  온도제어 및 Walk error 저감기술
  이기종 호환 가능한 개방형 플렛폼 개발

10.1. LiDAR sensor

□ Development of technology

| MEMS Mirror	VCSEL	1550nm Laser Module
Micro Electro Mechanical Systems	Vertical-Cavity Surface-Emitting Lasers	1550nm Laser Module for LiDAR
10.2. V2X / IoT

□ Line-up

OBU (On Board Unit)

- DSRC based OBU in WAVE & ITS-G5
- Compliant with USDOT J2945/1, IEEE802.11p, 1609.x, J2735
- Support LTE (cat.4 / rel.10)

RSU (Road Side Unit)

- DSRC based RSU in C-ITS
- Compliant with USDOT RSE v4.1, IEEE802.11p, 1609.x, J2735
- Support LTE (cat.4 / rel.10)

Software Tool

- V2X performance measurement tool
- RSSI, PER (Distance, time), Mark on a map

Software 3rd service

- We support development for enabling WAVE standard software on hardware of customer.

- Display V2X services on smart phone
- Support on WAVE & ITS-G5

10.2. V2X / IoT

"From "V2X" to "IoT" for vehicle, move for leading ICT field"

2015	2016	2017	2018	2019	2020	2021	2022

CW100 | CW200 | CW300K1 | CW300K2 | CW500ref | CWR10 | CW500N1 | CW500N2 | CWRS10-KMS | Proceeding CXC-1 | Proceeding CXC-2SK | Proceeding SNP-S1
V2X Gen1

- ▪ DSRC based V2X
  - DSRC Only
  - Model: CW100, CW200, CW300K1

V2X Gen1-hybid

- ▪ DSRC + LTE Collaboration V2X
  - DSRC + Legacy LTE
  - Model: CW300K2. CW500Series

V2X Gen2

- ▪ V2X with AI Platform
  - DSRC/C-V2X, LTE/5G
  - nVIDIA Xavier, Camera I/F, Giga-Ethernet
  - Model: CWRS10, CXC-1,CXC-2SK

IoT & 5G

- ▪ Smart-Factory wireless gateway
  - WIFI6, BLE (With V2X)
  - for AGV, AMR, Mobility
  - SNP-S1

10.2. V2X / IoT

Cooperative-Automated driving Roadway System

- June, 2015 ~ July, 2020
- Role : V2X communication device part

  (LTE+WAVE Hybrid)

## Development of European ETSI message set compliant V2X system & application based on ITS-G5

- July, 2016 ~ Aug, 2019
- Role : V2X communication device part

  (ITS-G5 based on IEEE802.11p)

*European V2X (ITS-G5) Collaboration Project*

10.2. V2X / IoT

V2X communication system application for central control and vehicle control of autonomous car

- Target : KIA motors Slovakia plant
- RSU and OBU installation inside the plant (DSRC 4 channels applied)
- Wireless(DSRC) connection through the entire line (V2I, I2V, I2I)
- Video streaming of front view camera from vehicle using DSRC
- Hand-over technology for I2I communication

Assembly

RSU #10

RSU #20

RSU #30

Distance : 850M

[Autonomous driving section]

RSU

Monitoring S/W Tool

OBU

Industrial WLAN wireless device & management system (Smart factory)

- Wireless device development for information exchange and data processing of mobility, AGV, AMR, etc.
- Management tool development for device condition diagnosis and check
- WiFi6 dualization implementation
- Roaming function between V2X device and WiFi6 of Mobility

Confidential

10.3. DCU

□ Roadmap

★ Sensor: Camera, LiDAR, Radar

- Front & Rear Camera module
- Sensor fusion DCU
- DCU with LTE
- For security & Disaster

- AI based marine DCU module
- DCU with V2X
- For Marine

| 2021 | 2022 | 2023 | 2024 | 2025 |

- Front Camera module
- Sensor fusion DCU
- DCU with WiFi
- Industrial PoC

- AI based DVR module
- AI based Sensor fusion DCU
- DCU for unmanned vehicles
- For Robots & Drones

- AI based Automotive(L3) DCU
- For Automotive

| platform | Industrial | Marine | Automotive |

10.3. DCU

☐ Camera module

| Front Camera	Front & Rear Camera	DVR

Front Camera

AI-based front camera can recognize lanes, vehicles, and traffic lights, and can implement various functions with a simple structure

- Traffic Light Recognition
- Forward Collision Warning
- Lane Departure Warning System
- Forward Vehicle Start
- AI-based object recognition (Vehicle, Pedestrian)

Front & Rear Camera

AI-based front and rear cameras can recognize lanes, vehicles, traffic lights and rear obstacles, and can implement driving and parking assistance functions.

- Traffic Light Recognition
- Forward Collision Warning
- Lane Departure Warning System
- Forward Vehicle Start
- Rear video support
- AI-based object recognition (Vehicle, Pedestrian, two-wheeled vehicle)

DVR
AI-based surrounding camera enables All directions monitoring around the vehicle, and can recognize obstacles around the vehicle.

- Traffic Light Recognition
- All directions (360°) Collision Warning
- Lane Departure Warning System
- Forward Vehicle Start
- Parking assistance system
- AI-based object recognition (Vehicle, Pedestrian, two-wheeled vehicle, facilities)
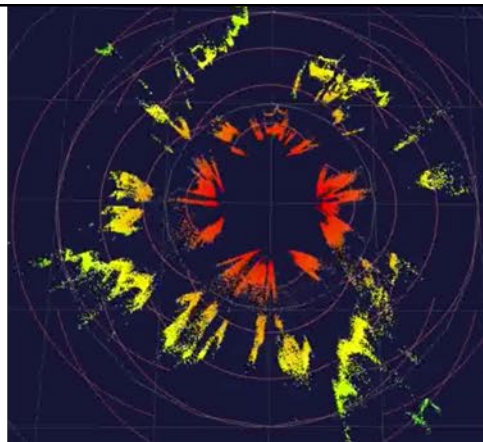

10.3. DCU

☐ Sensor Fusion DCU

Sensor Fusion(Camera+LiDAR) DCU
Sensor fusion DCU can recognize objects based on deep learning using Cameras and Lidars.

- Deep learning object (vehicle, person) recognition
- Physical object size awareness
- Object status (distance, speed) information recognition
- Matching Video and point cloud

Multi-LiDAR DCU

The multi-Lidar DCU can recognize the surrounding situation by matching the point cloud output from multiple Lidar sensors.

- Object recognition in all directions (360°)
- Physical object size awareness
- Object status (distance, speed) information recognition
- Matching point cloud

Sensor Fusion(Cam+LiDAR+Radar) DCU

Sensor fusion DCU provides information for autonomous driving (L3) by accurately recognizing the surrounding environment by integrating Cameras, Lidars, and Radars.

- Matching front image and point cloud
- Create side and rear point clouds
- High detection distance/recognition accuracy
- Alignment of rear image and point cloud

10.3. DCU

☐ DCU w/ Network

| DCU with WiFi | DCU with LTE | DCU with V2X |

Real-time monitoring is possible by recognizing the surrounding environment using various sensors and interlocking with the control system using wireless communication (WiFi).

- Sensor fusion (Camera + Lidar)
- Indoor environment monitoring
- For Indoor Robot
- Indoor control system

Real-time monitoring is possible by recognizing the surrounding environment using various sensors and interlocking with the control system using wireless communication (LTE).

- Sensor fusion (Camera + Lidar)
- Outdoor environment monitoring
- For Outdoor Robot
- Outdoor control system

Camera → object 인식 및 정보 → DCU → 객체 인지 정보 (보행자, 차량, 위치 등) → V2X

LiDAR → object 인식 및 정보 → DCU

Real-time monitoring is possible by recognizing the surrounding environment using various sensors and interlocking with the control system using wireless communication (V2X).

- Sensor fusion (Camera + Lidar + Radar)
- Vehicle condition monitoring
- Linkable with RSU
- For Autonomous Vehicle
- Traffic situation control system

cannavi.com

10.4. Marine-safety

☐ Marine navigation (based on S-57)

- Emergency distress signal transmission function
- Entry and departure report function
- Route search function (reflection of location information of islands, water depth, facilities, farms, dangerous goods)
- Warnings and alarms when operating in dangerous and prohibited areas
- Dangerous attitude automatic alarm transmission function

☐ Maritime unmanned vessel technology
- Accurate recognition of facilities and obstacles in narrow waterways and berths
- Longer detection distance than land (0.3km ~ 1km)
- Applicable to autonomous ships and collision avoidance
- Securing visibility in sea fog or at night
- Automatic recognition of objects
- Multiple LiDAR/RADAR combinations are possible depending on the vessel size and purpose

10.4. Marine-safety

☐ e-Navigation service

- Constructing a new system by adding services to fishing vessels and coastal small vessels to IMO's e-Navigation concept
- Electronic navigation chart and marine safety information display conforming to S-10X standard
- Route plan establishment

☐ Distress location transmitter

- Sailor's position transmitter (radio sensitivity, fall detection, position detection, distress signal, seawater detection, impact/input, etc.)
- Sailor's distress location receiver (communication detection, location detection, signal detection, ship location, distress signal, etc.)

☐ NVR for small vessel

- Real-time video check through mobile device
- Self impact sensor and location recording
- Save record for video camera
- AIS information record, which is the information of nearby sailing vessels
- Save voyage records

10.5. Dashcam/ETCS

Supply exclusive Dashcam to Mercedes-Benz Korea, Strength in B2B market and PIO business

Supply exclusive ETCS to Mercedes-Benz Korea, Developing next-generation ETCS

● Starview S (MBK exclusive)

◇ Exclusive Dashcam to Mercedes-Benz
◇ Sony Exmor R STARVIS Sensor
◇ Front Full HD + Rear Full HD 2Ch
◇ Forward Vehicle Start Alert
◇ Dual Save
◇ Format Free
◇ Low Voltage Block
◇ Voice Guidance System
◇ Audio Recording
◇ PC Viewer Support
◇ External GPS Support (Standard)

● VG-Legend (B2B and Aftermarket)

◇ Sony Exmor R STARVIS Sensor
◇ Front/Rear Full HD 2Ch
◇ Forward Vehicle Start Alert
◇ Lane Departure Warning System
◇ Forward Collision Warning System
◇ Dual Save
◇ Format Free
◇ Low Voltage Block
◇ Voice Guidance System
◇ Audio Recording
◇ PC Viewer Support
◇ External GPS Support (Option)

ETCS
