PRODUCTS

Recorder

01. HEAD JOINT

- As the air passes through the beak to the windway,
- it resists air column which is formed inside of recorder player and interacts.
- Also, it rubs against around the labium edge and creates sound.

02. MIDDLE SECTION

- There's connection between the head joint and middle section.
- Also, the holes that determine range of sound and tune helps players to play music more beautifully.

03. FOOT JOINT

- It determines the volume.

04. GERMAN TYPE & BAROQUE TYPE

The German and Baroque types can be distinguished with the size of 5th hole in the middle section.

- **German type:** The holes are smaller than Baroque type. Recommendable for beginners.
- **Baroque type:** It's traditional recorder. Recommendable for intermediate players who want to play with different range.
