WonderCutter S

EVEN MORE POWERFUL

CUT ANYTHING YOU WANT.

For WONDERCUTTER, cutting plastic is as easy as cutting cheese.

CUTRA

< Application areas >

3D printing

To post-process your 3D printed parts smoothly and clearly

D.I.Y

To do architecture modeling easily and safely

Plastic model

To assemble plastic figure kits sharply and finely

40,000 Vibrations per Sec.

With the vibration on the point of a cutter, it constantly applies friction to materials.

Various Applications

You can cut various materials such as plastic, rubber, PVC Foam board, etc.

Portable

Designed to be carried on the waist as it only weighs 750g.

Easy to use

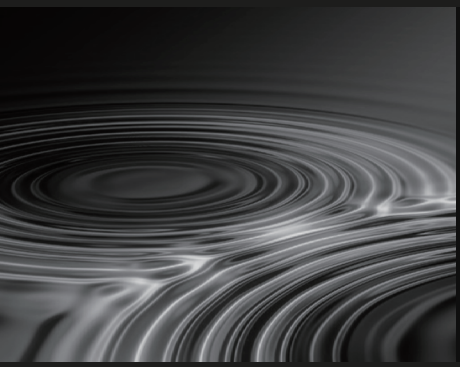
Even people with not as strong handgrip can use the product easily.

Rechargeable

Since the rechargeable batteries are built in, there are no space constraints.

Low Power

30W of power allows you to save electricity as energy consumption is comparably lower.



Fast

Vibrations of 40,000times/sec.
Maximize efficiency & Minimize heating.

Delicate

With WONDERCUTTER, anyone can become an expert at making plastic model, accessary, and DIY products.

Easy

It is easier and safer to use if you put it on your desk or carry it on your waist when you use it.
