## Constant Challenge

**We challenge constantly.**

The company's own research institute, which employs more than 40 researchers with master's degrees and doctoral degrees, concentrates its research capabilities to create customer-oriented value and develop competitive products in the global market. Through this, we are making efforts to become a global cosmeceutical manufacturer.

## Honest Products

**We honestly develop our products.**

We strive to make good products honestly for the health and beauty of our customers. We strictly exclude harmful substances for the human body, consider customers to be the first priority, and produce products through strict quality control from raw materials to product shipment.

## Eco Friendly Company

**We also consider the environment.**

The customer value of Korea Prime Pharm is not limited to mankind.  
We are committed to protecting the natural environment,  
animals and plants so that mankind can live a healthy and beautiful life.

## Meet Customer Needs

**We communicate with open mind.**

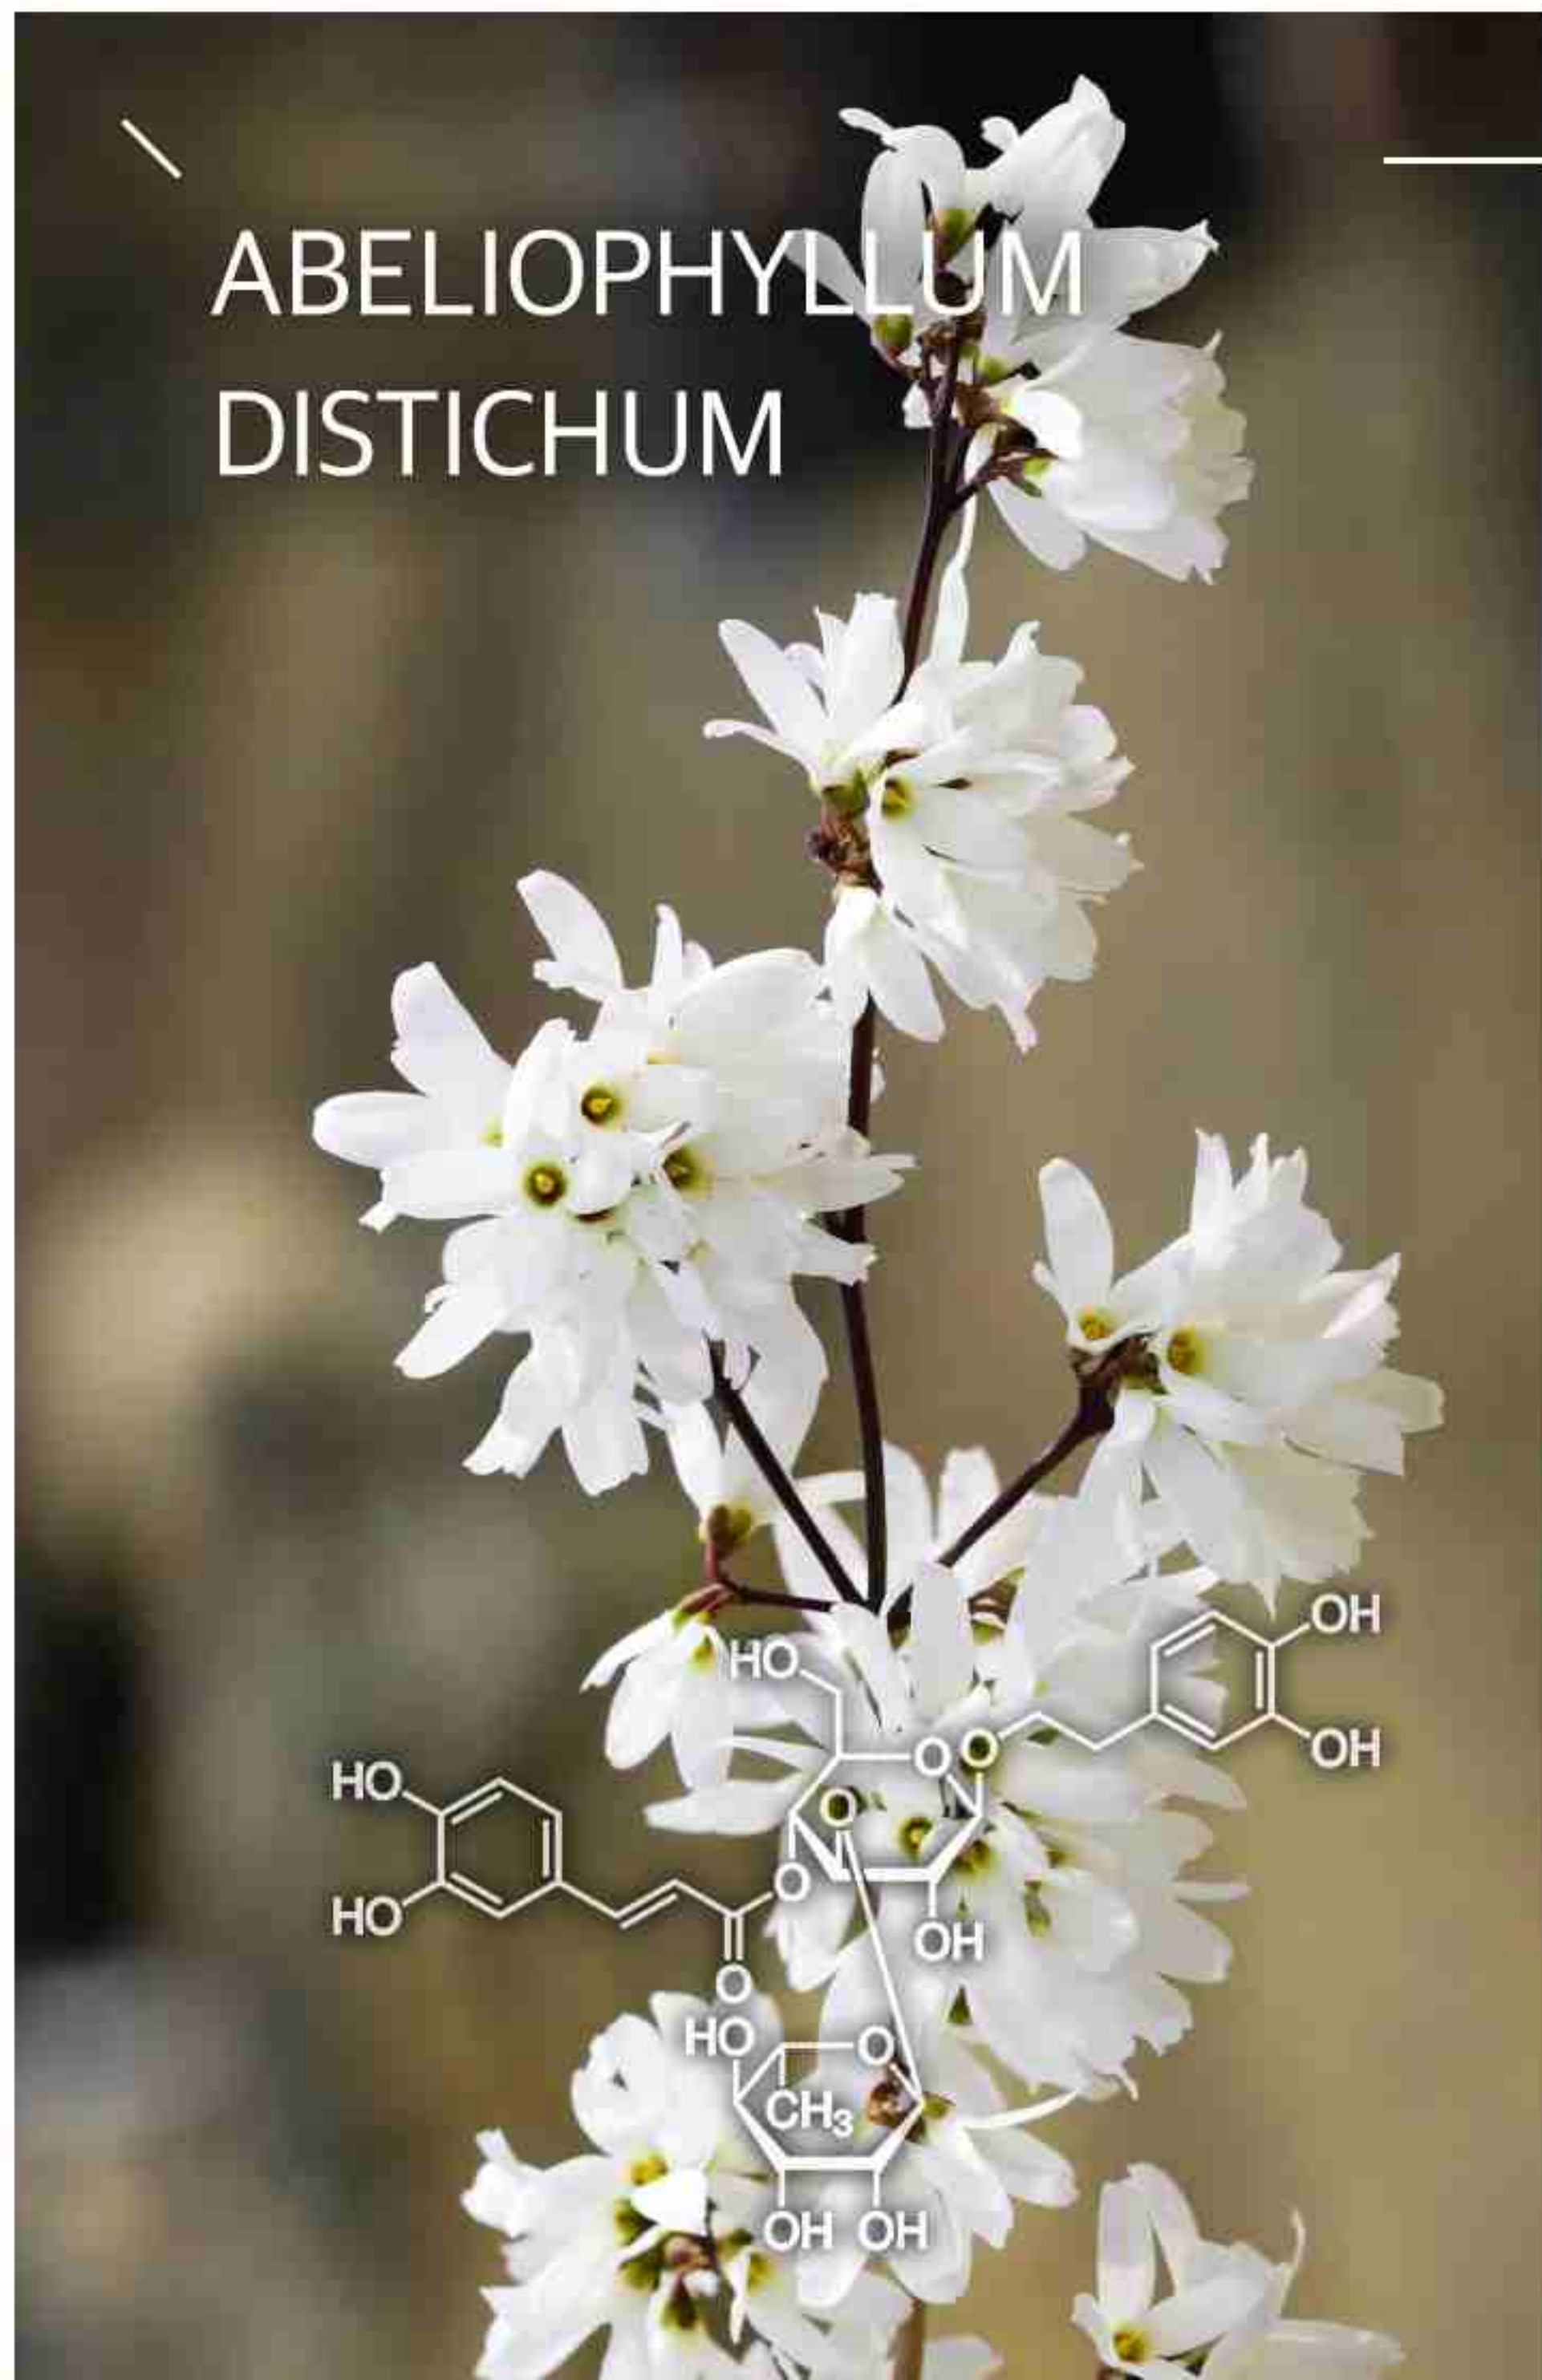

We will always communicate and share information for our clients' business success.  
With the belief that our clients' success is our success, we provide customized ODM total consulting from product planning to sales.

# Our Special Ingredients

Raw material plants with healthy natural vitality are the starting point of bioengineering pursued by Korea Prime Pharm.

Korea Prime Pharm has tried to protect the health and beauty of mankind by studying the healthy vitality of nature and its beneficial effects on the body. In particular, we have observed and studied the efficacy of lesser-known plants in the East and West to develop special skin regeneration techniques unique to Korea Prime Pharm..

**Abeliophyllum distichum** contains polyphenol, about 10 times the amount of green tea, which helps smooth the skin. It contains a large amount of acteoside that help your skin's vitality. We grow and develop Abeliophyllum distichum directly at our subsidiary Prime Farm.

**Black berry** black pearl varieties contain anthocyanin, vitamin C, amino acids, etc., which are superior to the existing ones. It's a unique Korean-style version of the upgraded which has been improved to better fit our land.

The Household&Health care of Korea Prime Pharm is developing with society as a basic concept of life-respect.

In order to implement the corporate ideology of enterprise for human health, the Korea Prime Pharm Research Institute strives to develop new chemical and bio new drugs, leading cosmetics research, and to develop as a global company through various research and technology marketing cooperation.

It's not dry after shower  
Moisturizing charge

Using plants of natural  
surfactants  
Mild and creamy foam

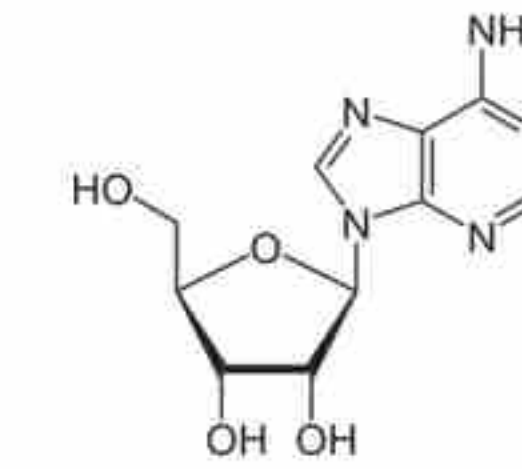

Safe ingredients  
EWG ALL GREEN

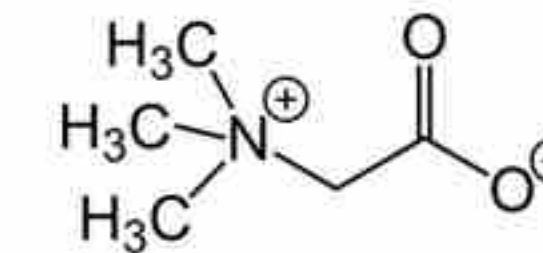

Safe and low irritation  
Free of 20 harmful  
ingredients

AFTER SHOWERING,  
DO NOT DRY AND  
SUFFICIENTLY MOISTURIZING.

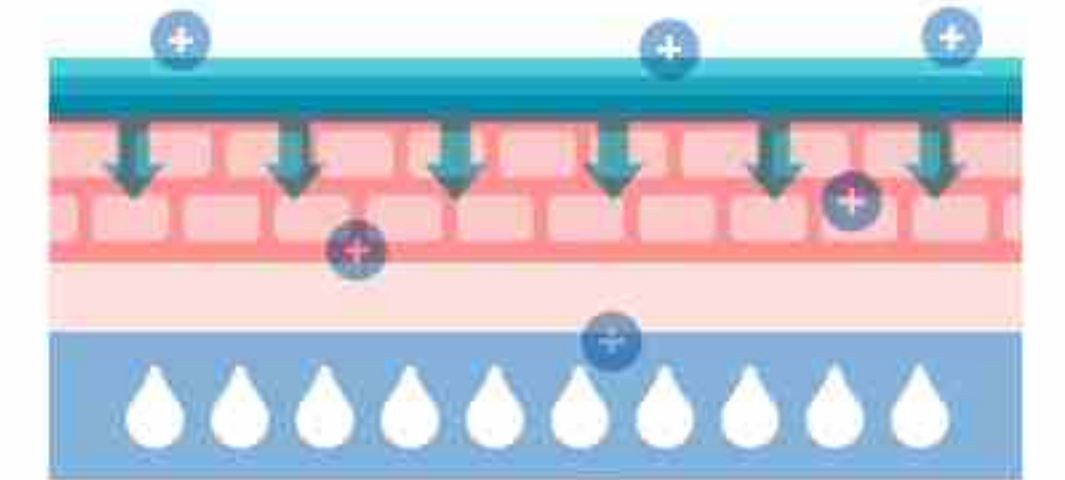

Allantoin and Betaine help moisturize the skin and  
nourish and moisturize the skin after rinsing.

ALLANTOIN

BETAINE

## MILD AND CREAMY FOAM WITH NATURAL SURFACTANT

The soft, creamy foam cleans the scalp and hair  
without irritation, leaving the moisture needed to  
remove waste from the scalp.

Using natural surfactants, the preservatives are not  
used, which is environmentally friendly and has less  
irritating to the skin.

## Oral absorption collagen film V-Fit

1BOX / 60ea (12g)

### The secret of getting prettier in one's sleep

Contains three natural product compounds that have completed patent applications through in-house research and development. Increase skin elasticity with high collagen absorption rate through mouth mucous membrane. Excellent for improving wrinkles, improving percutaneous density, anti-aging, anti-bacterial (chirac) and anti-inflammatory improvements.

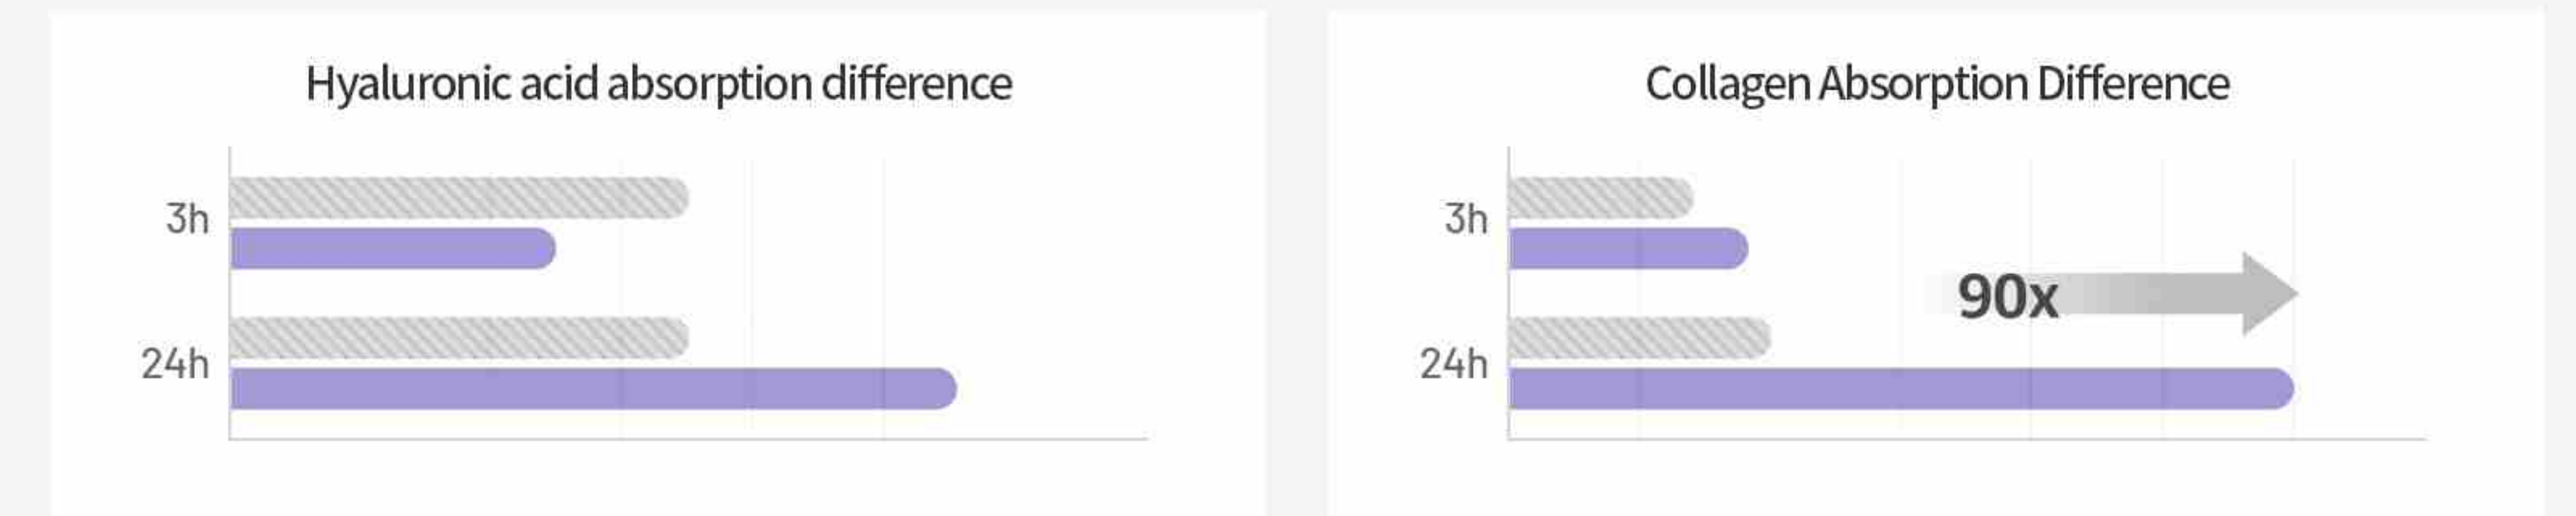

- Oral film form with higher absorption rate
- Comfortable absorbing natural extract
- Low-molecular hyaluronic acid of rapid absorption
- Fish Scale Collagen low-molecular collagen
- Elastine amino peptide content
- For busy modern people Easy absorption twice a day

## Results of Differences in Absorption Capacity between Oral Viscosity and Skin

A Study of Taijo Taniguchi, a professor at Himeji-Tokyo University in Japan

Public Patent  
10-2017-0131542

● Skin Absorbing  
● Current Membrane Absorption

## HIGH COLLAGEN ABSORPTION RATE THROUGH ORAL MUCOUS MEMBRANE

Absorption of facial dermis through oral mucous membrane

V-Fit

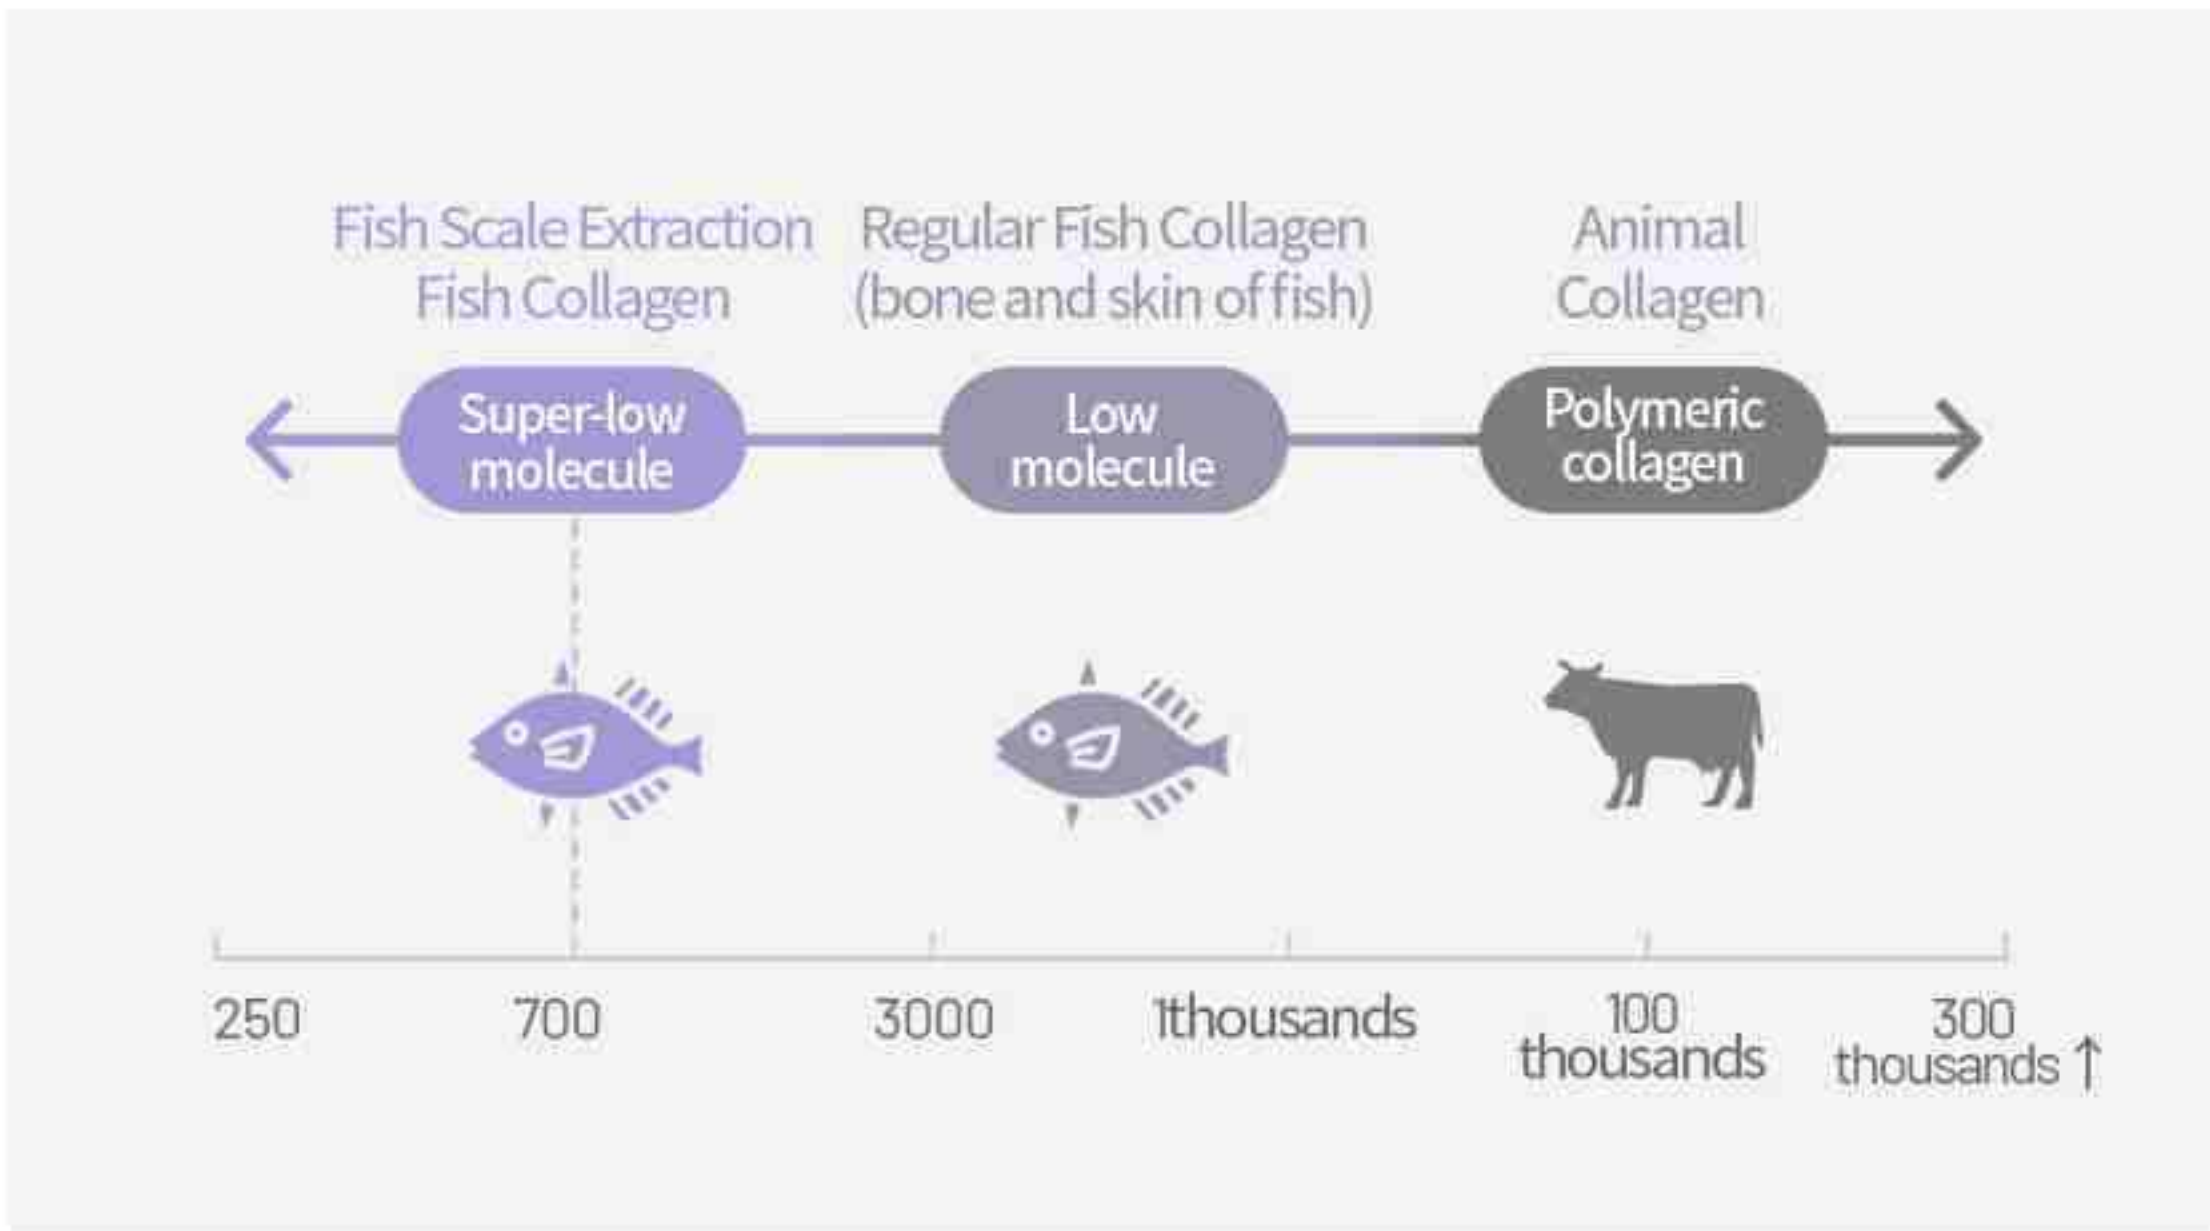

Absorption through skin envelope by applying cosmetics

90 X!

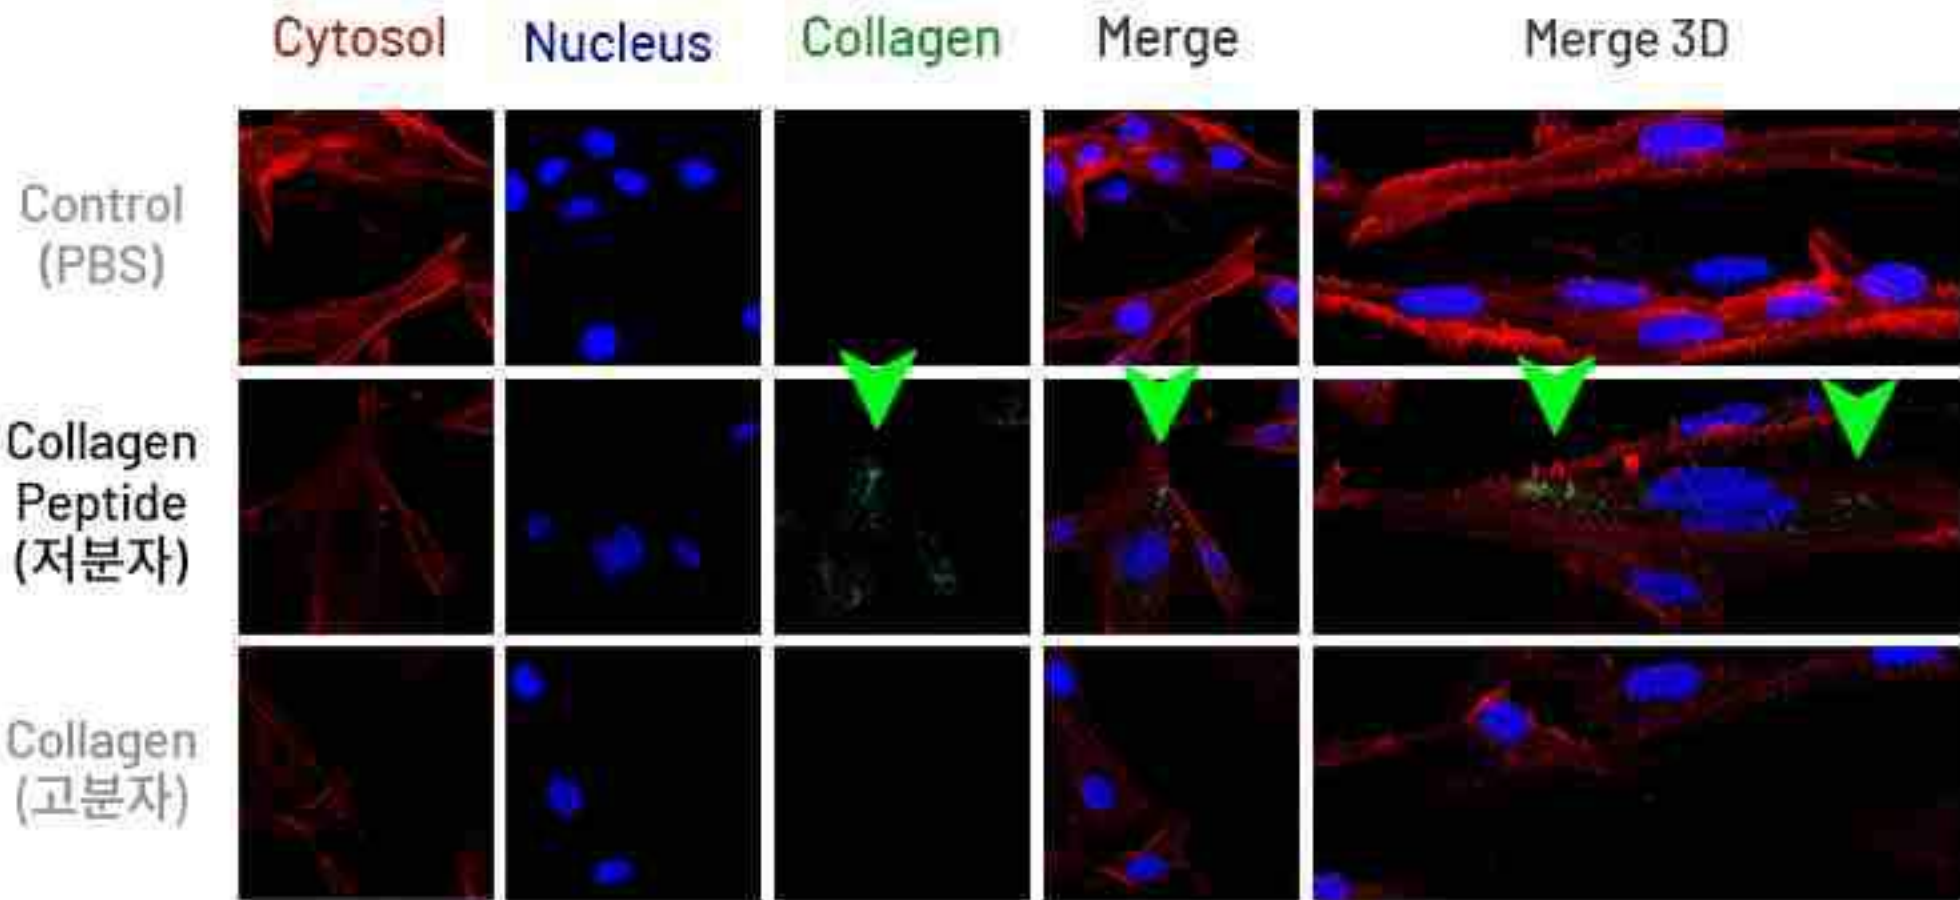

Fish Scale Collagen  
low-molecular collagen

Low-molecular collagen has much faster absorption in the mouth than in the high-molecular.

Cell absorption of low-molecular collagen

The rate of low-molecular collagen being absorbed into cells is much better than high-molecular collagen.

The arrow mark on the image is a low-molecular collagen absorbed by the dermis.

Contains more comfortable natural extracts
