TABLE OF CONTENTS

Company profile-----	2
Hydraulic filters-----	3~4
(Hydraulic filters detailed products-----13~18)	
Gas and Air filters-----	5~8
(Gas and Air filters detailed products-----19~22)	
Oil mist filters-----	9~10
(Oil mist detailed products -----23)	
Dust filters -----	11~12
(Dust filters detailed products-----24)	

COMPANY PROFILE

Our Main products:

- (1) Dust filter elements for environmental protection equipment cartridges, industrial gases, industrial dust, coating equipment, dust filter elements, sterilization and deodorization filter elements, and powder recovery filter elements.
- (2) Oil filter elements for Industrial oils, fluid filtration, hydraulic, lubrication systems, high precision and non-standard filter elements, pipeline filter elements, local production of imported filter elements.
- (3) Air filter elements, oil filter elements, oil-gas separation filter elements, engine oil filter elements, diesel filter elements, and various filters for air compressors, generator sets, and fans.
- (4) Air filter elements, engine oil filter elements, oil filter elements, oil-water separator filter elements, and oil-gas separator filter elements for large units, gas turbines, and ships.
- (5) Design and production of non-standard filter elements for various machinery.
- (6) High-efficiency, multi-functional high-precision filter oil vehicles and filter elements used in various filter oil vehicles.
- (7) Primary, medium, and high-efficiency filters for central air conditioning and fresh air supply units.
- (8) Natural gas filter elements for urban gate stations of gas pipelines, and filter elements for pipeline distribution of coal gas.
- (9) Oil-gas separation filter elements for large machine tools, general lathes, and CNC lathes.
- (10) Oil filter elements, dust filter elements, and gas purification filter elements for various pipeline systems.

Our filter products are widely used in metallurgy, petroleum, chemical, electric power, coal, mining, pharmaceutical, shipbuilding, food, construction machinery, energy and other industries.

Hydraulic filters detailed products-----13-18

Product features

- 1.The hydraulic filter is installed directly in the fuel tank, simplifying the piping, space-saving;
- 2.With a self-styled valve maintenance system, oil in the tank would not be drawn;
- 3.With automatically turned on (the pressure is 0.4MPa) bypass valve;
- 4.With a magnetic device can filter the ferromagnetic particles above 1 micron oil;
- 5.A good filter performance, can play a 2-200um filter granularity are a surface of filter performance;
- 6.The flow of fluid penetrating the filter layer is uniform, long filter life.

Our hydraulic filter elements adopt imported depth type material, gradient pore size structure, gradient filtration, which can maximize the activation of particles and improve the service life. The use of high-tech support materials can not only play a role in supporting the filter material from compression deformation, but also protect the material from damage during processing. It adopts a special spiral wrap to make the filter layer firmly connected, and at the same time, the fixed folding distance ensures that the flow of fluid through the filter layer is uniform: it not only improves the pressure drop, but also prolongs the service life of the filter element.

Hydraulic Filter Standard Parts

- Gas Filter Standard Parts
- Air Filter Standard Parts
- Oil Mist Filter Standard Parts
- Dust Filter Standard Parts

Gas filters

Gas and Air filters detailed products-----19-22

Main parameters

Working pressure: 0.4MPa、1.6MPa、4.0MPa、6.4MPa

Connecting flange: ANSI 150/300/600 RF PN 16/40/63/100 RF Working

temperature: -10~+50°C The filtering precision: 3μm、5μm、10μm、20μm、50μm、100μm、120μm、140μm, etc.

Filtration efficiency of filter: 99.9% to 3μm (dependent selection of filter precision) above Solid particles Medium: natural gas, artificial coal gas, liquefied gas and other non-corrosive gas

Design specifications: ASME VIII Div.1、GB150、EN13445 Structure: acircular, semicircular

Filter material: polyester fiber, stainless steel wire mes

Polyester fiber

Stainless Steel Wire Mesh

Gas filter applied in natural gas, artificial gas and other non-corrosive gases, such as nitrogen, carbon dioxide, propane, butane, gas-liquid and liquid-solid separation. Can effectively filter pipeline dirt and pipe wall spalling fragments, to ensure that the gas gas equipment safe operation, meet pipeline and users of natural gas quality requirement.

Gas filter resistance, large filtering flow, pollutant carrying capacity, long service life. In the production process of fiber diameter and gap adjustable filter, microporous layer small outer layer increases the flow and pollutant capacity, the filter element is not easy to block, prolongs the service life. Gas filter is mainly used in natural gas purification plant, pipeline station, city gas pipeline network, gas power plant, natural gas plant, coking plant, metallurgical plant, non-corrosive gas metering and so on many occasions before the gas purification.

Gas turbine, air compressor filters

Large filtration flow, low resistance, high filtration efficiency

Gas and Air filters detailed products-----19-22

Air compressors in the long high-speed operation, due to excessive dust, or lead to shorten the useful life of equipment, affect the production schedule, self-cleaning air filter, compressed air equipment essential equipment.

Product features

1. Cartridge using special media production of the imported gas turbine;
2. Filtering the flow, low resistance, high filtration efficiency;
3. A variety of different types of media to meet the requirements of a variety of environmental conditions;
4. Wide pleat design increase filtration area, ensure the filtering flow;
5. Components of the use of galvanized metal pieces, not easy to rust;
6. Special sealing the elastomeric obturator chloroprene rubber

Gas turbine, air compressor inlet filter cartridge applications in various industrial all type of compressed air station, especially in multi-stage centrifugal, screw and vane air compressors, iron and steel plant blast furnace induced draft fan, oxygen plant raw materials, air compressors, gas turbines and diesel engines of various capacity, chemical fiber textiles and electronics industry, air conditioning system, the dust concentration in demanding central air conditioning system.

Technical parameters

Wide fold away design, ultra-high efficiency filter 99.99%-0.5um selection of the U.S. H_v filter, a large amount of ventilation, the top opening, bottom opening, the bottom of the back cover, with reduced mounting holes, galvanized corrosion resistant metal structural parts, rubber seal, such as high requirements, working conditions, can be used three filters, rain gate or coarse filter cotton for a filter, three HEPA filter.

Applications: can be applied to GE, SOLAR, SIEMENS, Altom, MITSUBISHI, companies such as gas turbine air intake filter.

Oil mist filters

Oil mist detailed products ----- 23

Advantages of Oil Mist Separator:

Easy Installation、High Efficiency、Noise Reduction、Long Life、Full Range

Product features

1. Multiple mounting options
2. Constant high efficiency for oil mist removal up to 99.95%
3. Low cost maintenance
4. Compact & lightweight

Standard parts for oil mist filter element:

OM/WS250 COM/WS500 OM/WS1000 OM/WS1500

Applications:

Oil mist separators can be used in any application where extreme high efficiency is required, and are especially useful for dealing with the following conditions:

Applications where heavy, dry smoke is generated along with the mist.

Applications that produce very fine mist particles which may sometimes bypass the impaction process, (jobs that run at very high spindle speeds, high-pressure coolant, etc.).

Great for:

CNC Lathes, Machining Centers, Grinders, Swiss-Style CNC's, Screw Machines, EDM Machines, Manual Lathes, Milling Machines, Injection Molding Machines, Rotary Transfer Machines, Gear Hobbers, Cold Heading Machines, Aqueous Parts Washers, Vacuum Pumps, Printing Presses, Baking Lines, Some Heat Treating Processes

Dust filters

Polyester anti-static, oil proof, waterproof coating, flame retardant

Dust filter cartridge standard component	
Polyester	G3266/G3566
Polyester anti-static	GS3266/GS3566
Polyester oil and water resistant	G03266/G03566
Polyester film coating	GP3266/GP3566
Polyester flame retardant	GF3266/GF3566
Polyester flame retardant film	GPF3266/GPF3566
Polyester anti oil, waterproof, anti-static	GOS3266/GOS3566

Dust filters detailed products-----24

Product features

1. The import filter: 100% polyester fiber, filter surface is smooth;
2. The highest filtration efficiency of over 99.99%, cartridge pulse pleated knot compact structure, saving floor space;
3. Use of integrated design, good sealing performance, easy installation, to shorten the replacement time;
4. The gasket can be applied to different temperature conditions;
5. The form of joint installation: three ears cast aluminum, rubber and iron end caps and so on.

SINOAMPLE is a professional of the Yangtze River Delta region dust cartridge manufacturer, and success of the localization of imported dust cartridge manufacturer, filter selection of the United States Hv, Japan filter, filter Germany, the UK filter, France filter, South Korea filter, many cartridge filter self-cleaning filter production agreed on a point of supporting enterprises.

Our main products cartridge series: composite fiber cartridge, long-fiber polyester cartridge, film cartridge, nano-technology cartridge, welding fume cartridge, pulse length cartridge pleated, high winds cartridge, high-precision cartridge high temperature cartridge, anti-static cartridge, flame retardant: cartridge, playing sand shot blasting cartridge, stainless steel precision cartridge, tobacco cartridge, air conditioning cartridge, vacuum cleaners special filter.

The company is committed to environmental protection industry, to create cleaner production and living space for purpose, and constantly exceed customer expectations.

Hydraulic filter element standard parts

Model:0030D
Size:φ35.6*φ12.2*94.0mm
Filtering accuracy:10μm

Model:0060D
Size:φ47*φ22.5*84mm
Filtering accuracy:10μm

Model:0160D
Size:φ69*φ34*110mm
Filtering accuracy:10μm

Model:0240D
Size:φ69*φ34.2*173mm
Filtering accuracy:10μm

Model:0110D
Size:φ47*φ22.5*153mm
Filtering accuracy:10μm

Model:0140D
Size:φ47*φ22. 2*193mm
Filtering accuracy:10μm

Model:0330D
Size:φ90.5*φ48.5*166mm
Filtering accuracy:10μm

Model:0500D
Size:φ90.5*φ48.2*253mm
Filtering accuracy:10μm

Hydraulic filter element standard parts

Model:0280D
Size:φ69*φ34.5*357mm
Filtering accuracy:10μm

Model:0660D
Size:φ90.2*φ48.2*328mm
Filtering accuracy:10μm

Model:0990D
Size:φ90.2*φ48.2*482.6mm
Filtering accuracy:10μm

Model:0850R
Size:φ114.5*φ68*412mm
Filtering accuracy:10μm

Model:0060R
Size:φ52*φ22*103mm
Filtering accuracy:10μm

Model:0160R
Size:φ73.5*φ34.2*144mm
Filtering accuracy:10μm

Model:0110R
Size:φ52*φ22*171mm
Filtering accuracy:10μm

Model:0240R
Size:φ73*φ34.3*203mm
Filtering accuracy:10μm

Hydraulic filter element standard parts

Model:0330R
Size: $\phi 94 \times \phi 48 \times 194$ mm
Filtering accuracy: $10\mu\text{m}$

Model:0500R
Size: $\phi 95 \times \phi 48.2 \times 254$ mm
Filtering accuracy: $10\mu\text{m}$

Model:2600R
Size: $\phi 143.5 \times \phi 96.5 \times 921$ mm
Filtering accuracy: $10\mu\text{m}$

Model:0950R
Size: $\phi 143 \times \phi 96.5 \times 325$ mm
Filtering accuracy: $10\mu\text{m}$

Model:0660R
Size: $\phi 114.5 \times \phi 68 \times 330$ mm
Filtering accuracy: $10\mu\text{m}$

Model:1300R
Size: $\phi 143.5 \times \phi 96.5 \times 481.5$ mm
Filtering accuracy: $10\mu\text{m}$

Model:1700R
Size: $\phi 114.5 \times \phi 68 \times 792$ mm
Filtering accuracy: $10\mu\text{m}$

Gas filter standard parts

Model:G0.1
Size:φ35*φ18*59mm
Filtering accuracy:50μm

Model:G0.2
Size:φ50*φ28*55mm
Filtering accuracy:10μm

Model:G1.5
Size:φ120*φ69*210mm
Filtering accuracy:50μm

Model:G2.0
Size:φ165*φ86*270mm
Filtering accuracy:50μm

Model:G0.5
Size:φ83*φ35*123mm
Filtering accuracy:50μm

Model:G1.0
Size:φ95*φ50*165mm
Filtering accuracy:50μm

Model:G2.5
Size:φ200*φ110*283mm
Filtering accuracy:50μm

Model:G3.0
Size:φ252*φ138*320mm
Filtering accuracy:50μm

Gas filter standard parts

Model:G3.5
Size:Φ299*Φ186*256mm
Filtering accuracy:50μm

Model:G4.0
Size:Φ299*Φ186*415mm
Filtering accuracy:50μm

Model:G5.0
Size:Φ390*Φ246*470mm
Filtering accuracy:50μm

Model:G6.0
Size:Φ475*Φ320*625mm
Filtering accuracy:50μm

Model:GX3266
Size:Φ324*Φ213*H660mm
Filtering level:F8

Model:67731158/67731166
Size:595*Φ595*292mm/595*Φ595*38mm
Filtering level:F8

Air filter standard parts

Model:ZGX4366
Size: Φ445/324* Φ330/213*H660mm
Filtering level:F8

Model:5959-0101-20/5929-0101-10
Size:595*Φ595*292mm/595*Φ595*38mm
Filtering level:F8

Standard parts for oil mist filter element

Model:OM/WS250
Size:φ300*φ210*H250-φ8mm
Filtering accuracy:0.3μm

Size: 300* 210*H250- 8mm
Model:OM/WS500
Size: φ350*φ237 *H230-φ10mm
Filtering accuracy:0.3μm

Model:OM/WS1000
Size:φ429*φ305*H280-φ10mm
Filtering accuracy:0.3μm

Model:OM/WS1500
Size:φ500*φ375*H330-φ10mm
Filtering accuracy:0.3μm

Dust filter standard parts

Model:G3266
Size:φ324*φ213*H660mm
Filtration efficiency:100%(Particles≥5μm)

Model:G3566
Size:φ352*φ241*H660mm
Filtration efficiency:100%(Particles≥5μm)
