Star Vertical Casket

A vertical aluminium system of pioneering design, using gelatine - canvas or another material to protect from all weather conditions.

Designed in order to provide easy adaptation, top aesthetics and resistance to weather conditions, this is the recommended solution for large outdoor spaces, restaurants and recreation areas.

Innovation

Innovative Coverage Systems

In our systems, great emphasis is put on increasing reliability and upgrading functionality, on application practicality, on ease of use and on achieving a high aesthetical result in the final installed product.

In this context, we consider the following to be noteworthy:

LED lighting system:

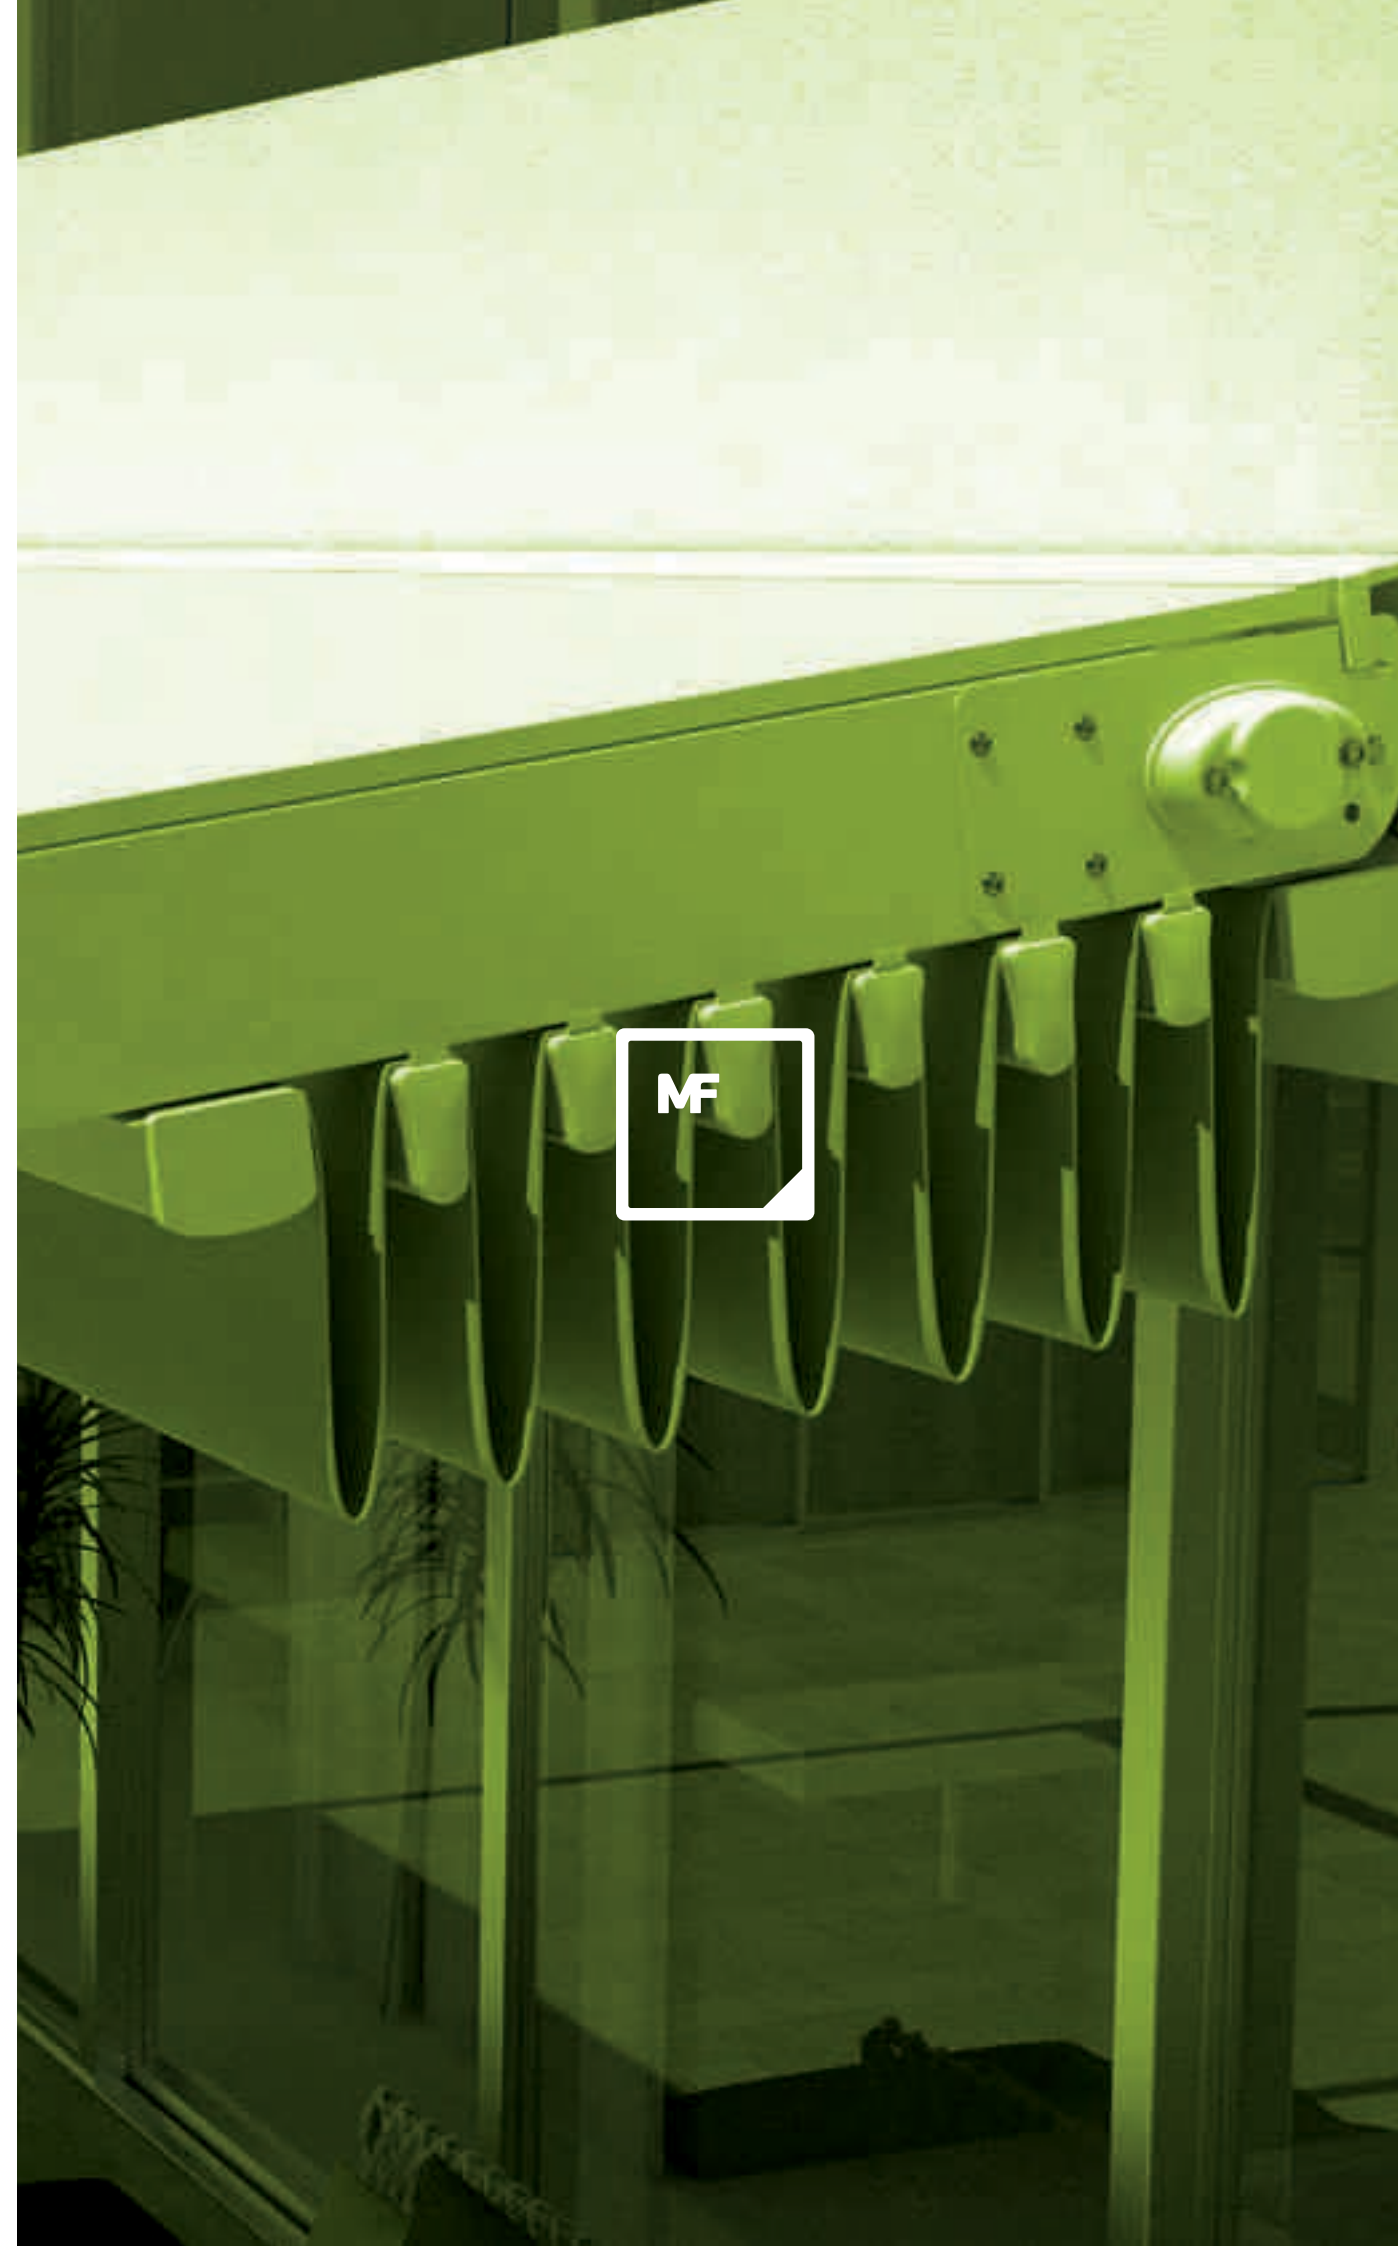

Specially adapted collection of lighting fixtures and accessories, with Light Emitting Diode (LED) technology bulbs for reliability and economy.

Aluminium parapet:

An effective pergola support system, for structural stability and safety of the pergola. Integrated in the profile or externally affixed gutter.

Covers:

System for the complementary coverage of gaps between the pergola and the application building. These also function as protective covers of the materials of the coverage and shading surface when they are retracted.
