

## FanPlus BEST REVIEW

Reviews from people who have already used the product.

When grilling meat indoors, I was worried that the indicator of the air purifier was saying 'Bad air quality' even though my hood was turned on best. But after installing Fan Plus on a range hood, the indicators of the air purifiers always says 'Good quality'.

For my son with severe atopic dermatitis, I tried not to cook at home. But after installing Fan Plus, now I can even cook fish at home.

I pick chestnuts in the fall and bake roasted chestnuts. Playing with the children makes the pot burn black, I didn't even know the food was burning.

ID : nosok\*\*\*\*

Easy to assemble and install! It removes the odors in a short time and I didn't feel the winter cold as I didn't have to open the window to remove food odors! Oh, and the smell of mold from plant pots indoor is now gone.

After using Fan Plus, there is no food odd even with keeping my windows closed, which helped reduce heating costs in winter! It also helps keep the air quality good. I highly recommend it!
