

CONDEV

CONDEV is a company that makes ideas products that help people in their lives.

We supply products useful for life to people in Korea and other countries.

We always think of our customers first and we will make products that harmonize nature, people and the future together.

In the future, CONDEV will further strengthen its competitiveness through e-business system development and management innovation activities to achieve its vision of becoming the "world's most powerful idea company."

Thank you.

Brand story

Existing dish rack used stainless steel wire material by welding.

Because of this, the weight is heavy and large and can not be cleaned separately.

Therefore, there is a very unsanitary problem because mold is formed, bacteria grow and rust is generated. And it can not be used in the installation space according to the desired size.

Living blocks have been created to solve these problems.

The living block can be easily removed by simply wiping it with a soft cloth or soft brush.

If necessary, it can be disassembled and cleaned and it can be used hygienically disinfecting by boiling water. And surprisingly, you can make it to the size you want.
