HYDROGEN PRODUCTS MANUFACTURER

H & C A R E

www.hncare.kr

H & C A R E

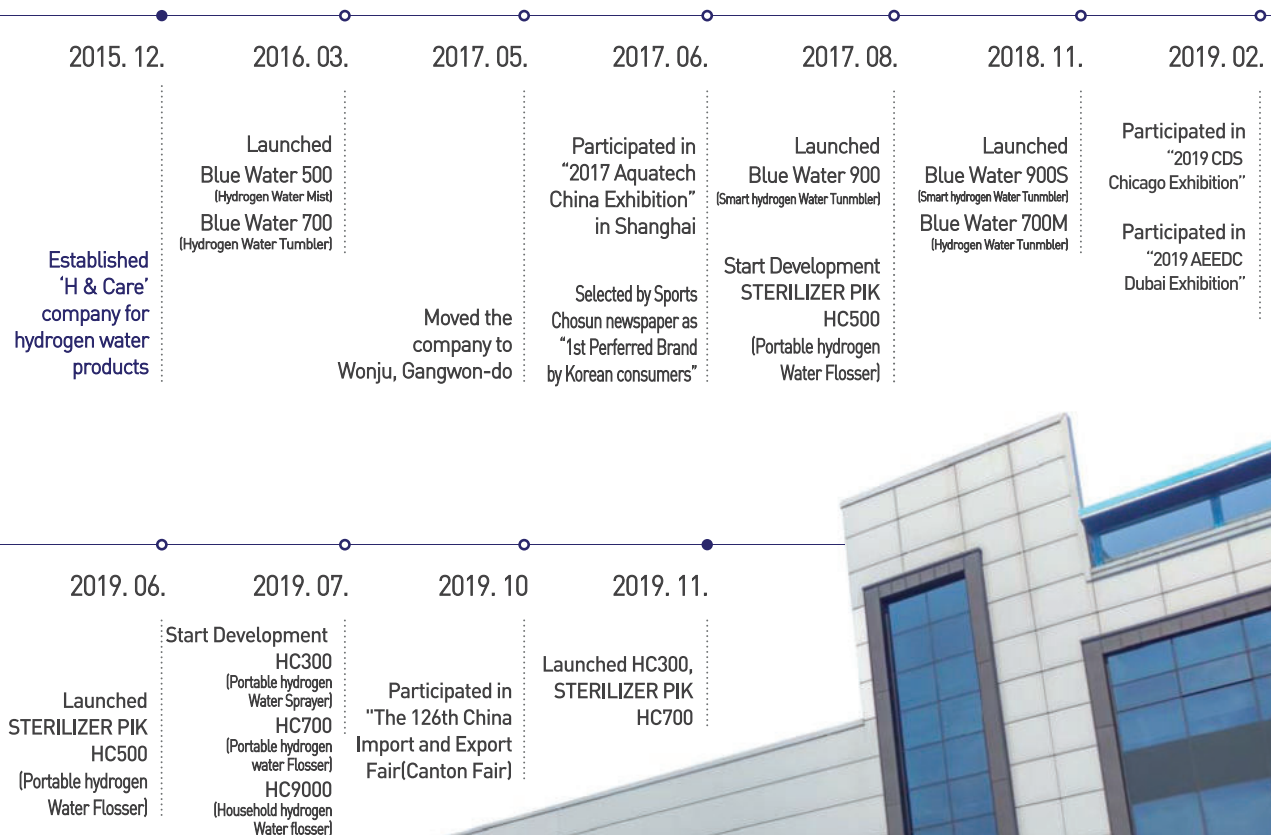

H & Care is specialized in manufacturing health care products. H & Care has exported health care products more than 20 countries.

health care products is providing high quality to help those who want to care for their health.

We have a vision that we contribute to global environment and human health by developing innovative health care products.

H & Care has invested very much in R&D, in order to become a global leader in health care industry.

As a result of these efforts, H & Care launched **Sterilizer Pik**, an hydrogen water flosser in which our core technology in implemented

“Health and life expectancy depend on the quality of water”

H&Care is playing a leading role in improving human health with hydrogen water products.

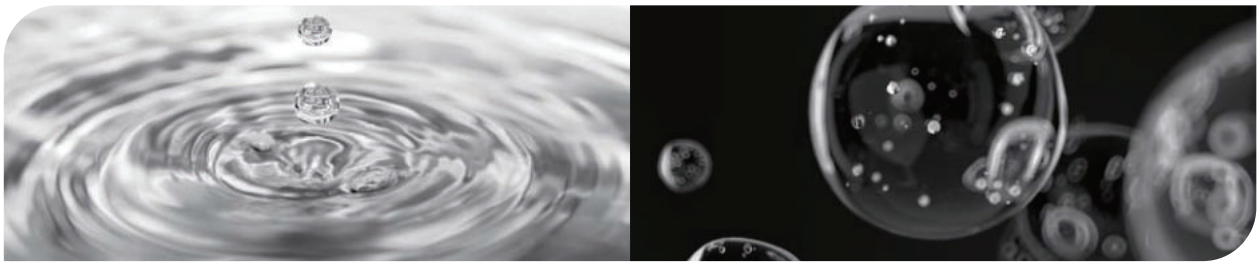

Many diseases of the human body came from excessive free radicals within the body. If such free radicals are not reduced in the human body, inflammations will occur and aging will be accelerated. Therefore, in order to eliminate such causes, it is good to consume anti-oxidants supplements like hydrogen water. Enjoy Hydrogen Water anytime and anywhere with our Blue Water serie.

H&Care has grown to be a leader in healthcare by constantly developing and manufacturing hydrogen water products.

Going a step further, H&Care is researching and developing more healthcare products. Your wish for a healthy life comes true.

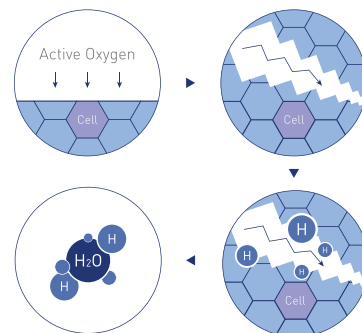

H&Care will continue to work to create healthcare products that help the environment and the healthy lives of our customers.

Please do not miss out on new products that will come out as a result of H&Care.

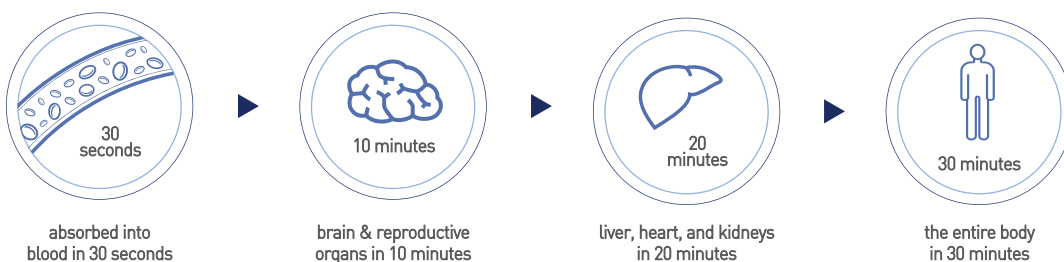

What is hydrogen water?

Medically, hydrogen water is water(H_2O) with ample hydrogen molecules that are combined with two hydrogen atoms. In other words, hydrogen water is simply water that, through several means, has extra hydrogen gas added to it.

• How quickly is hydrogen water absorbed into the body?

Hydrogen water is absorbed into blood in 30 seconds, brain & reproductive organs in 10 minutes, liver, heart, and kidneys in 20 minutes, and the entire body in 30 minutes.

H&Care

HYDROGEN STERILIZATION WATER MAKER

Hydrogen Sterilization Water Maker is converts tap water into hydrogen water that can be sterilized and deodorized by adopting H & CARE's unique technology. By electrolyzing water quickly, hydrogen can be added to the existing water molecules in a molecular state so that they can be sterilized and washed without other additives. 99.9% sterilization is possible with tap water without chemical additives, so it can be used in every corner of the home (living room, bed, sofa, kitchen, etc.) where children are raised or dogs are raised.

Fast and powerfully deodorized, H&Care's Hydrogen Sterilization Water Maker sterilize 99.9% of the most aggressive microorganisms, such as common bacteria (E. coli, Staphylococcus aureus), non-fermenting bacteria, fungi, viruses (influenza, norovirus) and spore-forming bacteria (Bottlinus).

Quick and powerful generation of sterilizing water (sterilized hydrogen water)
(The powerful platinum-plated titanium electrode generates 4 times more tap water with electrolytic water at the proper sterilization concentration in a short time.)

Proven Stability
Smart control technology, designed for the production of optimal concentrations of sterilized water announced by the Food and Drug Administration, automatically detects and controls sterilized water at concentrations up to 200 ppm and always produces safe sterilized water at the appropriate concentration. we have verified the safety of various bacteria, deodorant, and irritability tests, because the safety of the customer is the primary concern.

H&Care's core technology
H & Care produces a wide range of hydrogen water products, including hydrogen sterilization water maker and a portable hydrogen water flosser, and a portable tumbler that produces drinking water. It is safer because we have the technology to make products that can be used for drinking. In addition, it is safer that professional researchers of our institute equipped with international standard antimicrobial test facilities conducted by national accredited organizations continue to research the products while considering the health and the environment.

• Features

- Fast and powerful sterilization and deodorization of more than 99%
- Sterilization and deodorization with Hydrogen sterilization water maker safe for human body (99% sterilization and deodorization with water only)
- Homemade sterilization, deodorant by using tap water
- Convenient management. Convenience that does not require extra product cleaning
- Economicality and various applications that increase with longer usage period
- Stylish minimalist design that fits anywhere in your life

• Specifications

Product name		Hydrogen Sterilization Water Maker
Power consumption		DC 3.7V
Rated power supply		AC 100V-200V / 50-60Hz
Sterilization methods		Electrolysis
Body	Dimension	265*75*65 (HxDxW)mm
	Package unit	1set
Weight		400g

Sprayer's Head

It is sprayed semi-automatically with light touch and finely sprayed with 0.03mm of hydrogen water for long distance, so it is easy to sterilize and deodorize every corner of the house.

Main Body

It can cotains 300ml of water and automatically control sterilizing water (200PPM) of proper concentration at all times.

H2 Button

Independent button (H2 button) for generating hydrogen water

H&Care

SONIC TOOTHBRUSH

H&Care's Sonic Electric Toothbrush is a product that can effectively manage oral care by removing plaque and adjusting vibration intensity according to teeth using vibration and sound technology developed by H&Care.

40000rpm / min vibration technology enables oral care from strong teeth to sensitive gums. Depending on your need, various brushing modes (Clean, Sensitive, Massage, White, Polish) can be used to personalize your oral condition.

After using the electric toothbrush with delicate sonic vibration function, you can finish the care with a hydrogen water flosser to keep your teeth healthy without any major irritation.

By using the smart timer set for 2 minutes, you can follow the recommended dental time of the dentist and care every corner of your teeth.

You can change the brushing mode with one touch button simply.

• Features

- Luxurious simple design
- Detailed care effect with delicate vibration of 40000rpm / min per minute
- Can use up to 40 days when fully charged. Can be carried at work or when traveling
- Waterproof function for safety(IPX7)
- Convenient management. Convenience that does not require extra product cleaning

• Specifications

Product name		H&Care Sonic Electronic Toothbrush
Model name		HC100
Power consumption		1.4W
Rated power supply		100V-240V / 50-60Hz
Sterilization methods		Electrolysis
Body	Dimension	266*108*40 (HxDxW)mm
	Package unit	1set
Weight		103g

Brush Head

Effectively remove plaque and bacteria in the mouth with 40,000 vibrations per minute

Easy Button

With a button, you can easily turn on/off power and change the brushing mode

5 Brushing Mode

5 different modes (Clean/White/Polish/Gum Care/Sensitive) available for your convenience

Charging Indicator

The charging indicator provides an easy way to determine the remaining battery charge or state of charge

Wireless Charging

It's convenient to charge through non-contact charging

Hydrogen Water Water Flossers

STERILIZER PIK

Sterillizer pik is a new type of water flosser uses hydrogen water for dental cleaning.
It is a water flosser with built-in hydrogen water generator
It is The First time in the world.

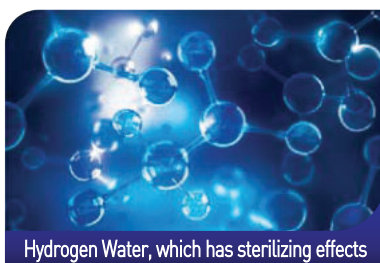

Sterilizer Pik has the sterilizing function in addition to general irrigating function.

It is a noticeable difference from other brands.

You can take care of your oral health more effectively with our oral irrigator.

Built-in Hydrogen Water Generator

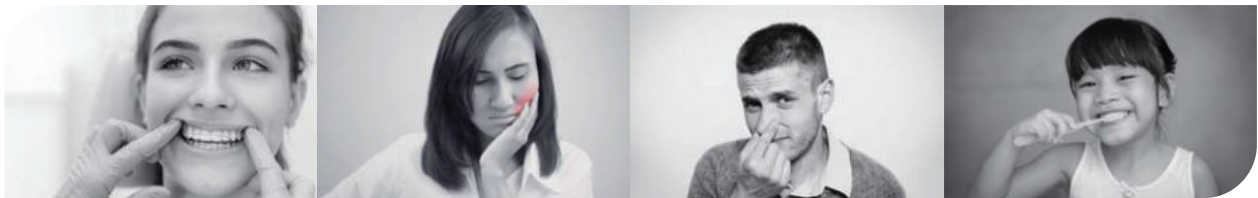

Hydrogen Water, which has sterilizing effects

By adopting ergonomic design, the user can grip the product comfortably and there is no burden on the wrist.

Ultrafine water stream with 3 modes - Normal / Soft / Pulse
Select the appropriate mode according to the purpose of use

Independent button (H2 button)
for generating hydrogen water

Let's take care of your teeth & gums with Sterilizer Pik

- ◆ Clean around braces, bridges, or implants easily
- ◆ Remove bacteria which caused cavity by sterilizing with hydrogen water
- ◆ Remove bad breath caused by smoking, plaque, etc.
- ◆ Good for children who need to take care of oral health

• Features

- Ultrafine & strong water flow to clean between teeth and gums
- Use hydrogen water which has sterilizing effects
- Water stream with 3 modes - Normal / Soft / Pulse
- Battery is conveniently charged while sitting on cradle
- Waterproof function for safety.
- Battery can be used up to 10 days if charged fully

• Specifications

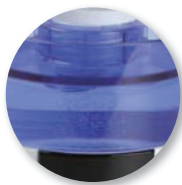

Product name	Sterilizer Pik
Model name	HC 500
Power consumption	DC 5V
Rated power supply	100~240V, 50/60Hz
Sterilization methods	Electrolysis
Configuration	Main Unit 1ea, Charger 1ea, Jet Tip 4ea
Dimension	266*108*40 (HxDxW)mm
Water tank capacity	130ml
Weight	350g

Portable Smart Hydrogen Water Tumbler

BLUE WATER 900

Semi-permanently usable Hydrogen Water Tumbler! Hydrogen water eliminates free radicals and acidic wastes from the body. You can drink hydrogen water anytime anywhere with Blue Water 900.

Richly dissolved hydrogen
[900~1200 ppb]

Innovative design
and various displays

Pure hydrogen water only remains
in the bottle while discharging
oxygen gas to outside

• Features

- 4 language options (Korean/English/Japanese/Chinese)
- Can select the generating time of hydrogen water: Mode 1 (3 minutes) or Mode 2 (10 minutes)
- Can check the battery status, electrolysis operation and volume level through the front LED indicator
- Easy to carry wherever you go
- Can use bottled water conveniently by using 2 types of the bottle connector.(28mm / 30mm)

• Specifications

Product name		Portable smart hydrogen water tumbler
Model name		Blue Water 900
Power consumption		DC 3.7V
Rated power supply		AC 100V-200V / 50-60Hz
Sterilization methods		Electrolysis
Body	Dimension	272*75*65 (HxDxW)mm
	Package unit	1set
Weight		400g

Compact Hydrogen Water Tumbler

BLUE WATER 900S

Compactly designed for jogging, hiking & cycling, while keeping the same function with Blue Water 900. You can carry this compact bottle wherever you go.

• Features

- 4 language options (Korean/English/Japanese/Chinese)
- Can select the generating time of hydrogen water: Mode 1 (3 minutes) or Mode 2 (10 minutes)
- Can check the battery status, electrolysis operation and volume level through the front LED indicator
- Easy to carry wherever you go
- Can use bottled water conveniently by using 2 types of the bottle connector. (28mm / 30mm)

• Specifications

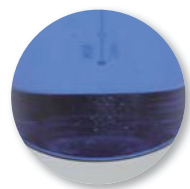

Product name		Compact hydrogen water tumbler
Model name		Blue Water 900
Power consumption		DC 3.7V
Rated power supply		AC 100V-200V / 50-60Hz
Sterilization methods		Electrolysis
Body	Dimension	272*75*65 (HxDxW)mm
	Package unit	1set
Weight		400g

Portable Hydrogen Water Tumbler

BLUE WATER 700M

By adopting PEM[Proton Exchange Membrane] technology, Blue Water 700M can get pure hydrogen water
Only while discharging oxygen and other impurities like chlorine through the exhaust hole

Richly dissolved hydrogen
(900~1200ppb)

Convenient one touch button
for power on & the generation
of hydrogen water

Pure hydrogen water only
remains in the bottle while
discharging oxygen gas to outside

• Features

- With one touch button, conveniently operate power on & the generation of hydrogen water in serial order.
- By adopting PEM technology like Bluewater 900, it can provide rich hydrogen water.
- Compact size! Easy to carry wherever you go
- Can used bottled water conveniently by using built-in bottle connector

• Specifications

Product name		Hydrogen water tumbler
Model name		Blue Water 700M
Power consumption		DC 3.7V
Rated power supply		AC 100V-220V / 50-60Hz
Sterilization methods		Electrolysis
Body	Dimension	265*75*65 (HxDxW)mm
	Package unit	1set
Weight		350g

Portable Sterilized Hydrogen Mist

BLUE WATER 500

Semi-permanently usable hydrogen water mist! Hydrogen water generator is installed in the product.
Hydrogen water mist is harmless to the human body and sterilizes most of various bacteria for health & skin care.
& Deodorization

• Features

- Dissolved hydrogen up to 700 ppb / Sterilizer & Moisturizer
- Sterlization water is sprayed out in a ultrafine mist
- Convenient one touch button for power on & the generation of hydrogen water
- Ultrafine bubbles eliminate various wastes from skin and sterilize harmful bacteria for skin care
- Help to remove dead skin cells and sebum
- Help to improve acne atopy, and allergy

• Specifications

Product name		Portable sterilized hydrogen mist
Model name		Blue Water 500
Power consumption		DC 3.7V
Rated power supply		AC 100V-220V / 50-60Hz
Sterilization methods		Electrolysis
Body	Dimension	165*30*30 (HxDxW)mm
	Package unit	1set
Weight		96g

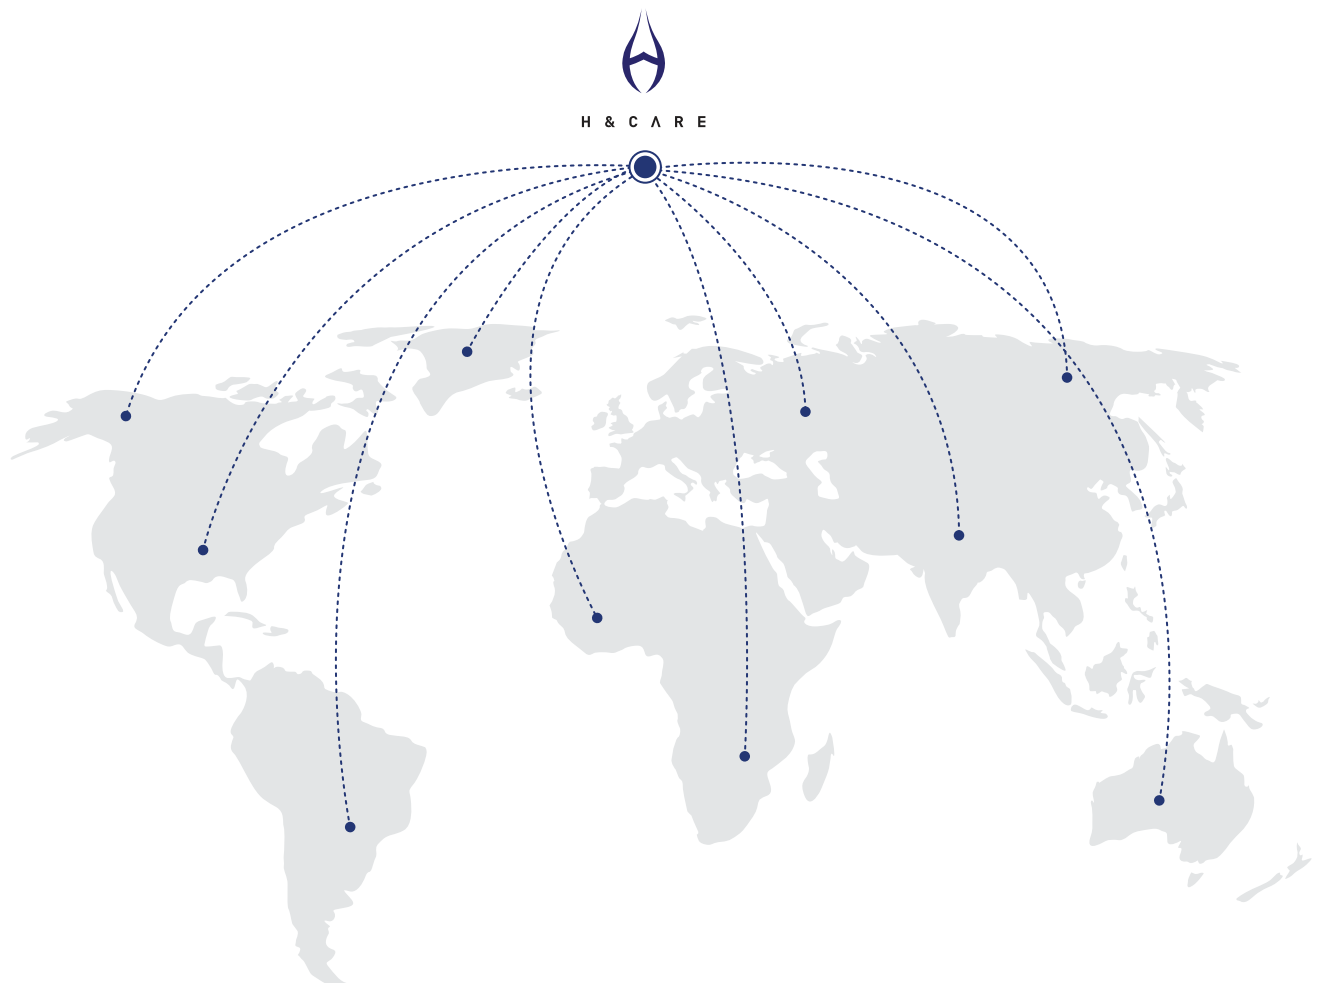

H & Care wants to be a **global leader** in HealthCare Industry

H & Care specialized in manufacturing health-care products

health and life with Our health-care products. Now and forever, H & Care will continue on the same path.

Our products will make you to experience life changes

Care for your health with our Healthcare products and rejuvenate your body.

We think **environment**,
human helth and **clients** first.

Health Care products for your wellbeing life

H&Care Co., Ltd.
