ABOUT COMPANY : OAH *international*

OAH
international

OAH International consists of experts in each field with years of diverse working experience throughout trade and logistics. We actively read the global market trends and targets constant business innovation based on professionalism, which will lead us to achieve customer-centered value in various fields of business. We will further enhance customer satisfaction by providing integrated services/process and by adding expertise. We will take the lead in creating new values and changes with open mind and flexible thinking based on communication and will become a responsible company growing with partners/customers.

Product : FORBELI MIRACLE SCIENCE MASK PREMIUM

Size : 64g

Texture : Cream

Benefits : Refines pores, Revives radiance, Nourishes and moisturizes

Use : For face

Skin type : All skin types

This set contains: Miracle Science Mask, Magic Effector, Spatula,
Plastic effector cover

How to use :

Step 1. After washing your face, use toner to clean up your skin.

Step 2. Apply mask cream a thin, even layer to face except around the eyes and mouth

Step 3. After 3-5 minutes, cover the head of the Magic effector(Magnetic Removal Tool) with a plastic cover, hover the effector over the skin to lift off the mask. Repeat this until the entire product has been removed.

Step 4. Do not rinse. Pat any residual product into the skin.

FORBELI

BENEFITS

- ✓ Effector's powerful magnetic action removes skin waste such as fine dust, yellow dust, sebum leaving only active ingredients on your skin, to leave it well moisturized and clear.
- ✓ Amino Acid Complex (patented ingredient) provides excellent moisturizing power and lustrous skin.
- ✓ By activating the skin cells of the skin with magnetic fields of more than 3000G, acne and other skin troubles are reduced, improving blood circulation and lymphatic fluid flow to give your skin more elasticity. It also helps to improve metabolism and nourishes your skin, making it healthy and vibrant.
- ✓ The natural mineral created by volcanic action, Jeju volcanic stone, removes waste without irritation, and has an astringent effect to the pores and keratin which will make your skin tone clean and bright.

FORBELI

KEY INGREDIENTS

Argan Kernel Oil	<p>Argan oil called “flowing gold”, the most expensive oil in the world Contains more than 4 times the vitamin E in olive oil. High skin affinity protects skin and suppresses cell damage Suppresses melanin production Eliminates free radicals to prevent skin aging</p>
Jeju Volcanic Scoria (Jeju Volcanic Ash)	<p>Amazing Sebum, Waste Adsorption Powerful pores reduction effect for excellent pore care Problem Skin Relief Sulfur is contained in volcanic stone pine, which is effective in removing hair follicles and waste Contains a large amount of calcium, potassium and rich in minerals</p>
Amino Acid Complex	<p>Deliver nutrition very effectively by supplying amino acids directly to skin cells Natural oils present in the skin Protects skin from dryness and ultraviolet rays by creating a skin moisture barrier Maximize skin luster and natural healing Enhance metabolism to promote skin respiration Quick absorption without irritation</p>
Squalane	<p>Natural plant-based oil Natural moisturizer keeps skin moisturized Protects skin from oxidation and prevents moisture loss for healthy and vibrant skin It is absorbed without straining pores, helps maintain skin firmness and luster Reduces outer skin roughness</p>
Hydrogenated vegetable oil	<p>Forming a moisture barrier on the skin to prevent evaporation of moisture and increases moisture content in the skin Moisturizes the skin and lasts for a long time, smoothes and softens the skin</p>

[AMINO ACID COMPLEX]

■ Effect

#Skin Moisturization

The skin has natural moisturizing factors such as amino acids and sugars in the stratum corneum to contain moisture, which plays a central role in maintaining moisture in the stratum corneum.

#Skin Elasticity

Supplementing plenty of amino acids such as glycine, proline and alanine, the raw materials of collagen and elastin, helps collagen biosynthesis and plays an important role in maintaining skin elasticity.

#Prevent Pigmentation

Among the amino acids, asparagine, tyrosine, and serine are the ingredients of the enzymes necessary for cell division, which actively stimulate the metabolism of the skin and help prevent aging by removing the dullness of the skin.

#Exfoliation Effect

It is effective for exfoliating skin and has a good effect on improving skin texture.

FORBELI

MAIN CONCEPTIONAL INGREDIENT II

[JEJU VOLCANIC SCORIA]

■ What is Jeju Volcanic Scoria(Jeju Volcanic Ash)?

It is called Scoria, which means light stone in the Jeju dialect.

(Scoria is a volcanic product made of porous structures with numerous microholes.)

In the event of a volcano eruption over several million years to thousands of years, clay is a stone charcoal made by extreme heat. It is a mineral that is a unique natural underground resource only in the Jeju region and is a weak alkaline resource similar to human blood.

Thanks to its microscopic holes, **it has a natural adsorption power that is six times stronger than charcoal and can help cleanse the skin by adsorbing sebum and waste products.**

It is composed of a weakly alkaline natural mineral component that emits a large amount of good far-infrared rays, such as **"sulfur soil (Red soil)", and is also effective for purifying and moisturizing the skin.**

■ Effect

- ✓ Removes waste from skin membranes and improves problematic skin
- ✓ Excellent cleaning effect
- ✓ Powerful pores convergence effect for elasticity and pores reduction
- ✓ Moisturizing effect prevents skin dryness
- ✓ Excellent for waste removal due to high processing in crystals
- ✓ The Effect of Charcoal and Red Soil

结果判定Result		合格 Qualified			

Has maximum magnetic flux technology that cannot be compared to other products

While third party products have lower than 2,000G, our product is more effective in magnetic field therapy with a strong magnetism of **over 3,000G**.

[Removing impurities & Exfoliation Process]

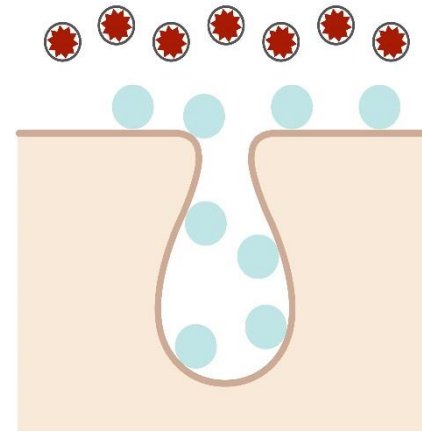

STEP 1

Harmful impurities accumulated on the skin and pores

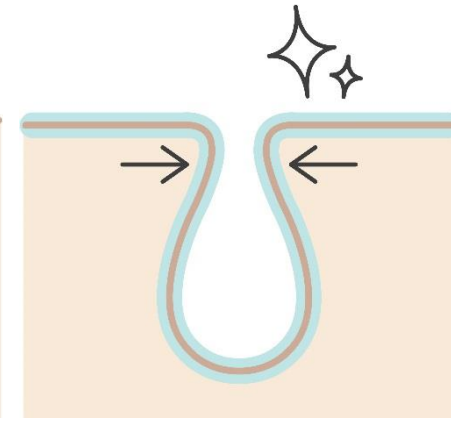

STEP 2

Adsorption of impurities with volcanic Scoria/ash

STEP 3

Remove adsorbed contaminants and leave active ingredients

STEP 4

Absorption of active ingredients and tighten of pores
