Color : Blue, Pink, Green, White

Dimension : Clover : 145 x 230 x 30mm (7.5ml per cell)
 Medium : 145 x 230 x 28mm (15ml per cell)
 Large : 145 x 230 x 35mm (45ml per cell)
 X-large : 145 x 230 x 55mm (100ml per cell)

Country of Origin : Made in Korea

Take out the contents easily like pop up!

By adding the pressing function on the bottom side of the tray, after freezing the ingredients and store them in the freezer, you can easily take out the ingredient from the freezer simply by pressing the bottom side of the tray. Also, you can take out the necessary amount of ingredients from the tray because the amount kept in each cube is written on the tray.

- It is easy to take out the ingredients at any place and whenever you need by pushing the round button on the bottom.

Refrigerator can be organized cleanly and neatly!

Instead of black plastic bag containing the ingredients, you can organize the freezer compartment neat and bright by keeping the ingredients in the tray by color.

It is possible to keep the ingredients hygienically because each tray has lid!

With the individual lid, odor can be blocked and ingredients can be stored hygienically and transparency of the lid and tray makes it possible to identify the contents inside easily.

Advantages of Premium RRe

01. It can be cleaned with a dishwasher.

Unlike conventional products, it has been developed using a new material with heat-resistant temperature limit of 80°C and cleaning can be done in dishwasher. (Heat-resistant temperature described on the tray is 80°C, but it actually passed heat-resistant temperature test of 98°C)

02. Unbreakable strong durability

If physical impact is given at frozen state in the Storage Tray, there is a risk of breaking, but the new material used in this tray has the durability not to be easily breakable. (We have durability test report which certifies that this tray does not break even after 5,000 times of push)

03. Sealing power without spilling

The double structure of the lid enhances the sealing power to prevent water from leaking without using rubber packing. (Sealing power is strengthened not to allow any water leakage when the lid is completely closed after filling up water)

4 types of premium RRe

• **Clover Mini (RC24)**
½Tsp./7.5ml/0.26oz
Blue / White
