

Pack on Pack

Protective Cover for Facial Mask

Concept

● Pack on Pack

Facial Sheet Mask etc.

● (nutrition facial cream, essence, sleeping pack etc.)

Pack on Pack is a protective cover for facial sheet mask. It is made of LDPE. It helps to make skin more moisture. It can be attached on a sheet mask, essence, nutrition cream etc.

Pack on Pack keeps moisture under it, and extend the usage time of mask sheet. It opens the pores and allows good ingredients to be absorbed well.

Principle

[LDPE membrane which allows oxygen to pass through and keeps moisture]

Use

- Keeping moisture and protection function when using mask sheet, sleeping pack and facial functional cream
- Use after anesthesia creams in dermatology
- Use after nutrients pack in esthetic shop

Effect

- Improvement of skin moisturization (40% of moisture vaporize when attached mask sheet only. The rate of vaporization attached with 'Pack on Pack' is just under 5%)
- Extend the time of using essential sheet mask by the usage time of 'Pack on Pack'
- Natural thermal effect as prevent moisture evaporation. (rise for 2.2°C compare to using without 'Pack on Pack')
- 'Pack on Pack' helps skin absorb effective nutrients by open pores, and it also make soothing effect as remove it after 10~15mins. Because skin turns cool after remove 'Pack on Pack' by evaporation of water on skin surface.(2-way effect)
- Prevent hands from getting essence.

How to Use

First, attach a mask sheet on face. Then attach 'pack on pack' on it. Let the embossed surface inside.

Wait 10~15mins for the good ingredients to be absorbed.

Remove only 'pack on pack' on a sheet mask. Then wait 15mins more for soothing and cooling effect of the mask sheet.

Types

1. Standard type (50 sheets/pack)

2. Separated type (50 sets of sheets/pack)

Size:	① Standard 15.5*29.0*1.0 cm ② Separated 15.5*29.0*1.2 cm
