NORSEMEN COMFORT-1500 COLOR

EM concerns NO! radiation YES!

It has a high far-infrared radiation rate of 90.6 percent. CCT thin film exothermic material, not regular nicrome heaters. No electromagnetic waves are generated by application.

On u of technology

- Development of CNT Flexible Surface Heat Exchanger
- Fast thermal effect without foreign substances
- Expert design and production of super-film face heaters
- Slight charging without separate downpack insertion
- Liquefied thermoplastic polymers as organic compound
- 0.3mm CNT surface heaters in super-ventilating structure

product specificity

Full flexibility (flexible)
fabric-like without any foreign material

Can washing
30 laundry tests It's waterproof.

Control possible.
control system.
It works automatically.

Safe products
No electromagnetic waves, safe DC 5V.

Strong velcro strap
It's attached, so you don't have to worry about unzip.

Double slider zipper
Double zipper, outside the sleeping bag, inside.

Upgraded filler
More virtuous than our existing products

Compression bag
Easy to carry, store, store, and move.
