

*Beyond Cookware*

# For your Vision We Make Art

a leading company specialized in Die-cast Aluminum Non-stick cookware and still growing and trying to create and lead food culture & more conveniences with our products in the best quality and designs.

Our main products are Die-cast Aluminum Nonstick kitchenware such as frying pan, Wok, pot series (Dutch oven, casserole, low casserole & stock pot), double pan & Roast pan, etc.

## Features & Benefits of Our Die-cast Aluminum cookware

- Excellent Non-stick feature compared with stainless steel products.
- Our die-casting products are lighter than stainless steel or clad metal products but heavier than pressed aluminum products.
- Thicker than any other material products.
- Aluminum die-casting cookware features better durability and are heavier compared to general Aluminum sheet (pressed) products, which makes more stable while cooking.
- High heat efficiency – fast heat distribution, longer heat preservation. Our heavy-gauge die casting aluminum cookware prevents any hot-spot on cooking surface, which show less sticking of food on cooking surface.
- On cooking surface, there is no rivet area which makes it easy to clean and sanitary environment.
- Various designs with unique functions. For examples, steam vent knob, Induction available cookware, various pattern print on cooking surface, water-spill protection design for dutch oven & sauce pan, etc.
- Most products are able to be developed for IH(induction heating) by applying thermal-spray process without any change of shape. Various shapes of products are possible in specific design.

## 다이캐스팅 주방기구 장점

- 스텐레스 제품에 비해 년스틱이 우수합니다.
- 스텐레스 제품에 비해 무게는 가벼우나 알루미늄 판재 제품에 비해서는 무게감이 있습니다.
- 알루미늄 일반판재 제품에 비해 내구성이 뛰어나며 무게감이 있어 조리시 안정감이 있습니다.
- 알루미늄 제품의 특성인 열전달속도가 뛰어나 뿐만 아니라, 열전도율이 좋으며 열집중(Hot-spot) 현상이 없어 음식물이 달라붙어 타는 현상이 적습니다.
- 안쪽면에 핸들 리벳 부위가 없어 위생적이며 세척이 편리합니다.
- 알루미늄을 용융하여 틀 안에 주입하는 방식이어서, 틀 모양에 따라 다양하고 특이한 디자인의 제품이 가능합니다.

## CEO Message

is a leading company specialized in Die-cast Aluminum Non-stick cookware and still growing and trying to create and lead food culture & more conveniences with our products in the best quality and designs.

Our main products are Die-cast Aluminum Nonstick kitchenware such as frying pan, Wok, pot series (Dutch oven, casserole, low casserole & stock pot), double pan & Roast pan, etc.

Our goal is to take your creation from vision to fine art. We do our utmost to manufacture and provide the best products through product development and establishment of the system for quality and production control aiming for company growth and mutual benefits with the

Partners, based on the experience of production technology, development and marketing accumulated in the field of kitchenware industry over the last 35 years. In addition, all of our employees are doing the best for active self-improvement and innovation to improve the quality of life for all the people and for social contribution.

We are trying to expand our scope of business to abroad looking for customers who can establish mutually profitable business relationship with in the long term.

Thanks.

May 3

Young-ho Kim / President

## Brief History 회사연혁

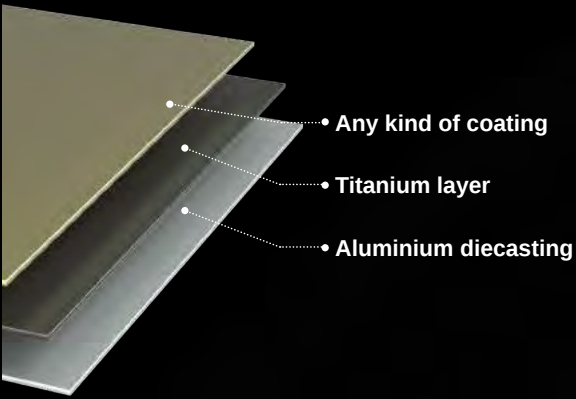

## 연혁 History

- 1982 · 대원테프론 설립(Established Daewon Tefron)
- 1994 · 공장 확장 이전(Plant expansion and relocation)
- 1995 · 전통 가마솥 생산설비 확충(Manufacturing Facility expansion for Korean Traditional Iron Pots)
- 1996 · 매직팬 생산 및 다이캐스팅기기 설비 확충(Launch 'Magic Pan' & expansion of Die Casting facilities)
- 1998 · 후라이팬 류 생산 및 옹사기기 생산설비 확충 (Starting production frying pan series & expansion of facilities for thermal spray process)
- 2002 · 공장사옥 신축 (현재 부천 내동 237-1번지)(Building a new company building at 237-1 Naedong, Bucheon City)
- 대형마트 할인점 입점 (이마트,롯데마트)(Launched at the Major Mass Market in Korea – Emart & Lotte Mart)
- 후라이팬,궁중팬 수출(Started to export – Frying pan & Royal cooking pan)
- 2007 · 셰프라인 브랜드 제품 생산(Launched Chef-Line Brand products)
- 2006 · 홈쇼핑 방송 (현대,농수산,CJ)(Launched at Major Home Shopping Channel in Korea – Hyundai, NS and CJ)
- 2008 · 비전아트㈜ 법인 설립(Conversion to a Corporation, Vision Art Co., Ltd.) 키친아트 브랜드 제품생산(Launched Kitchen Art brand products)
- 2012 · ISO 9001:2008 QMS 인증(Obtain Certification: ISO 9001:2008)
- 2013 · 비전디엘 물류사업부 설립 (Established Vision DL, A distribution Division of Vision Art Co., Ltd.)
- 2018 · 공장사옥 신축 (현재 경기도 김포시 양촌읍 학운리 황금로 290)(Building a new company building at 290, Hwanggeum-ro, Yangchon-eup, Gimpo-si, Gyeonggi-do, 10049, Korea)

# Titanium reinforced thermal spray layer

티타늄 강화처리 내부용사

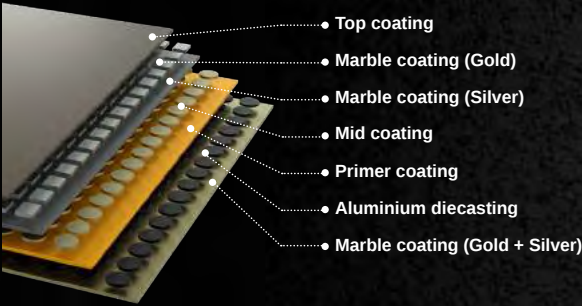

Titanium reinforced thermal spray layer before coating process

- Titanium thermal-spray reinforced surface on cooking surface makes coating itself more adhesive onto the surface and also more durable. This is one of the best cheapest processes to improve coating for both more durability and longer use without harming non-stick feature. This is also environmental friendly as there is no harmful ingredient. Please note that this process can be applied with any kinds of coating material.

# Mable Plus Coating

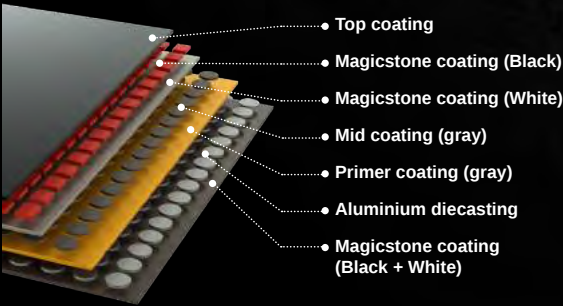

마블 플러스 코팅

- Marble coating is basically PTFE(Pluotetrafluoroethylene) based coating but developed for better non-stick & durability in Korea. It looks like 'marble stone' so this coating is named after that. Our 'Marble Plus' coating is more developed coating from normal marble coating for better durability.
- Coating outside is also marble coated that enables users wash thoroughly so easily. You can enjoy marble coating cookware with nice performance at reasonable price.

# Magic Stone Coating

매직스톤 코팅

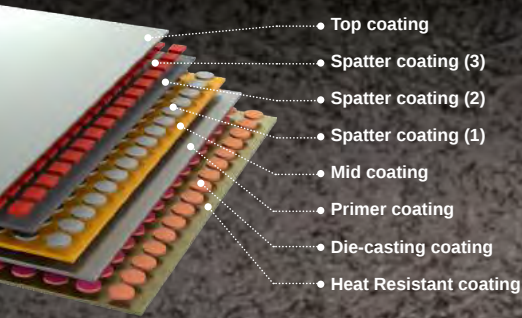

- Magicstone coating is non-stick coating materials mixed with Zirconium & Ceramic materials such as biotite for more durability protecting against scratches and abrasions.
- Absolutely no harmful chemicals such as PFOA & any other harmful chemical ingredients. Coating is strictly made from environmentally friendly and non-toxic materials.
- Magicstone coating passed the abrasion test of 50,000 cycles whereas normal PTFE coating peels off over 10,000 cycles of abrasion test.

# Ultra Stone Coating

울트라 스톤 코팅

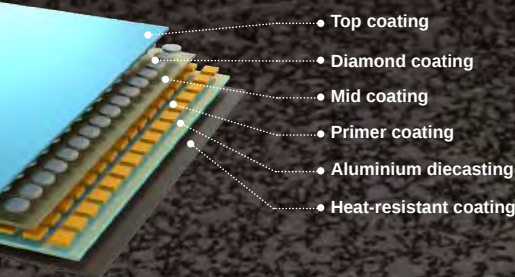

(The newest coating)

- The newest innovative coating with totally different concept of coating structure, of which thickness can be made over 50 microns, whereas normal coating thickness is made 25-30microns. It means over 2 times thicker than traditional coating. Usually normal coating material cannot be made like this as it could easily crumble & crack with the thick coating layers.
- In addition to basic 3-layer coating structure, 2-3 colored spatter coating particles are piling up to foam close-packed structure in high density onto mid coating layer, that enables coating far more durable and last over 2 times longer compared to normal PTFE based coating.
- Excellent non-stick feature guarantees convenient cooking and easy clean.
- Possible to pass abrasion test of 1,000,000 cycles.
- FDA and LFGB regulation complied coating with NO harmful ingredients to human body.

# Diamond Coating

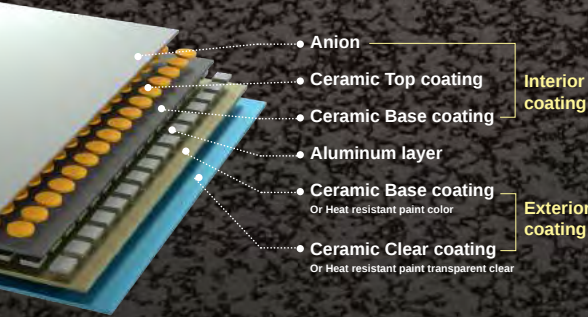

다이아몬드 코팅

- Diamond coating is non-stick coating material included nano diamond crystals, which is the strongest material in the nature, not harmful to human body and eco-friendly. It also provides better heat conductivity and durability, while protecting against scratches and abrasions. Pattern design is very fantastic sense for the strong coating on cooking surface. Easy to wash and clean, due to non-stick Diamond coating (Absolutely no PFOA emission and no harmful ingredients.) Coating made from environmentally friendly and non-toxic materials.

# Ceramic Coating

세라믹 코팅

- Ceramic Coating generates far-infrared rays which will effect to human body with good health. It can keep the taste of food originally. The ceramic Coating is absolutely PFOA & PTFE chemical free, which may be generated while cooking. It is also easy to clean the cookware with ceramic coated interior.

## Coating comparison

|                            | Ultra Stone | Marble plus | Magicstone | Diamond | Ceramic |
|----------------------------|-------------|-------------|------------|---------|---------|
| Nonstick                   | 5           | 4           | 4          | 4       | 2       |
| Durability                 | 3.5         | 2           | 2          | 2.5     | 5       |
| Layers                     | 6           | 4-5         | 4-5        | 4       | 3       |
| Glossy                     | 3           | 1-2         | 1-2        | 2       | 5       |
| Unit price competitiveness | 2           | 5           | 4          | 4       | 3.5     |

5. Best , 1. Worst. (Higher number is better)
