We
Make a Safer, and more Convenient Life
for people.

Prevention of the Password Theft

It is safe to enter the password even when others are watching it by pressing any random numbers before you enter the real password to prevent the password theft.

Panic Release Handle

You can exit quickly and conveniently in an emergency situation by simply pulling down the handle from the inside.

(Some models strengthen safety by including a release button.)

No worries with the Emergency Key Function

You can open the door by using an emergency key even if the door lock has some electronic problems. It is also useful when the batteries run out of their life.

(Excluding some models)

Link with the Video Door Phone & Home Automation System

By wireless connection, you can open the door by using the video door phone or the home automation system, and you can even use the wireless remote control too.

(Excluding some models)

Much Safer with Double Lock Function

When your family members are at home or when you need your private time or even at night, you can stay safe with the double lock function. This function forces the door to be locked from the inside so that it cannot be opened by password from outside.
