CAMB Machine Knives International

We have built a reputation for **high quality** machine knives, with over **25 years** of **experience**, which we **supply** to industries **throughout** the **world**. We have established an international network operating from our CAMB Machine Knives headquarters in the UK and our North American office, along with agents in Spain, Holland, France, New Zealand and South Africa.

Poultry Processing Blades

CAMB Machine Knives was originally established with the Poultry Processing Industry in mind. We therefore both **manufacture** and **stock** a **large range** of blades for many of the major Poultry Processing machines.

Our **range** of Poultry Processing blades **covers** all of the main machines used in the industry, including **Stork**, **Meyn**, **Systemate**, **Linco**, **KFC** and **Biro** and many more.

We stock every type of blade used in the Industry, Razor Blades, Circular Knives, further processing blades and Vent Cutter blades to name but a few.
