SAFETY PRODUCTS

ZAVENIR DAUBERT

PROTECT with NOX-RUST®

PACK with DAUBERT VCI®

DAUBERT VCI® TECHNOLOGY

VCI technology is based on the combined principles of polarity and volatility. When metals are in the vicinity of VCI products, the chemicals volatilize in the 'enclosed' environment and form a protective molecular layer, which prevents moisture, salt, dirt, oxygen and other materials from depositing on the metals and inhibits corrosion. The main benefits of the VCI Technology lie in its ability to self-apply and dissipate.

Moisture Absorption Solutions

DRY CARE (SILICA GEL)

& CONTAINER SAC

**We Repair All Kind Of Packaging Machines
