

NMC – worldwide leader in the development, production and distribution of synthetic foam packaging profiles has decided to focus on the development of new NOMAPACK® Green profiles made out of plant-based renewable resources. NMC has developed a process to create NOMAPACK® profiles out of renewable raw materials with good shock absorption and long-term mechanical properties.

NOMAPACK® Green is fully recyclable and is moreover the first certified packaging profile, which has a premium quality, made out of renewable materials based on the NMC NATUREFOAM™ technology.

NOMAPACK® Green has been approved by the International Institute Vinçotte and has received a one star certification for its use of over 30% of renewable resources in his composition.

Doors/gates

Every door separates private spaces from public spaces and offers protection from the elements. With its cleverly designed edge guards and surface protectors NOMAPACK® Green sets new standards.

Furniture

With NOMAPACK® Green house and garden furniture with vulnerable surfaces and edges arrives safely at its destination. NOMAPACK® U Green can also be the right protection for transporting round or oval tables.

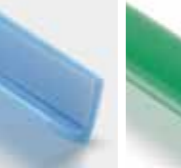

NOMAPACK® L Green is a rapid and simple solution for the protection of corners and edges.

Windows/ bathroom

A well-controlled heating system and a comfortable bathroom are just the tonic after a long day at work. NOMAPACK® Green ensures that radiators, washbasins and bathtubs arrive safe and sound in their intended home.
