FIRST
WASHING

A photograph of an industrial onion washing machine in a processing facility. The machine consists of a large metal frame with two inclined chutes. Onions are being washed in a large metal tank at the bottom. A worker in a blue shirt and face mask stands to the left. A white plastic container is on the right. The background shows a tiled wall and a window.

DRYER - 1

The image shows a large industrial machine, identified as 'DRYER - 1', in a factory setting. The machine is blue and has a red label with the word 'DODI' on its upper front panel. It features a conveyor belt at the bottom that is covered with a light-colored, granular material. To the left of the machine, there are several large, vertical, silver-colored pipes or ducts. A blue ladder is attached to the right side of the machine. The background consists of a white wall with a tiled lower section and fluorescent lighting fixtures.

A large blue industrial machine, identified as a dryer, is the central focus. It has a red label at the top that reads "DOTA". Below the main body of the machine is a long, narrow metal grate or conveyor. To the right of the machine, there are several large, vertical, cylindrical components, possibly part of a filtration or separation system, connected by pipes. The background shows a factory environment with concrete walls, a blue metal structure, and a ladder. The floor is made of concrete. A red fire extinguisher is visible on the right side. The overall scene is an industrial facility.
