

Recycling with care
– we think about the future

At RC Plastic, we recycle everything – and have been doing so for 30 years

RC Plast A/S was founded in 1984 with the aim of collecting factory waste from the plastics industry in order to modify, compound, dye and produce customised granules for reuse in supplier companies or for further processing in the European plastics industry.

With 30 years of experience on the European market, we have gained a certain amount of heaviness, making us a reliable, reputable supplier with extensive know-how in the processing of customised thermoplastic materials.

Environment and quality

The environment and high quality form the basis of our company. These factors are crucial to us and especially to our customers. We recycle everything – that is our basic principle – and we are guaranteed a stronger market position if we give the environment and quality the absolute highest priority.

Therefore, the company is committed through its activities to continuously foster environmentally sound development with due consideration for natural resources, legal requirements and any other relevant regulations.

E3 kører altid lidt længere for dig

Hos E3 er et ord et ord. Vi holder, hvad vi lover, kommer til tiden og kører dit gods sikkert fra A til B med en top-moderne vognpark. Vi løser transport-opgaver i Europa med speciale i Tyskland og kører dagligt 400-500 full loads for glade kunder.

A strong and dynamic team working towards common goals

RC Plast only employs well-trained staff who are experts within their own field. Most of them are trained within the company and have more than 10 years of experience with us.

This enables us to provide high-quality products. We have substantial know-how, the line of authority is short, and the staff are given the authority to make important decisions.

Our sections work towards the same goal – to provide a good service and deliver high-quality products – and we are convinced that the close cooperation across the various sections has played a major role in ensuring our current European market position, which we expect to retain for many years to come.

 **Blaaholm A/S**

www.blaaholm.com

Limfjordsvej 13

Tlf.: 75 19 54 27
blaaholm@blaaholm.com

- Blaaholm A/S har udviklet, fremstillet og leveret 44 stk. transport- og opbevaringscontainere til RC Plast.
- Bunden på containerne er udskiftelig og udført i varmgalvaniserede plader.
- Containerne kan håndteres med gaffeltruck og har gaffellommer, men kan også håndteres med almindelig løftevogn.
- Containerne kan stables.

We sort all collected materials at source
– in that way, we maintain a high quality.

Customized **COLOR COMPOUNDS AND MASTERBATCHES** supplied worldwide

We offer:

- Flexibility (volumes from 25 kg to 25 t lots)
- Unique know-how in processing technical polymers and polymer commodities
- Research and development within various industries (incl. medical appliances)

Commitment, Co-operation and Service

We take pride in providing good customer service

At RC Plast, we take pride in providing good customer service. The members of our staff are experts and trained to advise our customers to make the right decisions.

We do not sell only standardised but also customer-specific products. Many of our customers need specialised and customised products – and we do everything in our power to meet their requests.

To achieve the best results and guarantee the high quality we are known to deliver, we develop our products in our own laboratory and test various compounds, so that our customers can test them on their customers before the products are put into production.

RC Plast.

Collection of industrial waste

RC Plast buys and collects excess
materials from the plastics produc-
tion at factories in Scandinavia,
Europe and the USA. Excess plastic
is sorted and regenerated at high
melt indexes.
