

CAMA Mini-Lift 7

CAMA Mini-Lift 7 is the access solution that takes you further.

This foldable steplift is reaching new heights in elegant access solutions.

Dimensions and data

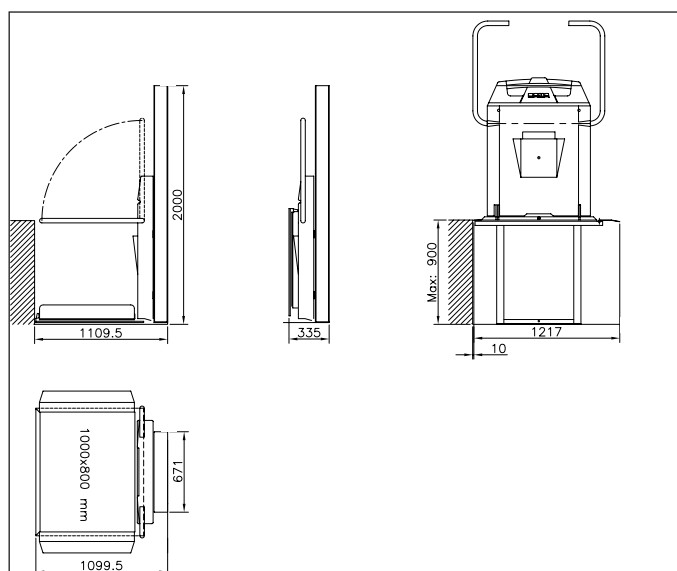

This new Independence steplift model raises the user up to a maximum of 900 mm while continuing to provide the strength, modern aesthetics and configuration options you expect from a Cama Lift.

With minimal building work, this foldable ML7 platform stepLift can be installed within a day and has the benefits of being easy to relocate if needed. This foldable steplift will not take more space than a wall mounted radiator when the lift is folded and not in use.

The Vertical Platform Lift with danish design and user friendly controls, is a cost effective and space saving solution. The self contained unit guarantees a stable and comfortable journey you can rely on.

Features

- Takes minimal space
- Modern lightweight design
- Suitable for internal or external use (corrosion resistant)
- Gates can be delivered.
- Very simple to install and easy to service optional RAL colours
- Can be reinstalled to a new location
