## PRODUCT INTRODUCTION

### CAT SCRATCHER?

The cat is instinctively scratching to replace worn-out, old claws with new claws of the claws in layers

If you raise a cat, it will scratch all the furniture, walls, and doors in the house, causing the furniture to go bad.

So you need extra cat furniture for the cat to scratch.

In general, scratchers cut and made corrugated cardboard using glue, which is harmful to cats.

Our Yaomi Scratcher House considered the safety and economics of cats by using paper that minimizes the use of glue on the frame of wood.

Give a scratcher necessary for my beloved cats.

### CAT SOFA?

The cat always takes a rest crouching somewhere except for active nights.

The cat sofa that has a bib that can hold a chin and can adjust the hot or cool temperature on its own is a necessity for a cat.

Provide a sofa for our cats to take a comfortable rest.

### CAT HOUSE?

Cats are nocturnal animals, so they usually sleep during the day.

Because cats can hide and feel safe and comfortable in the dark, they should prepare a special cat house to provide them with a comfortable resting place.

Our house scratcher is...

Give the cat a hiding place, a spacious and comfortable place to rest.

It's a product that can also be scratched.

## PRODUCT INTRODUCTION

### COMMON SCRATCHERS?

1. Most are made in China.
2. Use adhesive to make a laminated cardboard.
3. It is a disposable to discard the entire product as it wears out when scratched.
4. The shape is poor.  
(It is a product made by pasting printed paper on the surface of cardboard.)
5. There are restrictions on the shape.  
(mainly in the form of a sofa).

### YAOMI WOOD SCRATCHER?

1. Paper made in Korea and pine trees made in New Zealand are used.
2. Corrugated cardboard is used for the paper part, but the corrugated cardboard is cut one by one and connected with a connecting rod.  
(It is good for cat health by minimizing adhesive)
3. The paper part is sold separately.  
(If the paper runs out, you only need to change the refill, so it is economical.)
4. It looks good because it is wood except for the paper part.
5. Cats prefer to scratch vertically, so there are a lot of verticals on the wall,  
(There are various products such as sofa type, cylindrical type, and vertical type)
6. There are products that combine these scratch and house function

## PRODUCT INTRODUCTION
