SupraGut™ Probiotic strains confer relief against Irritable Bowel Syndrome, diarrhea, allergy and enhances immune system.

Product introduction

SupraGut™(Probiotic food) has been designed for entire gut.

It contains scientifically studied probiotic strains for small (Lactobacillus Acidophilus and Lactobacillus Casei) as well as large (Bifidobacterium bifidum and Bifidobacterium longum) intestine. Combinations is helpful in proper and complete digestion of food. Bifidobacterium bifidum (BGN4) is of human origin and have been proved scientifically to possess ability to counter Irritable Bowl Syndrome, anti-allergic effect and property to enhance the immune system. Bifidobacterium longum (bOR1) has been patented in USA, Japan and Korea for its anti-Hotavirus effect.

A supplement of probiotics provide food source to probiotic strains for acclimatizing the gut environment and colonize the gut in short time. To compensate the deficiency of vitamins due to inappropriate digestion, SupraGut™ is supplemented with Vitamin C and B complex (B1, B6, B12).

SupraGut™ is easily consumable due to its pleasant tasty powder form.

Introduction of Alchemy

As a health care provider, the goal of our organization is to facilitate people to lead a healthier lifestyle through functional foods.

We aim to provide high quality and modernized products for better customer satisfaction and long term relationships. To accomplish our mission we are constantly involved in research and developing new technologies with improved efficiency. With this eye vision we also look forward to serve people by offering innovation product designs which are capable to muddle through the contemporary world.
