Test Result

How it measure your Stress level?

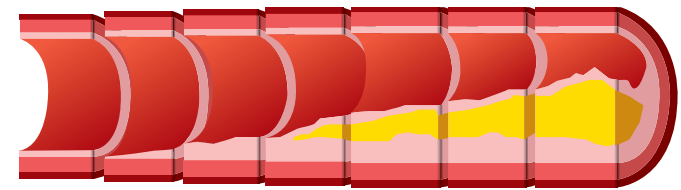

Stress is an organism's response to a stressor such as an internal or external environmental condition. And, the most immediate & sensitive physiological signal responding to the stress is our Heart Beats.

Smart Pulse can measure your stress level by analyzing the Heart Rate Variability (HRV) in every second.

*We, MEDICORE Co., Ltd. provide you high accuracy & reliability of stress measurement with authorized algorithm & clinical experiences for over 20years.

How is your Arterial Health?

Type1 Type2 Type3 Type4 Type5 Type6 Type7

← (Aging process of blood vessel) →

Young Older

Smart Pulse has the ability to know the health of our blood vessels which directly affect our overall cardiovascular health.

You can now conveniently manage your Blood Circulation & Arterial aging at home!
