[NEW Steel Life S]

Steel Life S shows premium design, S-level quality with high quality titanium and rhodium coating.

[NEW] PLAYKIDS

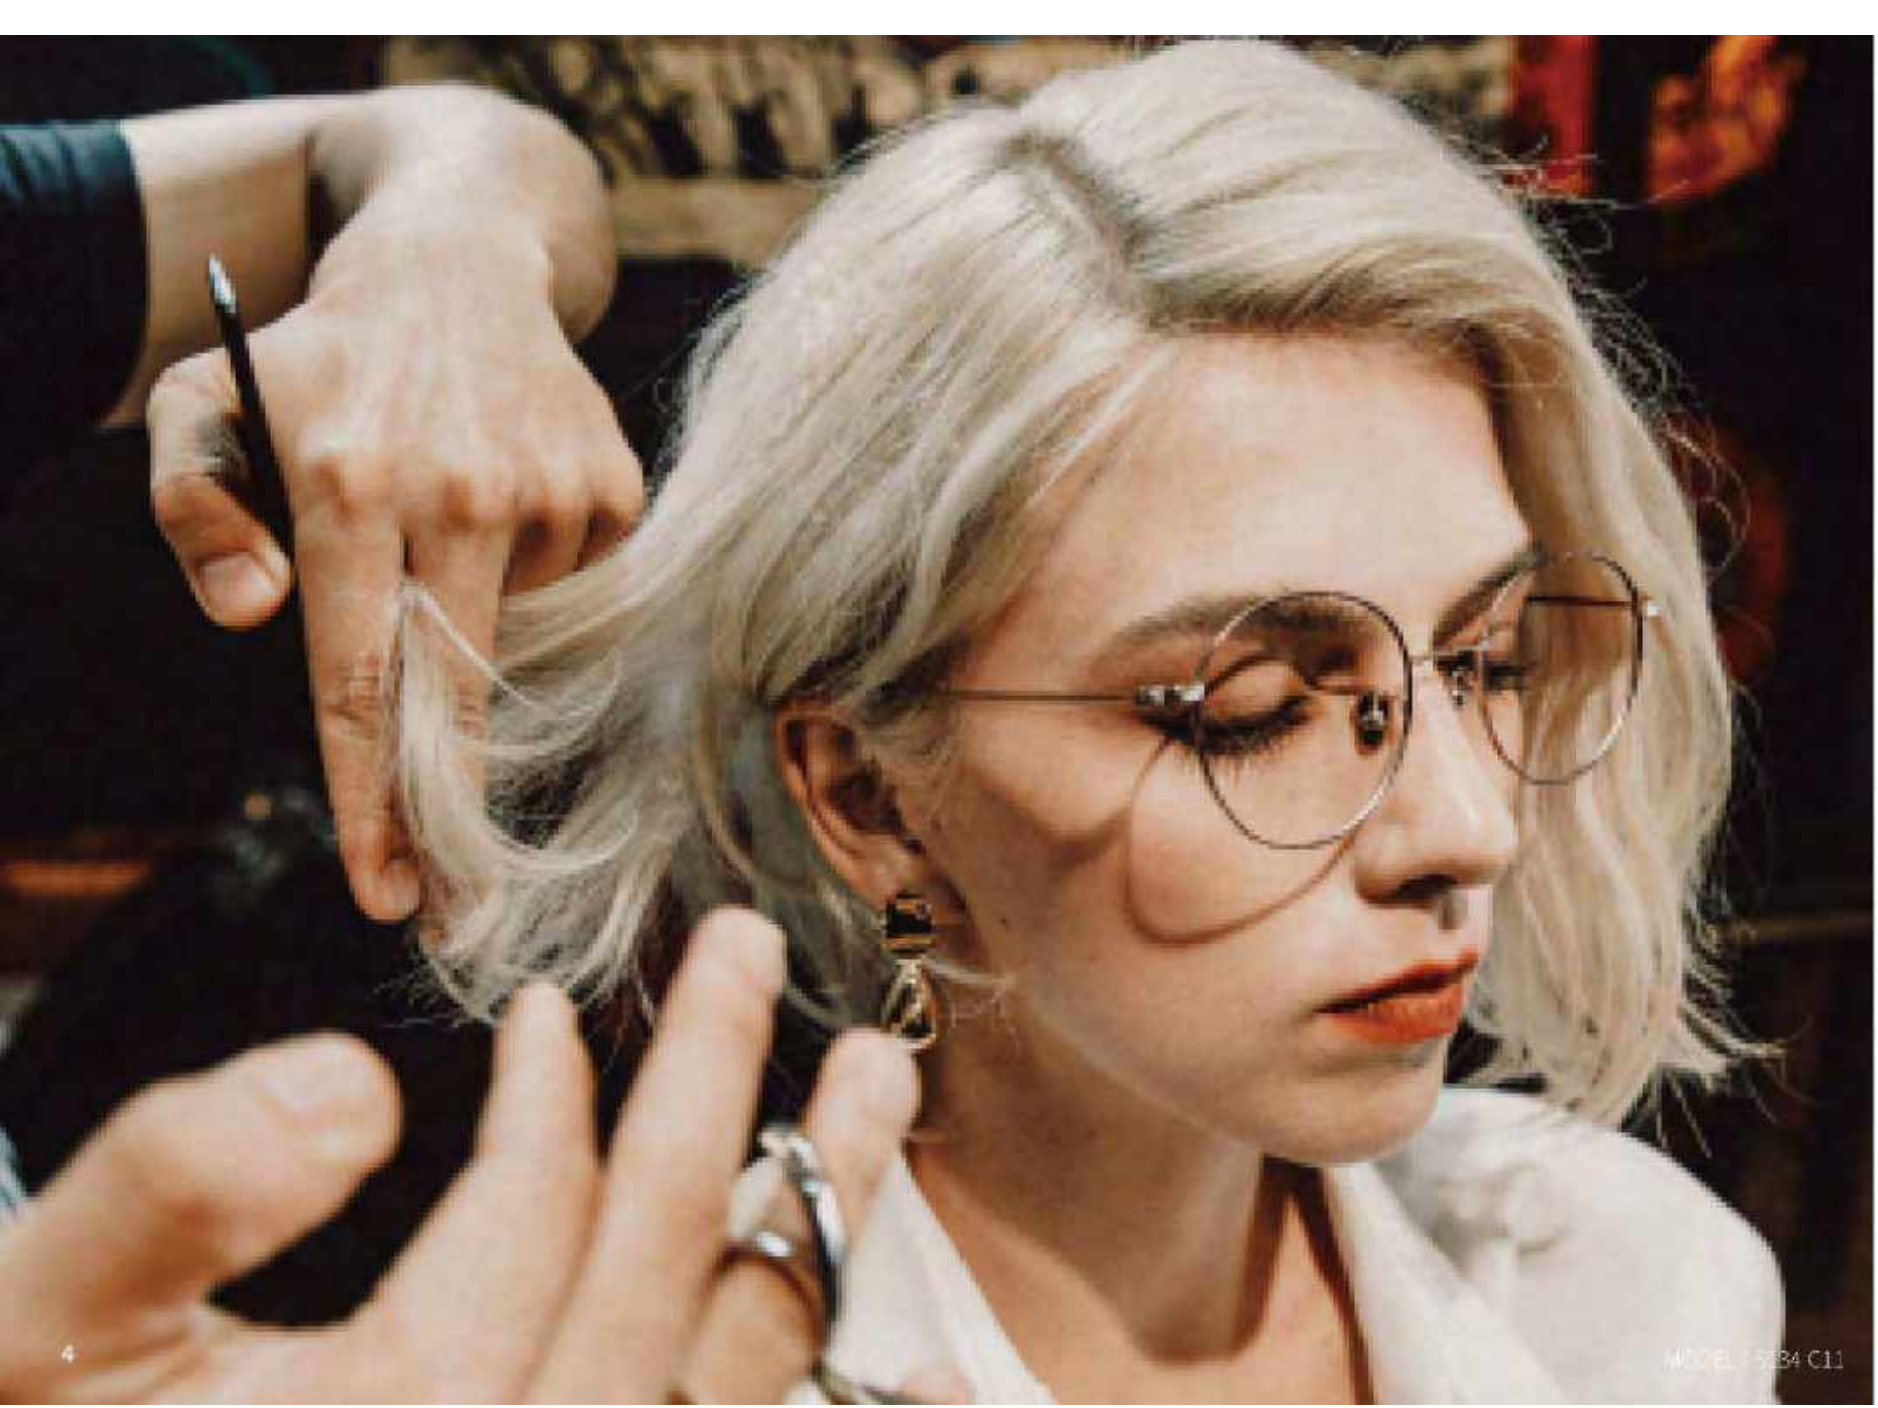

Play Kids is the frames designed by mother. It is very flexible and light as S7 Original thanks to Polyamide 66. Furthermore it has adjustable temples and special nose pad. Play Kids is the most reliable frame ever.

/ Steel Life /

It is made of Japanese 301 stainless with extreme quality. Furthermore, it is produced by own mold which provides the best quality of detail. We really cared about detail such as bridge, hinge and coating.

BIOPLASTIC

" THE NEW MATERIAL FOR CUSTOMERS AND ENVIRONMENT"

G850, The new material

The G850 which is the main material of BIO PLASTIC is the new material from Arkema, France. It does not contain any harmful substances, so it is safe enough to be used as tableware, medical supplies and children's products.

Incredible durability

The main reason of the breakage in plastic frame is being dried in short time. But the G850 keeps the moisture for long time so it is safer from broken or discolored.

The lightness

The G850 is 20% lighter than any other plastics. We provide the best comfortableness and wearing.

" SIMPLE BUT SPECIAL. BIO PLASTIC"

Light and clear color

The transparency and transmittance of G850 are similar to those of glass. Furthermore, it has more clearness of the color than other plastic. Because it is produced by high gloss mold and it is not coated with chemical components.

Castor oil

Used biomass which it is eco-friendly material

G850 France

G850, new material from France

Ergonomic fit

The best wearing sensation in optical frames

Moisture

Keep the moisture for long time, Breakless material

Light

20% lighter than any plastic

Recycle

Eco material which protects our environment

* Stavax | The stainless die steel with chromium alloy. Good corrosion resistant and wear resistance. The best material for the mold of plastic frames.

"Not just good material,
the assembly of technology"

We have our own molds for BIO PLASTIC and all those molds are high-gloss and are made of STAVAX material. Our own technology, 'The detachable temple' All licensed and patented.

AIRFIT

THE LIGHTEST METAL FRAME WITH "EVO FLEX" FROM WAGNER, GERMANY,

- What is the "EVO FLEX"?

EVO FLEX is a new material from "WAGNER" where researches and develops metals used in parts close to the body such as medical devices.

It is an alloy of the metal elements. It has some advantages of Titanium such as flexibility, harmlessness, lightness. In same time, it complements the disadvantage of Titanium like weak durability such as deformation and alteration.

Generally used for expensive metal. Complementing the shortcomings of titanium and gaining advantages

As a result, it is thinner and lighter than titanium material, but stronger.

- Safe material for our skin

EVO FLEX, which does not contain any nickel, is hygienic and safe enough to our skin. As a result this material is used in actual medical devices. With AIRFIT, you can wear them without worrying about your skin trouble.

AIR FIT, THE MASTERPIECE

- The heat treatments with three times

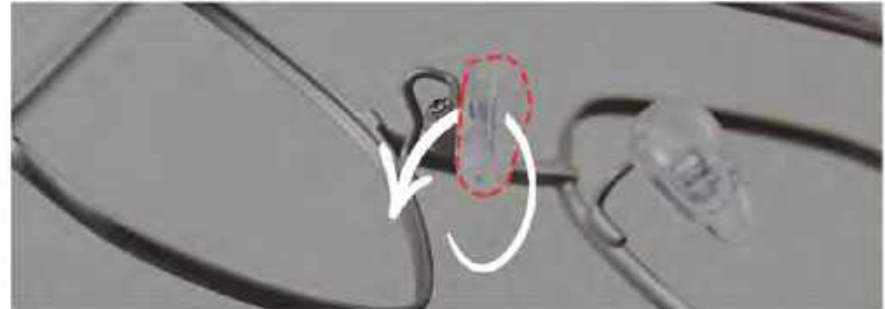

The surest way to improve the durability of metal materials is to apply pressure just before the eyeglass production phase. For general metal frames, they implement durability after one compression process, but Evoflex is designed thinner and sturdier after three heat treatment/compression processes.

SURPRISING, INCREDIBLE FIT

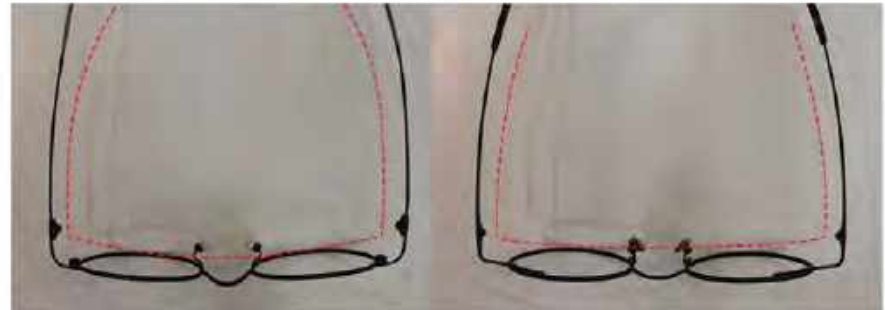

1 Air circulation nose pad, developed by S7

Different with normal nose pad, our air circulation nose pad prevents discoloration from the water or sweat even when worn for a long time

2 The fitting based on the angle of the front

Based on the wearer's pupils, we concerned about the fitting, not only on the nose or ear but also on the position of the lens. To produce perfectly how we designed, we tried the best revising and changing the molds for several times.

3 The comfortable ear tip preventing

Attaching the CA (Celluloid acetate) ear tips, AIR FIT provides very comfortable fit on ear being safe from the discoloration on the tips.

THE PAINT COATING FROM BERLAC

Berlac paint coating, which is from Swiss, is extremely strong from the external environment including sweat. It is resistant, does not come off easily, and reduces the risk of discoloration and corrosion.

Also the color tone of it is very suits for your skin. The AIRFIR colors are selected by many tests which match the asian skin tone.

How to detach "T" type temple.

STEP.1 Put the right thumb on the hinge of front as close as possible. Hold the front with rest of fingers.

STEP.2 Put the left thumb on the inside and end of the temple as close as possible. Hold the temples with rest of fingers.

STEP.3 Snap off the temple.

How to detach "Y" type temple

STEP.1 Put the right thumb on the hinge of front as close as possible. Hold the front with rest of fingers.

STEP.2 Put the left thumb on the inside and end of the temple as close as possible. Hold the temples with rest of fingers.

STEP.3 Maintain the angle between front and the temples as around 60 degrees.

STEP.4 Potentiate two thumbs. Using the rebound, bend the temple aside like splitting the apple in half.

How to attach "T" and "Y" type temple

STEP.1 Put the right thumb on the hinge of front as close as possible. Hold the front with rest of fingers.

STEP.2 Put the left thumb on the inside and end of the temple as close as possible. Hold the temples with rest of fingers.

STEP.3 Maintain the angle between front and the temples as around 60 degrees.

STEP.4 Potentiate two thumbs. Using the rebound, bend the temple aside like splitting the apple in half

HOW TO PULL OUT THE TIPS

STEP.1 Please heat the tips with heater for around 20~30sec.

STEP.2 Then you can pull out the tips more easily than before.

CAUTION

- The tip holds the temple very strongly to prevent to be pulled out easily by kids.

- So it may causes the defects if you try to pull it out by force.

HOW TO CUT THE TIPS AND TEMPLS

STEP.1 Please check the section first. (3mm for every sections)

STEP.2 Cut

STEP.3 Please check the section first. (3mm for every sections)

CAUTION Do not cut without the cover.

STEP.4 Please cover the temple with cleaner or towel, to prevent fragment from the cutting. .
